**Publications**

(1) Park, K.H. (2017) "Simple solutions of an opening in elastic-brittle plastic rock mass by total strain and incremental approaches." Geomechanics and Engineering, 13(4), 585-600.

(2) Park, K.H. (2015) "Large strain similarity solution for a spherical or circular opening excavated in elastic-perfectly plastic media." International Journal for Numerical and Analytical Methods in Geomechanics, 39, 724-737.

(3) Phansri, B., Charoenwongmit, S., Yooprasertchai, E., Park, K.H., Warnitchai, P. & Shin, D.H. (2015) "An experimentary study on shaking table test on models of a concrete gravity dam." KSCE Journal of Civil Engineering, 19(1), 142-150.

(4) Park, K.H. (2014) "Similarity solution for a spherical or circular opening in an elastic-strain softening rock mass." International Journal of Rock Mechanics and Mining Sciences, 71, 151-159.

(5) Visvanathan, C., Karthikeyan, O.P. & Park, K.H. (2011) "Sustainable landfilling in tropical conditions: comparison between open and closed cell approach." Waste Management & Research, 29(4), 386-396.

(6) Phansri, B., Charoenwongmit, S., Warnitchai, P., Shin, D.H. & Park, K.H. (2010) "Numerical simulation of shaking table test on gravity dam using plastic damage model." Structural Mechanics & Engineering,36(4), 481-497.

(7) Phansri, B., Park, K.H. & Warnitchai P. (2010) "A BEM formulation for inelastic transient dynamic analysis using domain decomposition and particular integrals." Computational Mechanics, 45, 457-466.

(8) Riyaz, M., Park, K.H., Ali, M., Kan, H. (2010) "Influence of geological setting of islands and reefs on tsunami wave impact in atoll islands, Maldives." Bulletin of Engineering Geology and the Environment, 69(3), 443-454.

(9) Riyaz, M., Park, K.H. (2010) "Safer island concept developed after the 2004 Indian Ocean Tsunami: A case study of Maldives." Journal of Earthquake and Tsunami, 4(2), 135-143.

(10) Owatsiriwong, A., Phansri, B., Kong, J.S. & Park, K.H. (2009) "A cell-less BEM formulation for axisymmetric elastoplasticity via particular integrals." Computational Mechanics, 44, 161-172.

(11) Arjnoi, P., Jeong, J.H., Kim, C.Y., Park, K.H. (2009) "Effect of drainage conditions on porewater pressure distributions and lining stresses in drained tunnels." Tunneling and Underground Space Technology, 24, 376-389.

(12) Park, K.H., Tantayopin, K., Tontavanich, B. & Owatsiriwong, A. (2009) "Analytical solution for seismic-induced ovaling of circular tunnel lining under no-slip interface conditions: a revisit." Tunneling and Underground Space Technology, 24, 231-235.

(13) Owatsiriwong, A., Phansri, B. & Park, K.H. (2008) "A cell-less BEM formulation for 2D and 3D elastoplastic problems using particular integrals." CMES: Computer Modeling in Engineering & Sciences, 31(1), 37-59.

(14) Owatsiriwong, A. & Park, K.H. (2008) "A BEM formulation for transient dynamic elastoplastic analysis via particular integrals." International Journal of Solids and Structures, 45(9), 2561-2582.

(15) Park, K.H., Lee, J.G. & Owatsiriwong, A. (2008) "Seepage force in a drained circular tunnel: an analytical approach." Canadian Geotechnical Journal, 45(3), 432-436.

(16) Park, K.H., Tontavanich, B. & Lee, J.G. (2008) "A simple procedure for ground response curve of circular tunnel in elastic-strain softening rock masses." Tunneling and Underground Space Technology, 23, 151-159.

(17) Park, K.H., Owatsiriwong, A. & Lee, J.G. (2008) "Analytical solution for steady-state groundwater inflow into a drained circular tunnel in a semi-infinite aquifer: a revisit." Tunneling and Underground Space Technology, 23, 206-209.

(18) Park, K.H. & Banerjee, P.K. (2007) "A new BEM formulation for transient axisymmetric poroelasticity via particular integrals." International Journal of Solids and Structures, 44(22-23), 7276-7290.

(19) Park, K.H. & Kim, Y.J. (2006) “Analytical solution for a circular opening in an elastic-brittle-plastic rock.” International Journal of Rock Mechanics and Mining Sciences, 43(4), 616-622.
(20) Park, K.H. & Banerjee, P.K. (2006) “A simple BEM formulation for poroelasticity via particular integrals.” International Journal of Solids and Structures, 43(11-12), 3613-3625.
(21) Park, K.H. (2005) “Analytical solution for tunneling-induced ground movements in clays.” Tunneling and Underground Space Technology, 20(3), 249-261.
(22) Park, K.H. (2004) “Elastic solution for tunneling-induced ground movements in clays.” International Journal of Geomechanics ASCE, 4(4), 310-318.
(23) Park, K.H. & Banerjee, P.K. (2003) “Axisymmetric transient heat conduction analysis by BEM via particular integral.” International Journal of Computational Engineering Science, 4(4), 813-828.
(24) Park, K.H. (2003) “A BEM formulation for inhomogeneous potential problems by particular integrals.” Applied Mathematical Modelling, 27(4), 293-306.
(25) Henry, D.P., Park, K.H. & Banerjee, P.K. (2002) “A BEM formulation for transient axisymmetric thermoelastic analysis using particular integrals.” International Journal of Computational Engineering Science, 3(4), 339-353.
(26) Park, K.H. (2002) “A BEM formulation for axisymmetric elasticity with arbitrary body forces using particular integrals.” Computers & Structures, 80(32), 2507-2514.
(27) Park, K.H. & Banerjee, P.K. (2002) “Two- and three-dimensional soil consolidation by BEM via particular integrals.” Computer Methods in Applied Mechanics and Engineering, 191(30), 3233-3255.
(28) Park, K.H. & Banerjee, P.K. (2002) “Two- and three-dimensional transient thermoelastic analysis by BEM via particular integrals.” International Journal of Solids and Structures, 39(10), 2871-2892.
(29) Yang, M.T., Park, K.H. & Banerjee, P.K. (2002) “2D and 3D transient heat conduction analysis by BEM via particular integrals.” Computer Methods in Applied Mechanics and Engineering, 191(16), 1701-1722.
