

The Trinidad Sewerage Project: A Second Report

R.K. Bates

Superintending Engineer (Sanitation), The Water and Sewerage Authority, Trinidad and Tobago, West Indies

***Abstract:** In 1963, Fojo and Bates presented a paper dealing with the Sewerage project in Trinidad and Tobago. The project is presently under construction in Port of Spain and environs, San Fernando and Arima. Included in that paper was a short historical background and description of the project with pertinent data for sewers and operational features of the Pumping Stations and Sewage Treatment Works. This paper summarises the information given in the first paper and adds additional information, particularly on construction.*

***Keywords:** Sewerage, pumping stations, sewage treatment, construction, Trinidad and Tobago*
