

UWI
St. Augustine

Faculty of Food and Agriculture

MSc. Degree in Agricultural Economics

Programme Overview

This applied Masters programme is designed for mid-career Agricultural professionals and economists in the private or public sector. The programme is experience-based and adopts a pragmatic approach to economic development from the different perspectives of sustainability, business economics, logistics, marketing, and international trade. Graduated students are also well equipped to apply to a PhD programme.

Entry Requirements

Admission into the MSc programme will normally be available to holders of a Bachelor's Degree in Agriculture, or any other relevant discipline from recognised institutions.

Duration

This programme is offered only as part of the University at the St. Augustine campus and will require 2 years (24 months) of study.
