

# **A Survey of Research Problems in Hydraulic Engineering in Trinidad and Tobago**

Gyan S. Shrivastava

Department of Civil Engineering, The University of the West Indies, St Augustine, Trinidad and Tobago, West Indies

**Abstract:** *Research problems in Hydraulic Engineering in Trinidad and Tobago are varied and many. In this paper, an overview of research problems in Hydraulic Engineering in Trinidad and Tobago is presented by means of a survey of research carried out in the past and by highlighting the relevant research problems of the present and of the foreseeable future. It is hoped that this overview will provide some background and continuity to new research workers in this field, and should help define priorities and direction for future research.*

**Keywords:** *Hydraulic engineering, research problems, Trinidad and Tobago*
