SHORT COURSES

FACULTY OF ENGINEERING | ENGINEERING INSTITUTE
Department of Chemical Engineering | Food Science & Technology Unit

FERMENTATION TECHNOLOGY BASICS OF KOMBUCHA BREWING

Saturday 30th January 2021 | 9am to 2pm

This course is specifically designed for Caribbean participants to develop skills & understanding to produce their very own 'kombucha creations'!

COURSE DESIGN:

- half-day online workshop
- a mix of lectures, slideshows and tutorials
- video footage of kombucha being made in a home kitchen

LEARNING OUTCOMES:

- principles of kombucha fermentation
- fundamentals of home brewing
- understanding of equipment used
- gain skills on brewing, flavoring and bottling your local creations

FACILITATORS:

- **Prof. Rohanie Maharaj**
(Coordinator)
- **Mr. Vishal Gannessingh**
(Lecturer)

TT\$200 / US\$30

*Online payment options available
Limited class size*
