VISION STATEMENT

An internationally recognized and respected Caribbean centre for excellence in the development of the peoples of the region through academic programmes and activities in the humanities and education.

MISSION STATEMENT

The Faculty will engage in teaching, research, outreach, and creative production in the humanities and education, in an environment in which individuals can develop the human values, linguistic competence, and professional skills and abilities that are relevant to the needs of the region.
MESSAGE FROM THE DEAN

As the faculty that houses the School of Education, the departments of Creative and Festival Arts, History and Liberal Arts, and the Centre for Language Learning, the Faculty of Humanities and Education is the engine room of the educative and humanizing impulse of The University of the West Indies. As educators, historians, writers, literary critics, performing and visual artists, we imagine ourselves as story tellers who remember in order for the present to recognize past efforts and their outcomes, and, in so doing, envision a future that may not fall victim to past missteps. Our goal is, in consonance with the vision and mission of the university, to assist in producing graduates who are creative problem solvers, imbued with a social conscience, committed to the integrity of the Caribbean region, and to the ties that bind all of humanity. In a collaborative effort and deploying the best technological tools available, the faculty is committed to working with our students to strategically transform the educational process into a relevant, impactful, distinctive, and excellent tool for the development of the human resource base of the Caribbean.

Archaeology, Education, Carnival Arts, Communication Studies, Creative Arts, Film, History, Linguistics, Literatures in English, Modern Languages, Music, and Theology are some of the exciting academic offerings available in the faculty. We encourage intra- and inter-faculty multidisciplinary combinations and participation in a number of cultural activities that the faculty organizes from time to time.

As we welcome you to the faculty with a promise to do everything in our power to respect and facilitate your rights, and to create a conducive atmosphere for you to achieve to the best of your abilities, we would also like to remind you that with every right comes a responsibility. We shall hold you to your responsibility to us as much as we expect you to hold us to our commitments to you.

Welcome to the Faculty of Humanities and Education.

PART II
DEFINITIONS OF KEY REGISTRATION TERMS

Academic Year: August 1st - July 31st

Award of
Honours: Awards assessed on the student’s performance in all credits gained from Level II and Level III courses, inclusive of Caribbean Studies Project

Co-requisite: A course which must be taken along with another specific course, in order to ensure the attainment of the complementary and/or independent competencies.

Course Code: A letter number and numeric combination used to identify a course eg. HIST 2004. The letter part of the code identifies the subject area (eg. HIST - HISTORY), while the first digit of the number part of the code identifies the level of the course (eg. 2004 - level 2).

Credit/Credit Hrs: The University’s way of measuring work towards a degree. To graduate, a student must complete a minimum number of credits/credit hours.

Full-Time study: A student who is registered for not more than 15 and not less than 12 credits per semester. Full-time students may take employment for not more than twelve hours week without losing their full-time status. Teaching and Research Assistants shall be registered as Full Time Students.

G.P.A.: Grade Point Average is the average obtained by dividing the total grade points earned by the total quality of hours for which the student is registered for any stated period of time, excluding hours on the foundation courses, audited courses and courses taken for preliminary credits.

Prerequisite: A course which must be passed before the course for which it is required may be pursued

Matriculation: The process of enrolment into the University

Major: An area of study that requires a specific number of credits including prescribed courses from Levels I, II and III from a single discipline.
Minor: A specific number of credits (usually 15 or 18) including prescribed courses from Levels II & III from a single discipline.

Semester: Half-year term in a school year - normally a 13 week period of instruction.

Special: A prescribed combination of courses offered which leads to a degree.

GENERAL INFORMATION

FINANCIAL STANDING WITH THE UNIVERSITY
Students who are not in good financial standing with the University will be provided by the University with records or certificates of their work at the University.

Such students who leave the University without making adequate arrangements to put themselves in good standing will not be given the University's diplomas or certificates for degree or other courses until they have satisfied the University in this respect.

In good financial standing means that all debts owed by the student to the University are fully paid or arrangements for their payment, satisfactory to the University, have been made.

OUT-OF-CLASS LEARNING
1. Co-Curricular Credits
   a. For the purposes of these Regulations, "co-curricular credit" means credit earned by a student in pursuance of some activity or programme of activities that is not part of the academic programme of a Department or Faculty of the University or is not undertaken by a student as part of the academic programme of a Department or Faculty, but which activity or programme of activities is recognised by the University as contributing to the overall personal, cultural, social and intellectual development of students and is approved by Academic Board under Regulation v below.

   b. Participation in activities for co-curricular credits is optional. However, wherever students have chosen to participate in any recognised co-curricular activity or programme of activities for credit, they shall be eligible for a maximum of three (3) credits as part of the credits required for the degree.

   c. Students who successfully complete any co-curricular activity or programme of activities for more than three (3) credits shall have additional credits recorded on their transcripts.

   d. Co-curricular credits shall not be taken into account in the determination of class of degree.

   e. All co-curricular activities/programmes for which credits are being sought shall be approved by Academic Board on the recommendation of any Campus Committee which Academic Board may recognise as having responsibility for co-curricular programmes.

   f. Registration for co-curricular credits in each case must be approved in advance by the Faculty Board and by the member of the Senior Administrative staff appointed or designated as Director of Student Services or Dean of Students, as the case may be, at the Campus.

   g. The grading of co-curricular activities shall be pass/fail.

2. UWI Mentorship Programme – For information please visit Student Advisory Services.

3. Exchange/Study Abroad Programme – Students majoring in Foreign Language programmes are encouraged to travel to countries in which these languages are spoken and to participate in approved programmes at recognised institutions. The University offers some support for such travel to Level II students who maintain a B average. Interested students must observe the deadline for application and (non-refundable) down payment. This information will be posted on the Faculty notice board in Semester I.

For more information please visit Student Affairs (Admissions) Section, Administration or the International Office.

       b. A Major is made up of a minimum of 36 credits in a single subject over the three levels. In Library Studies and Mass Communications, the Major requires a minimum of 45 credits.
       c. A Special is made up of a minimum of 54 credits in the subject over the three levels. Permission to declare a Special must be sought from the Head of the relevant Department.
       d. Component courses in a Major or Special are determined by the Faculty Board on the recommendation of the relevant Department(s).
       + This applies in cases where two Level I courses are taken for Level II credit
       * Mona only
       e. Throughout the entire degree programme, no more than 30 credits (distributed so as not to exceed 12 credits in any one year of the Full-time programme) may be selected from courses other than Humanities courses, except with the special permission of the Dean.
       f. A student may, with the permission of the Dean, change Majors. Full-time students must do this no later than the start of their third semester of registration. Part-time students who have registered in accordance with Regulation 9 (b) below, must do so no later than the start of the fifth semester of registration, or the completion of the bulk of Level I credits, whichever is sooner.
       g. Extra credits gained in any Level subsequent to the original credits required for the degree at that Level cannot be substituted retroactively for the original credits.
NON-GRADE POINT AVERAGE (G.P.A.) SYSTEM
FULL-TIME PROGRAMME
8. a. A full-time student shall complete the degree programme in not less than six and not more than twelve semesters.

b. A full-time student should normally register for not more than 15 and not less than 12 credits per semester, except in the case of the final two semesters of the degree programme in which a student may seek permission from the Dean to register for a maximum of 42 credits (including the Level III University Course and not a substitute) to complete the degree.

c. A student will be required to withdraw from the Faculty unless he or she has gained at least:

- 12 credits by the end of the second semester,
- 24 credits by the end of the fourth semester,
- 39 credits by the end of the sixth semester,
- 57 credits by the end of the eighth semester,
- 75 credits by the end of the tenth semester.

d. For purposes of these regulations, the semester referred to includes any summer session immediately following it.

NON-GRADE POINT AVERAGE (G.P.A.) SYSTEM
PART-TIME PROGRAMME
9. a. A part-time student shall complete the degree in not less than eight and not more than eighteen semesters.

b. Normally, a part-time student will be required to spread the Level I programme over four semesters. At least one Level I Foundation Course must be done in the first semester.

c. A part-time student will normally be permitted to register for Level II courses unless he or she has gained at least eighteen Level I credits.

d. A part-time student who has gained eighteen or more Level I credits must take at least twelve and normally not more than eighteen credits in each subsequent year, except with the special permission of the Dean. However, a student who requires fewer than twelve credits to complete requirements for the degree need take only those credits.

e. A part-time student will be required to withdraw from the Faculty unless he or she has gained at least:

- 6 credits by the end of the second semester,
- 12 credits by the end of the fourth semester,
- 21 credits by the end of the sixth semester,
- 30 credits by the end of the eighth semester,
- 42 credits by the end of the tenth semester,
- 54 credits by the end of the twelfth semester,
- 66 credits by the end of the fourteenth semester,
- 78 credits by the end of the sixteenth semester,
- 90 credits by the end of the eighteenth semester.

f. For purposes of these Regulations, the semester referred to includes any summer session immediately following it.

GRADE POINT AVERAGE (G.P.A.) SYSTEM
FULL-TIME AND PART-TIME STUDENTS – REQUIRED TO WITHDRAW
10. a. Faculty Regulations 8 (a), (b) and (c) above shall apply for Full Time students and Regulations 9 (a), (b), (c), (d) and (f) shall apply for Part Time students.

b. A student whose GPA for a given semester is less than or equal to 0.75 shall be deemed to be performing unsatisfactorily, and shall be placed on warning. A student on warning whose GPA for the succeeding semester is less than 0.75, will be required to withdraw from the Faculty.

b. A student on warning shall be counselled by the Dean or a designated faculty advisor. Such a student may, except where otherwise prescribed in Faculty Regulations, be permitted by the Academic Board on the recommendation of Faculty Board to carry a reduced course load.

FULL-TIME AND PART-TIME REGISTRATION
11. a. Students are initially registered as full-time or part-time but may change their registration.

b. Full-Time students may take employment for not more than twelve hours per week without losing their full-time status. Teaching and Research Assistants shall be registered as full-time students.

c. A student who is employed for more than twelve hours per week shall be registered as a part-time student.

d. A student is deemed to have registered for a course when his/her financial obligations to the University have been fulfilled.

e. Registration for a course constitutes registration for the examinations in that course.

With specific reference to b. and c. above, please note that a person in full-time employment cannot be registered as a full-time student unless written proof of leave approval is provided prior to or at registration.
REGISTRATION, EXAMINATIONS AND LEAVE

12. a. A course may be examined by written examination papers, oral tests, coursework, or any other method or combination of methods approved by Senate.

b. A student failing a course that is not compulsory may substitute another course in a subsequent semester or may repeat the failed course.

c. In registering in the Faculty, students must obtain the written approval of the appropriate Head of Department or his or her nominee for each course selected, and the written approval of the Dean of the Faculty for the combination of courses selected.

* The Relevant Approvals for registration are facilitated in the Banner Student Administration System with respect to online registration.

d. Registration for a course constitutes registration for the examinations in that course.

e. A student who has registered for a course but who wishes to withdraw from that course must apply to the Dean not later than the Friday of the second teaching week of the semester for permission to do so.

* The Banner Student Administration System facilitates the relevant approvals for change of registration with respect to online registration.

f. A student who does not sit the examination in a course for which he or she is registered is deemed to have failed that examination unless permission to withdraw has been granted.

This regulation shall not apply in cases of properly attested illness duly reported to the Campus Registry in accordance with the University Examinations Regulations.

g. Examination Regulation 22 states that:

“Any candidate who has been absent from the University for a prolonged period during the teaching of a particular course for any reason other than illness or whose attendance at prescribed lectures, classes, practical classes, tutorials or clinical instructions has been unsatisfactory or who has failed to submit essays or other exercises set by his teachers may be debarred by the relevant Academic Board, on the recommendation of the relevant Faculty Board, from taking any University examinations”.

Debarment will be recommended by the Faculty, based on information supplied by the relevant Head of Department, if the student has missed 50% or more of any of the above-mentioned requirements, subject to the following:

• Student attendance at tutorials and performance in Coursework will be routinely checked by the lecturer/tutor at four-weekly intervals, counting from the beginning of the semester.

• A student will be allowed one warning. This must be in writing and will be administered after the first four weeks of the semester. If there is no improvement at the end of the next four weeks, steps towards debarment will be initiated.

In the School of Humanities attendance at tutorials is prescribed.

i. The Board of Examiners may recommend to the department concerned that a student who has failed the last and only course required to complete the degree be offered an oral examination in that course, provided that he/she has obtained at least 35% in that course.

ii. If an Oral Supplemental is granted, the student may choose to decline the offer.

iii. The Oral Supplemental, which will be of a minimum length of one hour, will be held as soon as possible after the previous examination. The student must contact the Department concerned immediately so that arrangements may be made for the Oral.

iv. The Oral Examination will concern the course as a whole, and not be restricted to the questions set in the examination which the student did.

v. If the examination is passed, the student cannot be awarded a grade higher than C3, and this grade will replace that previously gained for the entire evaluation in that course.

vi. If he/she fails the Oral, the student will not have the right of appeal or review.

vii. A student will be allowed only one Oral Supplemental Examination for any one course.

h. Regulation for Leave of Absence

i. A candidate who for good reason wishes to be absent from an academic programme for a semester or more must apply for formal leave of absence to the Faculty Board, through the appropriate Dean, stating the reasons for the application.

ii. The length of such leave of absence, if granted, will be subject to approval by the Academic Board of the Campus concerned, but will not exceed one academic year in the first instance terminating at the end of the academic year for which the application is approved.
iii. Leave of absence will not be granted for more than two consecutive academic years.

iv. Leave of absence may be granted for one semester or for an academic year.

v. Applications for leave of absence for a semester shall normally be submitted by the end of the third week of the relevant semester.

vi. Applications for leave of absence for the academic year shall normally be submitted by the end of the third week of Semester I.

vii. These regulations do not for the time being apply to students in the Faculty of Medical Sciences.

NOTE: Students reading History courses are advised that even if they attain an overall pass mark (40 and above) inclusive of Coursework, they will not be awarded an overall pass unless they have passed at least one of the written examination questions.

Students are required to pass in each component (Coursework and written examination) in order to qualify for an overall pass in Literatures in English courses.

AWARD OF HONOURS
13. Honours shall be calculated on the basis of the Regulations existing at the year of the student’s entry into a particular programme of study into the University.

NOTIFICATION OF RESULTS
14. a. A pass list for each course in the B.A. degree shall be published each semester.

b. For those candidates who have completed the requirements for the B.A. degree a Pass List shall be arranged alphabetically in the following categories:
   i. First Class Honours
   ii. Second Class Honours
      a. Upper Division
      b. Lower Division
   iii. Pass

THE POINTS SYSTEM
(The Grade Point Average System will apply to students who started Level I in the academic year 2003/2004 and shall correspond to the Points System as follows:)

c. i. The class of degree is calculated on the basis of ALL levels II and III credits required for the granting of the degree as follows:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
<th>G.P.A.</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Class</td>
<td>Weighted G.P.A. 3.60 and above</td>

AEGROATAT DEGREE
(See also University Examinations Regulations)
15. A candidate who has been absent through illness from one or more examinations held in respect of Level II or Level III courses may apply for exemption from these examinations provided that:

a. no exemption shall be granted in respect of any course unless the candidate has successfully completed all the required work for the course and has achieved, in the opinion of his tutor(s) and of the Department, a satisfactory level of performance in the course;

b. no exemption shall be granted unless the candidate has obtained the minimum 30 Level I credits and at least 12 Level II credits;
c. no exemption shall be granted in respect of any dissertation or project;

d. the total number of credits for which exemptions may be granted shall not exceed 18, except where a student has satisfactorily completed both the Level I and Level II programmes exemption may be granted from a total of 24 credits.

Such exemption shall permit the student on completion of all the other requirements for the degree of B.A. to apply for an aegrotat degree.

MEDICAL CERTIFICATES
(See also University Examination Regulations)

16. Students who submit medical certificates as an excuse for absence from examinations are asked to note that although the student is free to visit his/her private physician he/she is required, for the purpose of securing exemption from examinations, to comply with the following:

a. to be examined by a medical practitioner from the University's panel of doctors;

b. in the event of the illness being so acute that the student cannot subscribe to (a) he/she should obtain a medical certificate from his/her private physician and in addition the physician should be required to supply the University Student Medical Officer with the reasons for the student's absence from the examinations and;

c. to ensure that the report is submitted to the University Student Medical Officer.

REGULATIONS WITH RESPECT TO ABSENCE FROM COURSEWORK TESTS

17. i. A student who is absent from Coursework examination may apply to the Dean of the Faculty for exemption from this examination no later than one (1) week following the date of this examination. He/she must at the same time submit to the Campus Registrar a valid justification for such absence (such as a medical certificate in case of illness). The Dean will consider any such request for exemption in consultation with the relevant Head of Department and course lecturers. If the exemption is granted, the percentage mark awarded for the final examination will be increased correspondingly.

ii. A student may request permission to submit Coursework assignments, essays, etc. after the stipulated deadline date on the basis of a valid justification (such as illness, in which case a valid medical certificate must be submitted to the Campus Registrar). This request must be made normally within 48 hours after the stipulated deadline date and must be addressed to the Dean, who in consultation with the relevant Head of Department and Course Lecturer, may allow the extension. In very exceptional circumstances, the Dean, acting on the advice of the relevant Head of Department and Course Lecturer, may consider requests for exemption from submission of the Coursework assignment, essays, etc., and, if granted, the percentage mark awarded for the final examination will be pro-rated.

UNIVERSITY REGULATIONS FOR THE RE-ADMISSION OF STUDENTS REQUIRED TO WITHDRAW

18. i. Students required to withdraw from the University for failing to complete their degree programme within the stipulated period may be re-admitted to the Faculty after at least one year has elapsed since their withdrawal. Students thus admitted to the Faculty in accordance with its regulations be granted exemption from Level I courses subject to there being no change in the content of the courses and provided that no more than five years have elapsed since the date of withdrawal. Level II University Courses, for the purposes of exemption, may be treated in the same way as Level I Faculty courses.

ii. Students whose performance in the Level I programme indicated general weakness (e.g. bare passes in all courses) may be required by the Faculty to repeat Level I of the programme.

iii. In special circumstances, exemption from courses in Level II of the degree programme may be proposed by the Faculty, provided that on re-admission the student is required to take at least a full load for one year. The maximum time allowed for completion will be two years for each year's full load.

iv. Students required to withdraw from the University for failing to complete their Level I or Level II degree programme within the stipulated period or for poor performance as provided for in the Faculty regulations, may be re-admitted to the Faculty after at least one year has elapsed since their withdrawal. Students thus re-admitted may be granted exemption from Level I courses or Level II courses subject to Regulations i, ii and iii above.

v. Students from one faculty who had been required to withdraw from the University for failing to complete their degree programme within the stipulated period may be admitted to another faculty after a minimum period of one year has elapsed since their withdrawal. Such students may be granted exemption from Level I courses relevant to the new programme, subject to Regulations i and ii above.

vi. Students required to withdraw from the University for failing to complete their diploma or certificate programme may be re-admitted to the Faculty after a minimum period of one year has elapsed since their withdrawal. Such students shall not be granted exemptions from courses in the programme previously passed.
REGULATIONS FOR THE LICENTIATE IN THEOLOGY AND DEGREE OF B.A. (THEOLOGY)

1. The Licentiate in Theology and/or the degree of Bachelor of Arts (Theology) will be awarded to students of Theological Colleges affiliated with The University of the West Indies who having completed the appropriate course of study prescribed by these regulations have satisfied the examiners in the examination for the L.Th. and/or the B.A. (Theology)

2. The Theological Colleges concerned are responsible for the admission of candidates and shall submit to the University at the appropriate time a list of students and their qualifications for purposes of matriculation.

LICENTIATE IN THEOLOGY (L.TH.)
Qualifications for Admission

3. The following are eligible for admission to the prescribed course of study for the Licentiate in Theology:

i. Candidates who have satisfied University Matriculation requirements for admission to a degree course;

ii. Individual candidates lacking qualifications under (i) above, who can present other evidence of satisfactory achievement may be accepted by the University on recommendation of the Principal of the affiliated college.

FULL-TIME STUDENTS

4. Candidates for the L.Th. shall pursue a prescribed course of study extending over not less than four and not more than ten semesters before being eligible for the award of the Licentiate.

5. During this course of study they shall gain 60 credits, 36 of which must be at Level I, as follows:

   in Biblical Studies 9 Credits
   in Historical Studies 6 Credits
   in Theological &Ethical Studies 6 Credits
   in Religious & Philosophical Studies 3 Credits
   in Pastoral Studies 6 Credits

   The remaining 24 credits must be gained at Level II or at Level III and must be taken from at least two of the areas of Theological Studies.

6. Full-time students must register for a minimum of 9 credits in each semester. Such students may, however, with the per-mission of their Theological College, register for more than 10 credits (up to a maximum of 15 credits) in each semester. Such additional credits shall be selected from those Theological courses provided for in the B.A. (Theology) degree programme.

7. A full-time student who, at the end of the second semester, has not completed at least 9 credits shall be required to withdraw from the Licentiate programme. A student who has completed at least 9 credits at the end of the second semester may be permitted to continue provided that student gains at least 6 additional credits in each ensuing semester, (except in cases where fewer than 6 credits remain to complete the requirements for the L.Th. as set out in Regulation 5 above).

PART-TIME STUDENTS

8. Candidates may study for the L.Th. on a part-time basis. Such candidates must complete the course of study prescribed in Regulation 5 above, in a minimum of eight semesters and a maximum of twelve semesters. Part-time students shall register for a minimum of 6 credits, and not more than 9 credits in each semester.

9. A part-time student who, at the end of the second semester, has not completed at least 6 credits shall be required to withdraw from the Licentiate programme. A part-time student who has completed at least 6 credits at the end of the second semester shall be permitted to continue provided that student gains at least 3 additional credits in each ensuing semester (except in cases where fewer than 3 credits remain to complete the requirements for L.Th. as set out in Regulation 5 above).

10. If a candidate has, (in accordance with Regulation 6 above) successfully completed more than the 60 credits (as prescribed in Regulation 5 above), such additional credits shall be indicated on the certificate issued to the successful candidate.

BACHELOR OF ARTS (THEOLOGY)
Qualifications for Admission

11. The normal qualifications for admission to the degree programme in the B.A. (Theology) are those of the Faculty of Humanities & Education and are set out in Regulations 1 and 2 of the School of Humanities.

The following candidates may also be admitted to the degree programme of the B.A. (Theology):

i. Candidates who successfully complete 2 preliminary semesters of study (as set out in Regulation 13 below), and who receive the recommendation of the Academic Boards of their respective Theological Colleges.

12. The following candidates may also be admitted to the degree programme of the B.A. (Theology):

i. Candidates who qualify for admission at lower level and who receive the recommendation of the Academic Boards of their respective Theological Colleges.

ii. Candidates who are holders of the Licentiate in Theology of the UWI upon the recommendation of the Academic Board of the Affiliated Theological College.
13. (i) Candidates who qualify for admission at lower level to the B.A (Theology) Programme must register as part-time students. Normally a part-time student will be required to spread the Level I degree programme over four semesters.

(ii) Such candidates shall be required to take 18 credits in the first year of registration, which should include 6 credits of Foundation courses and 9 credits of Theology courses. (In the second year of registration they may take up to 18 credits of theological courses).

FULL TIME STUDENTS
14. (i) Candidates for the degree of B.A. (Theology) shall present in not less than six semesters a minimum of NINETY (90) credits including not more than THIRTY (30) from Level I and not fewer than FIFTEEN (15) from Level III. NOTE: A student may be permitted to do two appropriate Level I courses (a total of six credits) for level II credit. These must be registered in the level II programme. Such courses may not be counted for the award of honours.

(ii) A minimum of SIXTY (60) credits shall be chosen from among the following areas according to the distribution set out below:

A. Biblical Studies 12 Credits
B. Historical Studies 6 Credits
C. Theological & Ethical Studies 12 Credits
D. Religious & Philosophical Studies 6 Credits
E. Pastoral Studies 6 Credits
F. Foundation Courses 12 Credits
G. HUMN 3099 or equivalents 6 Credits

This distribution shall be in accordance with the approved structure of the degree.

(iii) The remaining THIRTY (30) credits shall be chosen from A, and/or B, and/or C, and/or D and/or E with the approval of the Theological College concerned.

15. Candidates for the degree of B.A. (Theology) may, with the approval of the Theological College concerned and the Faculty of Humanities & Education, choose not more than a total of Twelve (12) credits of Level II and Level III courses from among those provided by the Faculty of Humanities & Education but not normally listed as available for the B.A. (Theology).

16. The minimal performance for a PASS degree (without honours) shall be that a student has passed 90 credits in a period of not more than twelve semesters.

17. Full time candidates will be required to withdraw unless they have gained at least:

Twelve credits by the end of the second semester
Twenty-four credits by the end of the fourth semester
Thirty-nine credits by the end of the sixth semester
Fifty-seven credits by the end of the eighth semester
Seventy-five credits by the end of the tenth semester
Ninety credits by the end of the twelfth semester

18. (a) Candidates entering the degree programme of the B.A (Theology), having completed the L.Th programme shall be permitted to complete the degree in a minimum of four semesters and a maximum of eight semesters. Such candidates shall be permitted to count towards the NINETY credits required for the degree, THIRTY credits of the courses which they have passed in L. Th. programme. Their remaining SIXTY credits shall be so selected that the aggregate of NINETY credits satisfies Regulation 14 above.

(b) Candidates who are allowed to transfer from the L. Th to the B.A Theology before completing the L.Th may, on recommendation of the Faculty Board, be given exemption and credit for up to 15 Level I credits already obtained in the L. Th. provided they have attained a minimum B+ level in the relevant course(s), and provided that it does not include any credits which they may have had to use satisfy Normal Matriculation requirements.

(c) Full time candidates transferring to the B.A (Theology) Programme from the L. Th under (b) above will be required to withdraw unless they have gained at least:

18 credits by the end of the second semester following
30 credits by the end of the fourth semester following
45 credits by the end of the sixth semester following
60 credits by the end of the eighth semester following

19. Candidates for the B.A Theology who are holders of the L.Th are not permitted to offer for the degree any course beyond Level I for which they have received accreditation in the L.Th. programme. Provided however, that candidates who had completed more than sixty credits required for the L.Th shall be permitted to offer for the degree a maximum of twelve credits from Level II and/or Level III.

PART-TIME STUDENTS
20. Candidates may complete the requirements for the B.A. (Theology) degree on a part-time basis. In such cases Regulations 7-9 of the Faculty of Humanities & Education shall apply.

MAJOR IN FILM PRODUCTION

The Major in Film Production will be offered by the Faculty of Humanities and Education as an interdisciplinary programme designed to teach potential filmmakers the technical skills of production at the very highest level and to ensure that these filmmakers understand the theoretical and aesthetic principles of film. The programme is designed to ensure that this balance between theory and practice is maintained. It is also designed to teach high-level analytical and critical skills so that future filmmakers may assess their own work and the work of other filmmakers.

The Major in Film Production shall consist of a minimum of 36 credits in Film. Students taking the Major in Film Production are required to offer a compulsory three-credit course, VART 2324 (CA23X), and must also take an additional six credits from film production courses. They must also make a film (Capstone) or Video (VART 3399 [CA330] - Film and Video 3) at Level III as a replacement for HUMN 3099 (UC300).

The English as a Foreign Language (EFL) Programme Is now offered at the Centre for Language Learning

ENGLISH AS A FOREIGN LANGUAGE (EFL)
What We Offer:-

GENERAL ENGLISH
These courses involve fifteen (15) hours of classes per week for a period of ten weeks. A skills-based syllabus is employed, where the grammar component receives the most weighting, with remaining hours devoted to receptive and productive skills (Listening, Speaking, Reading and Writing). Two hours of pronunciation are also included per week.

Students are placed in levels according to scores obtained in a placement test.

ENGLISH FOR THE WORKING WORLD
(SUBJECT TO DEMAND)
This course is designed for Intermediate/Advanced non-native speakers of English. Its aim is to equip participants with English language communication skills necessary for successful interaction in an English-medium working environment. It is limited to the office or business setting, but endeavours to cover typical working situations.

LANGUAGE THROUGH LITERATURE (SUBJECT TO DEMAND)
This is a course for Upper Intermediate/Advanced non-native speakers of English. Language is explored through the writings of Anglophone writers from the Caribbean and further afield.

TOEFL PREPARATION OPTION (SUBJECT TO DEMAND)
The TOEFL (Test of English as a Foreign Language) Preparation Option offered at UWI is a course designed to prepare students for the TOEFL test, conducted by the Educational Testing Service. Emphasis is placed on the components of the TOEFL examination, namely listening, speaking, reading and writing. Test-taking strategies are underscored. Special attention is given to developing students' range of vocabulary.

ATTENTION ALL CLL STUDENTS  
In the academic year 2004-2005 the University implemented a new computerised student administration system across the three campuses – THE BANNER STUDENT ADMINISTRATION SYSTEM (SAS).  
To facilitate this new system, new course codes are being introduced and some course titles are being changed.  
Students are asked to note that both the OLD codes and the NEW codes will be published in the Faculty Brochures and displayed as follows:

COURSE DESCRIPTIONS

LEVEL: I
SEMESTER: I
COURSE CODE: MUSC 0001 (MU40A)
COURSE TITLE: GENERAL MUSICIANSHIP I
NUMBER OF CREDITS: 2
PREREQUISITES: GRADE 3 MUSIC THEORY OR PRACTICAL

Course Description: This course consists of three components (i) aural skills, (ii) vocal sight reading, (iii) music theory. The main objective is true music literacy – to 'hear' with one's eyes and to 'see' with one's ears. Developing these skills is a long process but by the end of the course, students should have some ability to sight read a melody without needing to play it on an instrument and conversely to recognize and notate brief melodic phrases, intervals, rhythm patterns and scales as they are being played. (Note: the theory component begins with a consolidation of previous knowledge)

Course components include discrimination and dictation exercises in rhythm patterns up to sub-divisions in simple time, discrimination and dictation exercises in melodic patterns of limited range (pentatonic and diatonic), sight reading rhythm patterns in simple time and pitch patterns in pentatonic and major keys, new clefs and pitch registers, transposition: distance of one octave upwards or downwards, scales: new including pentatonic and whole tone, major and minor triads and intervals, duration: all notes and rests including divisions, subdivisions, beaming (groups) of notes, simple time with minim, crotchet and quaver beats.

CERTIFICATE (AND MINOR) IN SPEECH AND LANGUAGE PATHOLOGY

The programme is the first stage in the development of a larger programme in Speech Pathology designed to service the Anglophone Caribbean region. The Certificate (and Minor) will constitute the core prerequisites for a M.Sc. in Speech and Language Pathology, as well as provide an additional professional qualification in its own right to educators and social workers.

Students may be full-time undergraduates (who will complete the programme as a Minor), or persons who are working in the wider community but attending the programme part-time (who will complete it as a Certificate). It will be taught over two semesters and one summer. Starred courses are prerequisites to the Minor for undergraduate students.

CERTIFICATE IN SPEECH AND LANGUAGE PATHOLOGY

LINGUISTICS

SEMESTER: I

COURSE CODE: LING 1001 (L10A) COURSE TITLE: INTRODUCTION TO PHONETICS AND PHONOLOGY NUMBER OF CREDITS: 3
PREREQUISITES: NONE
Course Description: This course is designed to introduce students to the analysis, recognition, reproduction and transcription of speech sounds, and to enable them to understand the myriad possible patterning of these sounds in a wide cross-section of the world’s languages. It is especially useful for anyone studying or teaching a foreign language. By the end of the course, students will be able to recognize the difference between phonetic (etic) and phonological (emic) data.
Assessment: 100% in-course

SEMESTER: II

COURSE CODE: EDSE 6213 (ED62M) COURSE TITLE: INTRODUCTION TO SPECIAL EDUCATION NUMBER OF CREDITS: 4
PREREQUISITES: NONE
Course Description: This course provides a general introduction to the field of Special Education and the study of exceptionality. Since the trend in current educational practice is towards integration of special students into the mainstream classroom, it is not unusual for regular classroom teachers to have students with exceptionalities in their classes. Teachers therefore need to be aware of and sensitive to the characteristics and needs of these students.
Assessment: Coursework: 40%
Final examination: 60%

SEMESTER: I

COURSE CODE: MDSC 1003 (MD10C) COURSE TITLE: INTRODUCTION TO AUDIOLOGY NUMBER OF CREDITS: 3
PREREQUISITES: NONE
Course Description: This course is intended to impart a basic understanding of the normal auditory system, hearing loss and its causes, diagnosis and management. It is also intended to provide basic insight into the roles of various healthcare workers in this country, and abroad, in the management of hearing loss. This will provide the student with the necessary background to deal effectively with persons who are hearing impaired and to recognize a possible hearing loss in their clients.

SEMESTER: II

COURSE CODE: LING 2006 (L20F) COURSE TITLE: SPEECH AND HEARING SCIENCE NUMBER OF CREDITS: 3
PREREQUISITES: LING 1001, MDSC 1003, AND MDSC 1004
Course Description: This course is designed to provide students with a knowledge of the properties of sounds with specific reference to acoustics. Students will be expected to acquire an understanding of how the various properties of a sound wave influence its character and its perception by the hearer. In addition, the ability of the articulatory apparatus to generate and modify sound waves will be considered. This course is part of the new Certificate and Minor in Speech and Language Pathology.
Assessment: In-course: 50%
Final examination: 50%
SEMESTER: II
COURSE CODE: LING 2101 (L21A)
COURSE TITLE: LANGUAGE ACQUISITION
NUMBER OF CREDITS: 3
PREREQUISITES: LING 1001
Course Description: This course is designed to enable students to comprehend the natural processes of primary language acquisition in monolingual, bilingual, and multilingual situations. It examines theories of language acquisition as they have developed throughout this century, and measures these against experimental and naturalistic findings in this burgeoning field. It examines the contribution of neurolinguistic findings to the field. It investigates the major current issues in language acquisition research, specifically the roles of the first language(s), environmental, social-psychological, and neurological factors. Language acquisition is distinguished from language learning, which is studied later in other courses.

SEMESTER: OFFERED IN MID-YEAR PROGRAMME 2008
COURSE CODE: LING 2105 (L21E)
COURSE TITLE: LANGUAGE DEVELOPMENT AND LANGUAGE AND LEARNING DISABILITIES
NUMBER OF CREDITS: 3
PREREQUISITES: LING 2101
Course Description: This course offers an introductory survey of the range of language and learning disabilities, and will equip participants with a basic understanding of these conditions, and their symptoms. It is part of a larger Certificate programme and a Minor in Speech and Language Pathology, which will provide the community with persons sufficiently cognizant of language disabilities and their manifestations as to be able to take the appropriate identification measures, to make referrals and assist in intervention strategies. This course targets social workers, nurses, educators, and undergraduate students who are or will be teachers/researchers/consultants in language development, or simply parents.

SEMESTER: OFFERED IN MID-YEAR PROGRAMME 2008
COURSE CODE: MDSC 2003 (MD20C)
COURSE TITLE: CLINICAL MANAGEMENT
NUMBER OF CREDITS: 3
Course Description: This is a structured Observation Course which will include observational hours in clinical settings in Trinidad and Tobago. It will address clinical practicum issues, such as:
- Different treatment methods across disorders;
- Strategies to manage undesirable client behaviours across different contexts and age ranges;
- Documentation (e.g., report writing, IEP’s, progress reports, lesson plans), and strategies to maintain target behaviours;
- Differences (e.g., linguistic and cultural) and/or unusual disorders (e.g., delays due to severe sensory deprivations) will be discussed/incorporated as needed;
- ASHA guidelines and Code of Ethics to be upheld by both the supervisor and students, in Speech-Language Pathology (SLP); and
- The professional issues in SLP and Audiology.
Assessment: 100% in-course

SEMESTER: II
COURSE CODE: THEA 2007
COURSE TITLE: FESTIVALS, DRAMA AND SOCIETY
NUMBER OF CREDITS: 3
PREREQUISITES: CA12A
Course Description: This course explores the significance of performance to social and cultural formation, using the festival as the medium for this examination. The Festival is considered an interesting example of performance and street theatre that provides the basis for rich inquiry and analysis. It will be shown that there is much in the festival that is linked to drama. Therefore teaching is structured around three traditional festive performances found in Trinidad and Tobago. These are chosen from a traditional African feast, Ramleela, Hoosay and or Parang/Creche.

The course has two aims: experiential - to explore performance as a practical medium; and research-oriented - to develop anthropological and ethnographic skills so as to be able to understand the performance scale and be able to explain the underpinnings of drama and festival in a theoretical way.

COURSE TITLE: INTRODUCTION TO ART EDUCATION: PHILOSOPHY AND PRACTICE OF THE ART TEACHER
PREREQUISITE: NONE
CREDITS: 3

Course Description: This course introduces visual arts practitioners to existing theories and critical readings in contemporary art education practice. It seeks to investigate and explore how existing theories inform pedagogy in the visual arts classroom or community-based art project. Readings and activities will focus on the cultural context of students and participants in learning situations (classroom or community) and how their specific lived experiences influence art production and learning. This is a lecture seminar course that will eventually inform lesson planning, lesson content, methodology, and art teaching practice. The history of education in Trinidad and Tobago becomes a critical module to be studied as part of this course.

COURSE CODE: VART
COURSE TITLE: THREE-DIMENSIONAL DESIGN
PREREQUISITE: THREE-DIMENSIONAL DESIGN
CREDITS: 3

Course Description: This is a studio course. It is a compulsory course for Visual Arts Special undergraduates. It introduces practical activities for the analysis and production of three-dimensional forms. It teaches the use of materials research and processes for exploration and experimentation with three-dimensional forms. Participants will manipulate materials and will be challenged to carry out a range of tasks that will formulate practices for Fine Art and Design practices. There is an extensive inventory of materials now available to artists and designers. This has encouraged a proliferation of three-dimensional forms that may be employed in imaginative projects. To this end, this course is designed to expose students to the concepts underlying the intrinsic link between the form, the material, and the process.

This course uses the Experimental Learning approach to Problem solving including Concrete experience, Observation and Reflection, Formation of Concepts, and active Experimentation.

COURSE TITLE: FILM MARKETING AND DISTRIBUTION
NUMBER OF CREDITS: 3
PREREQUISITES: FILM 1001, FILM 1002, FILM 1299
Course Description: The course introduces students to the background and practices of film marketing and distribution. This is a critical issue for filmmakers from the developing world who may have the creative and technical skills but are unable to raise money for their projects or receive revenue for their films without an effective marketing and distribution strategy. It will provide an analysis of why films succeed and fail regardless of their inherent quality. Students will be introduced to successful film marketing strategies that will help them to design their own film marketing campaigns. The course will include the marketing and distribution of films by the Hollywood studios, Bollywood, independent film companies and independent filmmakers. It will also focus on the role of new media, especially the Internet.

COURSE TITLE: ADVANCED RESEARCH SEMINAR
NUMBER OF CREDITS: 6
PREREQUISITES: FILM 1001, FILM 1002, FILM 1299
Course Description: Research is the basis of learning and experimentation. This course builds on the skills in analysis gained from level one and level two courses. It is intended to act as a stepping-stone to postgraduate work in film studies. The course is designed to enable students to explore the archives of Caribbean cinema in an analytical and critical way and to interact at an advanced level with Caribbean filmmaking. It will therefore guide scholars in the collation of archival material in the area of film. It will encourage students to record the working processes and the creative thinking behind filmmaking; interviewing of film directors, actors and set designers will be keyed into the content. This course should actively create resources for the future. Students will be guided in their individual research into specific aspects of Caribbean filmmaking.

COURSE TITLE: THE IMPACT OF FILM ON CARIBBEAN CULTURE AND PERCEPTION
NUMBER OF CREDITS: 6
PREREQUISITES: FILM 1001, FILM 1002, FILM 1299
Course Description: This will involve a series of lecture/seminars, which will direct students to key areas of research into Caribbean cinema and Caribbean culture. Its focus is interdisciplinary and the course will build on the skills and knowledge base acquired in Film, Literature and Drama (Level 1). One area of study will be the impact of film on Caribbean writing. In this, students will look at literary texts to explore the ways in which the film sense has shaped form and image in literary production. Parallel to this will be an examination of the interrelationships between film art and painting, architecture, music. The course will also begin the process of looking at film’s contribution to philosophy in the light of Gilles Deleuze’s two works on cinema. This will form the basis for postgraduate work.

LEVEL: II
SEMESTER: II
COURSE CODE: FOUN 1210 (FD12A)
COURSE TITLE: SCIENCE, MEDICINE AND TECHNOLOGY IN SOCIETY
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: This course is offered in the distance mode. There are no lectures. However, there will be scheduled tutorials and a reading manual will be provided for the course. The evaluation of the course is by final examination only, consisting of three (3) questions to be answered in two (2) hours. Two questions will be of the essay type and one will be structured.
The course introduces students to some of the major institutions in Caribbean society. It exposes the student to both the historical and contemporary aspects of Caribbean society, including Caribbean legal, political and economic systems. In addition, Caribbean culture and Caribbean social problems are discussed.

Assessment is based solely on a final examination at the end of the semester. It consists of twelve essay-type questions, of which students are required to write on three. All questions carry equal marks.

The examination is divided into four sections corresponding to the four subject areas in the course. Students are not allowed to do more than one question in any one section.

In the final year of their degree programme, undergraduates reading for the B.A. are required to investigate some topic relating to the Caribbean, and to report the results in the form of a paper, except where permission has been given to substitute a Faculty Course or Courses for Caribbean Studies.

In order to qualify for exemption from the Caribbean Studies requirement the student must satisfy the Faculty that the alternate course will contain a significant Caribbean content and an adequate research component. In this connection the Faculty shall maintain an up-to-date list of approved courses to which the Dean shall refer in determining each application.

Students electing to do a course in place of UC300 must select such course(s) when registering in the Third Year. Retroactive credit will not be given for any course(s) as a replacement for UC300.

Students straddling Years II and III and wishing to read a substitute course for UC300 - Caribbean Studies might be permitted to do so provided that the substitute course is included in the Year III programme.

The topic, which must be substantially different from the Faculty Coursework undertaken by the student, must normally be chosen from one of the student’s major areas of study and must be approved by the Moderator of Caribbean Studies. In all cases, approval will only be given when the topic is feasible and a Supervisor has been identified.

An outline plan indicating the scope and organisation of the proposed study together with a bibliography or list of source materials, should normally be submitted when seeking this approval.

Topics approved by the Moderator shall be registered by the last day of Semester II in the year preceding the final year but changes of the title will be permitted up to the end of the registration week of the ensuing Semester I.

The paper shall be between 5,000 and 8,000 words excluding bibliography, and must be of a quality appropriate to the work of an undergraduate in the final year of the degree course.

The paper shall be submitted to the Faculty Office, by the first Tuesday in April, except where the Moderator in exceptional circumstances allows up to one more week.

Candidates who do not submit a paper by the deadline in 9 above shall be deemed to have failed, and shall re-register for UC300 in the next academic year and submit by the deadline set out in 9 above.

In cases where all regulations governing Final Year Supplemental Examination have been met (i.e. that the candidate has only these 6 credits left to complete the degree and has obtained at least 35% in UC300) candidates who, having duly submitted, do not pass at the first attempt and wish to graduate without losing time may re-submit not later than the last Friday before the beginning of the next academic year.

Candidates are allowed to repeat UC300 so long as they have not exhausted the maximum time permitted to complete the degree. Such repeat Studies must be handed in by the first Tuesday in April. Any change in topic must be approved by an registered with the Moderator.

Deferral of UC300: The following students are required to register their Caribbean Study as “deferred”:

(a) Full-time students who are allowed to take more than 36 but not more than 42 credits in their final year to complete the degree.

(b) Final year students who, as a result of having failed one or more courses in Semester I, need to gain 21 credits in Semester II to complete the degree or similarly, Part-time students needing more than 15 credits in Semester II.
(c) Part-time students who are given permission to register for over 24 credits in their Final Year in keeping with the provisions of Faculty Regulation 9 (d).

If such students have successfully completed all other requirements for the degree by the end of the Semester II examinations, they will be permitted to submit their Study not later than the last Friday before the beginning of the next academic year. Such students must register their topic with the Moderator by May 31.

14. Summer School Registration:

Students who need only UC300 to complete their degree or who will be registering in the Summer School for all remaining credits needed to complete their degree will be allowed to register for UC300 in the Summer School. Topics must be registered with the Moderator by 31st May and the study must be submitted not later than the last Friday before the beginning of the next academic year. Approval shall be subject to identification of an available Supervisor.

15. All studies shall be marked as received. However, after marking, a study may be returned for correction of minor editorial/stylistic errors, for purposes of lodgement in the Library but not for remarking.

Students are advised that they must consult with their Supervisor on a regular basis or risk failure in the course.

16. Two Faculty book prizes may be awarded on each campus each year for the best studies.

17. The following courses are substitute courses for UC300. Please note that the relevant pre-requisites must be met:

(i) CANV 3499 - Festival Project
(ii) COMS 3099 - Language and Communication Seminar
(iii) LITS 3501 - Advance Seminar in West Indian Literature A & LITS 3502 - Advance Seminar in West Indian Literature B
(iv) LING 3099 - Special Project in Linguistics
(V) FILM 3199 - The Impact of Film on Caribbean

Note: Candidates who, at the beginning of an academic year, need only Caribbean Studies to complete the degree, are reminded that they are required to register for the one remaining course and to submit the study at the normal time.

SEMESTER: I
COURSE CODE: FREN 3004 (F30C)
COURSE TITLE: REPRESENTING THE ‘NEW’ IN POSTWAR FRENCH FICTION, THEATRE, AND FILM
(COMPULSORY FOR FRENCH MAJORS)
NUMBER OF CREDITS: 3
PREREQUISITES: FREN 1599, FREN 2605 OR FREN 2607
Course Description: The post-war period of France saw a proliferation of new forms of representation across the cultural spectrum. This course will bring together and analyse the three most important and influential manifestations of this drive for the new: the Nouveau Roman, the Nouveau Théâtre/Theatre of the Absurd, and the Nouvelle Vague in French cinema. Introductory lectures will provide students with information on the cultural, political and social contexts which gave rise to these new forms. Close analysis of one prominent example from each genre – La Modification by Michel Butor, En attendant Godot by Samuel Beckett and Les 400 coups by Francois Truffaut – will thereafter lead to a more profound understanding of the ways in which previous, ‘conventional’ modes of representation were challenged and overturned. The emphasis is on a comparative approach: each piece is not treated discretely, but as a manifestation of a wider trend to rethink culture tradition, new conceptions of humanity in the post-war period, representations of time and place, the relationship between individual and society, the links between form and content.

SEMESTER: I
COURSE CODE: GEND 3501
COURSE TITLE: THE PHILOSOPHY OF GENDER
CREDITS: 3
Pre-requisites: AR20A AND GEND 2013
Course Description: This course attempts to understand the intellectual challenges and gains of introducing gender into the academy. It takes on board how we think about gender in a selected set of discourses within mainstream philosophy and, thus, is highly recommended for undergraduate students who intend to pursue the MSc, Gender and Development Studies as well as those undergraduate students who intend to use gender as a category of analysis in their graduate research. It traces the both the intersection of feminist thought with popularly received ideas of philosophy as well as its digression from these ideas. To blend the popular with the academic discourse, the course adopts a problem solving approach by locating the discussion of each topic around specific Caribbean readings which raise the general issues in the context of their relevance to the Region.
Course Content:
1. Feminist critique of selected discourses within mainstream western philosophy – dualism and the Derridan and Foucaultian critiques
2. Gender Epistemology: “Fighting With Meaning” – knowledge production in metaphysical thought; theology, origin stories and mythologies of gender; feminism versus empiricism and rationalism
3. Being, self and reality: the question of material being in ontology – the construction of the body and the mediating influence of socio-economic class, race/ethnicity, sex and geography.
4. Feminist ethics and moral theory – ‘the other’ and ‘otherness’; moral sensibility and the human experience of difference.
Methodologies: This is a reading/seminar course which will make use of independent research, group and independent presentations and tutoring.
Course Assessment:
• Two major course work essays of approximately 5,000 words. (This will be assessed by two internal examiners.) 40%

HISTORY (NOT UC COURSES)
Course Description: The rationale behind this course and the follow-up “African Diaspora II: A.D. 1800 to Present Times”, is to present an Afro-centric, revisionist interpretation of the place of Africa, Africans and communities of African descent in the diaspora in Europe, Asia and the New World by A.D. 1800 in world history.

This is to counter the received ‘Hegelian’ and ‘scientific-racist’ view of the 19th century North Atlantic world, to the effect that Africa and Africans had been a civilisational nullity i.e. until the era of contact with the North Atlantic world from the 15th century.

Special focus will be given in the course to the history of the evolution of negative views of Africa and Africans from the writings of certain ancient Jewish, Talmudic writers, through the writings of medieval Muslim intellectuals and then to the 19th century school of scientific racism across the North Atlantic. Also too, the evolution of windows of African culture life by transfer from Africa, in New World slave societies by A.D. 1800.

Course Description: This semester course is intended to give the student an insight into the historical evolution of U.S. relations with Latin America and the Caribbean since the enunciation of the Monroe Doctrine until the end of the Cuban missile crisis. It examines the implications of the Monroe Doctrine and Manifest Destiny ideology in the context of U.S. territorial expansionism in the 19th century and treats that expansionism against the background of West European rivalry for trade, territory and political influence in Latin America and the Caribbean. The emergence of the U.S.A. as a world power following the Cuban/Spanish/American war; the growth of gun-boat and dollar diplomacy; and the U.S. reaction to the rise of Latin American and Caribbean nationalism between the two world wars are also themes that are addressed. The course ends with an examination of the drive to-wards the creation of a U.S.-led Pan-American system, formalised in the creation of the Organisation of American States, and the implications of that system for Latin America and the Caribbean in the context of the Cold War up to the Cuban revolution.

SEMESTER: MID-YEAR
COURSE CODE: HIST 3719
COURSE TITLE: HISTORICISING DESIRE: HUMAN SEXUALITY FROM THE KAMASUTRA TO THE VICTORIANS
NUMBER OF CREDITS: 3
PREREQUISITES: NONE
Course Description: This course will trace the various theological and cultural attitudes, ideas and behaviours that have, since Victorian times, shaped perspectives on human sexuality and how these have created particular understandings of this most central human experience. By asking the questions: “Do sexual attitudes and behaviours become more relaxed over time? Or do they fluctuate with the changing times, becoming more conservative or liberal as the wider culture does?” the student will realise that what is often regarded as ‘natural’ or ‘unnatural’ sexual behaviour today is relative and based on an understanding of the intersection of culture and individual experience. Therefore, the major emphasis of the course will be on the historically varying and psychosocial bases of human sexuality. Additionally, since the biology of sex plays an important role in human sexuality, throughout the course attention will be given to the biological foundations of human sexual behaviour and the issues that derive therein. In particular the “nature vs. nurture” debate concerning human sexuality (especially as it relates to the Caribbean region and Jamaica in particular) and the challenges posed by STDs to contemporary Caribbean societies will be examined.

LINGUISTICS COURSES

LEVEL I

SEMESTER: I
COURSE CODE: LING 1001 (L10A)
COURSE TITLE: INTRODUCTION TO PHONETICS AND PHONOLOGY
NUMBER OF CREDITS: 3
PREREQUISITES: NONE
Course Description: This course is designed to introduce students to the analysis, recognition, reproduction and transcription of speech sounds, and to enable them to understand the myriad possible patterning of these sounds in a wide cross-section of the world’s languages. It is especially useful for anyone studying or teaching a foreign language. By the end of the course, students will be able to recognize the difference between phonetic (etic) and phonological (emic) data.

(COURSE TITLE: LANGUAGE ACQUISITION)
NUMBER OF CREDITS: 3
PREREQUISITES: LING 1001, LING 1002, AND LING 1005
Course Description: This course is designed to enable students to comprehend the natural processes of primary language acquisition in monolingual, bilingual, and multilingual situations. It examines theories of language acquisition as they have developed throughout this century, and measures these against experimental and naturalistic findings in this burgeoning field. It examines the contribution of neurolinguistic findings to the field. It investigates the major current issues in language acquisition research, specifically the roles of the first language(s), environmental, social-psychological, and neurological factors. Language acquisition is distinguished from language learning, which is studied later in other courses.

Sociolinguistics is concerned with the relationship between the language we speak and the society we live in. It is concerned with describing dialects of language in their own right and evaluating their diverse uses. It studies language as a tool of power and identity. Within this introductory course fundamental sociolinguistic concepts and premises are introduced; we look at the ways in which social variation can be correlated with linguistic variation, and examine issues of gender, ethnicity, class, age, and education as critical variables. This is a recommended course for language teachers and students of social sciences.

COURSE CODE: LING 3001 (L30A)
(COURSE TITLE: ADVANCED PHONOLOGY)
NUMBER OF CREDITS: 3
PREREQUISITES: LING 2001
Course Description:
This is a course in advanced phonology with a particular emphasis on the framework of generative phonology. The course examines major issues in generative phonology, namely segmental processes, prosodic processes and phonological representations. The main concerns will be (1) to discover general procedures for data analysis which motivate appropriate phonological rules in language, (2) to examine major theories and debates for the representations of universal and specific language features. This course will give students a deeper appreciation of how theory shapes our understanding of issues, and access to current methods in formal phonological analysis.

SEMESTER: II
COURSE CODE: LING 3002 (L3OB)
COURSE TITLE: ADVANCED SYNTAX
Number of credits: 3
Prerequisites: LING 200
Course Description: The course investigates ways in which properties of human language are explained within a theoretical framework, and emphasizes that data are meaningless in the absence of a theory. A Transformational Generative model is used to investigate how syntactic theory accounts for the generation of certain utterances which X-bar theory is not able to generate. Specifically, students are introduced to a number of transformations, including head-to-head movement & phrasal movement, and crucially, to the restrictions on that movement. This is presented as a fairly complete and simple system, laying the theoretical foundation for further explorations.

COURSE CODE: LING 3101 (L31A)
COURSE TITLE: APPLIED LINGUISTICS
NUMBER OF CREDITS: 3
PREREQUISITES: LING 2101 OR LING 2105
Course Description: Applied Linguistics not only provides the theoretical and descriptive foundations for the investigation and solution of language-related problems, especially those of language education (first-language, second-language and foreign-language teaching and learning), but also addresses problems of translation and interpretation, lexicography, forensic linguistics and (perhaps) clinical linguistics. Its main distinguishing characteristic is its concern with professional activities whose aim is to solve ‘real-world’ language-based problems, which means that research touches on a particularly wide range of issues—psychological, social, political and economic as well as linguistic.

COURSE CODE: LITS 2109 (E21B)
COURSE TITLE: NOVEL II
NUMBER OF CREDITS: 3
PREREQUISITES: LITS1002
Course Description: In this course the student will study the
development of the novel in the nineteenth and twentieth
centuries through an examination of the work of five major
novelists chosen to illustrate different aspects of that
development.
The course examines novels from mainstream English literature
but also some novels of a more experimental nature. We begin
with the Victorian period in which the novel was said to reach
its apotheosis, and progress to novels that employed more
provincial dialects and landscapes, to novels that reflect a more
modern period with their experimentation in form and language,
and the presentation of complex moral issues. Concepts such
as the following will be explored in relation to the set texts: bildungsroman, social satire, novel of crime and detection, romance, gothic novel, autobiography, psychological realism, tragedy, black comedy, dystopian literature, science fiction, and cyberpunk fiction.

MUSIC COURSES

LEVEL I
SEMESTER I
COURSE CODE: MUSC 1005
COURSE TITLE: INTRODUCTION TO WORLD MUSIC
NUMBER OF CREDITS: 3
PREREQUISITES: NONE
Course Description: This foundation course in understanding the music of some of the world’s peoples is intended to give clearer appreciation of some cultural roots and music origins of ethnic groups that make up the Caribbean. Selected regions of Africa, India, China, Japan, Indonesia and Brazil will be the focus. The examination of musical characteristics that define the main folk and traditional music genres of these regions will enable students to aurally identify origins of such music in different contexts. Knowledge of the uses and functions of music in such societies, terminology used to describe the music, folk music in a context of tradition and change, and music learning from a cross-cultural perspective will prepare students for contemporary music making where fusing of the world’s musical resources by composers and performers is the trend.

An attempt will also be made to indicate where psychological principles could play an effective part in understanding and solving certain problems.
The course is organized into seven sections. An attempt will also be made to use a multi-disciplinary approach through illustrations. The theme of humanistic psychology will be used alongside the Freudian and Behaviouristic approaches to explore whether human beings have the inherent nature to transcend the environment or to remain always at the mercy of the environmental forces. Among the topic areas dealt with in this course are sensation and perception, learning, motivation, memory, emotions, intelligence, personality, development and research methods.
This course is a prerequisite for all other second and third year psychology courses. Students are expected to attend all lectures and undertake consistent reading on their own.

SEMESTER: II

**Level: II**

**Semester: I**

**Course Code: THEA 2007**

**Course Title: Festivals, Drama and Society**

**Number of Credits: 3**

**Prerequisites: LITS 1201**

**Course Description:** This course explores the significance of performance to social and cultural formation, using the festival as the medium for this examination. The Festival is considered an interesting example of performance and street theatre that provides the basis for rich inquiry and analysis. It will be shown that there is much in the festival that is linked to drama. Therefore teaching is structured around three traditional festive performances found in Trinidad and Tobago. These are chosen from a traditional African feast, Ramleela, Hoosay and or Parang/Creche.

The course has two aims: experiential - to explore performance as a practical medium; and research-oriented - to develop anthropological and ethnographic skills so as to be able to understand the performance scale and be able to explain the underpinnings of drama and festival in a theoretical way.

COURSE TITLE: INTRODUCTION TO ART EDUCATION:
PHILOSOPHY AND PRACTICE OF THE ART TEACHER I
PREREQUISITE: NONE
CREDITS: 3

Course Description: This course introduces visual arts practitioners
to existing theories and critical readings in contemporary
art education practice. It seeks to investigate and explore how
existing theories inform pedagogy in the visual arts classroom or
community based art project. Readings and activities will focus
on the cultural context of students and participants in learning
situations (classroom or community) and how their specific
lived experiences influence art production and learning. This is
a lecture seminar course that will eventually inform lesson plan-
ing, lesson content, methodology, and art teaching practice. The
history of education in Trinidad and Tobago becomes a critical
module to be studied as part of this course.

PREREQUISITES: T22C
Course Description: This practicum presupposes that the Principles of pastoral Counselling have already been explored. It is therefore geared to allow the students to practice the skills which they were exposed to previously.
Assessment:
Supervised field work in a counselling situation 20%
Two verbatims 10%
Two reports on field work 10%
One 2-hour examination on skills 60%

SEMMESTER:
COURSE CODE: THEO 2205 (T22E)
(COURSE TITLE: GENERAL PRINCIPLES OF CHRISTIAN EDUCATION
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN PASTORAL STUDIES.
Course Description: The Purpose of this course is two-fold. Firstly, it seeks to aid the students in reflecting on the nature, aims, history and relevance of Catechesis, and secondly, to expose them to the various types of religious education programmes (and their rationale) existing in our region, so that they may understand their role in implementing the said programmes.
Assessment:
One written assignment ca. 2,000 words 50%
Two projects:
1. Preparing lesson Plan for Confirmation Students 25%
2. Preparation of programme for specific age group in rural area 25%

SEMMESTER:
COURSE CODE: THEO 2206 (T22F)
(COURSE TITLE: APPROACHES TO CHRISTIAN EDUCATION
NUMBER OF CREDITS: 3
PREREQUISITES: T22E
Course Description: This course will explore and compare different contemporary approaches to Christian Education with special emphasis on those put forward by Groome, Fowler and Whitehead.
Assessment:
One paper on one of the methods of ca. 2,000 words 25%
One 2-hour examination at the end of the semester 75%

SEMMESTER:
COURSE CODE: THEO 2207 (T22G)
(COURSE TITLE: CANON LAW: HISTORY AND PRINCIPLES
NUMBER OF CREDITS: 3
PREREQUISITES: NONE
Course Description: An historical overview of Canon Law. The format of the 1983 Code of Canon Law. Study of selected Canons from Books 1, 2 and 4 of the 1983 Code.
Assessment:
One written assignment of ca. 2,000 words 50%
One 1-hour examination at the end of the semester 50%

SEMMESTER:
COURSE CODE: THEO 2208 (T22H)
(COURSE TITLE: CANON LAW: THE SACRAMENTS
NUMBER OF CREDITS: 3
PREREQUISITES: NONE
Course Description: A study of canons related to the celebration of the Sacraments with particular emphasis on the Sacrament of marriage and on Church praxis in the event of marital breakdown.
Assessment:
One written assignment of ca. 2,500 words 50%
One 1-hour examination at the end of the semester 50%
SEMESTER: I
COURSE CODE: THEO 2210 (T22Y)
COURSE TITLE: CANNON LAW IV: THE CONSECRATED LIFE
NUMBER OF CREDITS: 2
PREREQUISITES: NONE
Course Description: Norms governing the Consecrated Life: cc. 573–746
Assessment:
One written assignment of 2,000 words 50%
One 1-hour examination at the end of semester 50%

N.B. students are required to pass both components.

SEMESTER: II
COURSE CODE: THEO 2209 (T22X)
COURSE TITLE: CANON LAW III: CHURCH GOVERNANCE
NUMBER OF CREDITS: 2
PREREQUISITES:
Course Description: Origin and History, Structure of Church Governance: Supra diocesan – cc. 330–367 and Diocesan – cc. 368–572
Assessment:
One written assignment of 2,000 words 50%
One 1-hour examination at the end of semester 50%

N.B. students are required to pass both components.

THEOLOGY COURSES
LEVEL II/III
IV. THEOLOGICAL AND ETHICAL STUDIES

SEMESTER: I
COURSE CODE: THEO 2301 (T23A)
COURSE TITLE: PERSPECTIVES IN CHRISTOLOGY
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN RELIGIOUS AND PHILOSOPHICAL STUDIES OR THEOLOGICAL AND ETHICAL STUDIES.
Course Description: This course aims at clarifying our belief in the humanity and divinity of Jesus the Christ and the nature of the relationship between the two. An examination will be made of methods, assumptions and cultural thought patterns that have influenced and continue to influence the shaping of this belief.
Assessment:
One essay of ca. 2,000 words 25%
One 2-hour examination at the end of the semester 75%

SEMESTER: II
COURSE CODE: THEO 2304 (T23D)
COURSE TITLE: THE TRINITY
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN RELIGIOUS AND PHILOSOPHICAL STUDIES OR THEOLOGICAL AND ETHICAL STUDIES.
Course Description: This course aims at examining the Christian theology of the Trinity: Father, Son and Holy Spirit - its origins, development and contemporary interpretations.
Assessment:
One paper of ca. 2,000 words 25%
One 2-hour examination at the end of the semester 75%
SEMESTER:
COURSE CODE: THEO 2306 (T23F)
(NOT OFFERED 2008/2009)
COURSE TITLE: PERSPECTIVES IN ECCLESIOLOGY
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN RELIGIOUS AND PHILOSOPHICAL STUDIES OR THEOLOGICAL AND ETHICAL STUDIES.
Course Description: This course will aim at analysis of the sociological, philosophical and theological foundations for understanding the Church. An examination will be made of some contemporary issues.
Assessment:
One paper of ca. 2,000 words 25%
One 2-hour examination at the end of the semester 75%

SEMESTER:
COURSE CODE: THEO 2310 (T23J)
(NOT OFFERED 2008/2009)
COURSE TITLE: THEOLOGY OF CREATION
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN RELIGIOUS AND PHILOSOPHICAL STUDIES OR THEOLOGICAL AND ETHICAL STUDIES.
Course Description: This course aims at reassessing the theology of Creation in the light of such contemporary issues on the ecological crisis, women's concerns. An examination will be made of the Judaeo Christian tradition, the religious reasons offered for the wanton destruction of the environment and a reappraisal of the theology of creation.
Assessment:
One paper of ca. 2,000 words 25%
One 2-hour written examination at the end of the semester 75%

SEMESTER:
COURSE CODE: THEO 2312 (T23L)
(NOT OFFERED 2008/2009)
COURSE TITLE: LIBERATION THEOLOGIES
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN THEOLOGICAL AND ETHICAL STUDIES.
Course Description: This course seeks to enable the student to make a critical analysis of liberation theology, its methodology, its reception of Marx and its epistemological break with “First World” theologies.
Assessment:
One paper of ca. 2,000 words 25%
One 2-hour examination at the end of the semester 75%

SEMESTER:
COURSE CODE: THEO 2313 (T23M)
(NOT OFFERED 2008/2009)
COURSE TITLE: THE PRINCIPLES OF CHRISTIAN ETHICS I
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN THEOLOGICAL AND ETHICAL STUDIES.
Course Description: This course will consider the sources and base points of Christian ethics as the foundation for moral discernment and decision-making.
Assessment:
One paper of ca. 1,500 words 25%
One 2-hour examination at the end of the semester 75%

SEMESTER:
COURSE CODE: THEO 2314 (T23N)
(NOT OFFERED 2008/2009)
COURSE TITLE: PRINCIPLES OF CHRISTIAN ETHICS II
NUMBER OF CREDITS: 2
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN THEOLOGICAL AND ETHICAL STUDIES.
Course Description: This course will consider some of the major issues in fundamental Christian Ethics today.
Assessment:
One research paper of ca. 2,500 words 50%
One 1-hour examination at the end of the semester 50%

SEMESTER:
COURSE CODE: THEO 2316 (T23P)
COURSE TITLE: CHRISTIAN SOCIAL ETHICS
NUMBER OF CREDITS: 2
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN THEOLOGICAL AND ETHICAL STUDIES
Course Description: This course seeks to embark upon a textual and thematic study of the Social encyclicals and other major official social documents of the Christian Churches, paying special attention to methodology, anthropology and the evolution of ideas.
Assessment:
Coursework 40%
One 2-hour examination at the end of the semester 60%

SEMESTER:
COURSE CODE: THEO 2317 (T23Q)
(NOT OFFERED 2008/2009)
COURSE TITLE: THEOLOGY AND HUMAN SEXUALITY
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN
Course Description: This course seeks to assist the student in developing an understanding of sexuality as it relates to one self and to the lives of other persons from the standpoint of faith.
Assessment:
One paper of ca. 2,000 words 25%
One 2-hour examination at the end of the semester 75%
SEMESTER:
COURSE CODE: THEO 2319 (T23S)
(Not offered 2008/2009)
COURSE TITLE: CHRISTIAN ETHICAL PRINCIPLES
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN THEOLOGICAL AND ETHICAL STUDIES. MAY NOT BE READ WITH T23M (THEO2313) OR T23N (THEO 2314) FOR CREDIT TOWARD A DEGREE.

Course Description: This course will consider the base points of Christian Ethics as the foundation for moral discernment and decision-making. The course will also include a discussion of some major issues in Fundamental Christian Ethics such as Situation Ethics, natural and positive law and conscience.

Assessment:
One paper of ca 2,000 words 25%
One 2-hour examination at the end of the semester 75%

SEMESTER:
COURSE CODE: THEO 3301 (T33A)
(Not offered 2008/2009)
COURSE TITLE: THE WOMEN’S MOVEMENT AND THEOLOGY
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN RELIGIOUS AND PHILOSOPHICAL OR THEOLOGICAL AND ETHICAL STUDIES.

Course Description: This course will offer a critical appraisal of the manner in which the Women’s Movement has influenced theology. It will examine the nature of the challenge made to the traditional images and language used in speaking of God and its shaping of cultural perceptions, attitudes and values.

Assessment:
One paper of ca. 2,500 words 50%
One 2-hour examination at the end of the semester 50%

SEMESTER:
II
COURSE CODE: THEO 3304 (T33D)
COURSE TITLE: SPECIAL ETHICS
NUMBER OF CREDITS: 2
PREREQUISITES: THEO 2319 AND AT LEAST NINE OTHER CREDITS THEOLOGICAL AND ETHICAL STUDIES

Course Description: This course seeks to uncover and explore the ethical issues sur-rounding selected topics from among the following.

- Topics in bio-ethics: e.g. Genetic engineering
- Problems of the beginning and end of life: In vitro fertilisation, termination of pregnancy, prolongation of life, euthanasia, contraception and population control.
- AIDS
- The drug trade
- War and Nuclear Armaments
- The Third World and the International Order
- Capital Punishment

Assessment:
One paper of ca. 2,500 words 50%
One 1-hour examination at the end of the semester 50%

SEMESTER:
COURSE CODE: THEO 3308 (T33H)
(Not offered 2008/2009)
COURSE TITLE: ETHICS OF HUMAN SEXUALITY
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS IN THEOLOGICAL AND ETHICAL STUDIES AT LEVEL II. NOTE: CANDIDATES WHO OFFER T23Q (THEO 2317) TOWARD THEIR DEGREE MAY NOT ALSO OFFER T33H TOWARD THEIR DEGREE.

Course Description:
1. Sexuality as intimacy; sexuality as language; sexuality in Scripture; in theological development today; role of woman in contemporary society.
2. Marital sexuality; the end and purposes of marriage; the finality of marriage in contemporary theology; the question of responsible partnership and parenthood; family planning by artificial and natural means; Humanae Vitae, Gaudium et spes, and relevant statements; the formation of personal conscience.
3. Direct sterilization; indirect sterilization for medical reasons; conflict situations and epikeia.
4. Pre-marital and extra marital sexuality; homosexuality and related problems of human intimacy.
5. The indissolubility of marriage; divorce and separation; internal and external forum solutions in pastoral contexts.

Assessment:
One paper of ca. 2000 words 25%
One 2-hour examination at the end of the semester 75%

V. RELIGIOUS AND PHILOSOPHICAL STUDIES

SEMESTER:
COURSE CODE: THEO 2401 (T24A)
(NOT OFFERED 2008/2009)
COURSE TITLE: PHILOSOPHY OF RELIGION
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN RELIGIOUS AND PHILOSOPHICAL STUDIES.
Course Description: A critical approach to the Study of Religion; Method and Philosoph-ical Issues
Assessment:
One paper of ca. 2,000 words 25%
One 2-hour examination at the end of the semester 75%

SEMESTER:
COURSE CODE: THEO 2402 (T24B)
(NOT OFFERED 2008/2009)
COURSE TITLE: HERMENEUTIC PHILOSOPHY
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN PHILOSOPHY.
Course Description: A study of Hermeneutic theory from Sch-leiermacher to the present time with special emphasis on the theories of textual interpretation of Gadamer and Ricoeur.
Assessment:
One paper of ca. 2,000 words 25%
One 2-hour examination at the end of the semester 75%

SEMESTER:
COURSE CODE: THEO 2404 (T24D)

COURSE TITLE: COMPARATIVE RELIGION
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 3 CREDITS AT LEVEL I IN RELIGIOUS AND PHILOSOPHICAL STUDIES.
Assessment:
One paper of ca. 2,000 words 25%
One 2-hour examination at the end of the semester 75%

SEMESTER:
COURSE CODE: THEO 2405 (T24E)
(NOT OFFERED 2008/2009)
COURSE TITLE: STRUCTURALISM AND POST-STRUCTURALISM
NUMBER OF CREDITS: 3
PREREQUISITES: NONE
Course Description: This course will explore directions taken by contemporary Structuralist and post-structuralist thought as these pertain to Philosophy as well as to the study of language and literature.
Assessment:
Two short essays 30%
One 2-hour examination 70%

SEMESTER:
COURSE CODE: THEO 3401 (T34A)
(NOT OFFERED 2008/2009)
COURSE TITLE: TRENDS IN 20TH CENTURY PHILOSOPHY
NUMBER OF CREDITS: 3
PREREQUISITES: AT LEAST 6 CREDITS AT LEVEL I AND/OR II AND/OR III IN PHILOSOPHY.
Course Description: A study of major trends in 20th century philosophy, with particular emphasis on the contributions of Wittgenstein and Heidegger.
Assessment:
One paper of ca. 2,500 words on some aspect of Heidegger's Philosophy 50%
One paper of ca. 2,500 words on some aspect of Wittgenstein's Philosophy 50%

SEMESTER:
COURSE CODE: THEO 3402 (T34B)
(NOT OFFERED 2008/2009)
COURSE TITLE: POPULAR RELIGIOSITY IN THE CARIBBEAN
NUMBER OF CREDITS: 2
PREREQUISITES: T14A: INTRODUCTION TO THE STUDY OF RELIGION.
Course Description: This course will consider the development, function, and influence of popular religious experiences and movements in the Caribbean as well as their relationship to the established traditions.
Assessment:
One paper of ca. 2,500 words 50%
One 2-hour examination at the end of the semester 50%

Examinations: One 2-hours written paper 60% 
Coursework 40%
LEVEL: SEMESTER: COURSE CODE: MATH 3280 (M 33D) COURSE TITLE: INTRODUCTION TO MATHEMATICAL MODELLING I NUMBER OF CREDITS: 4 PREREQUISITES: MATH 2120 AND MATH 2160 Course Description: Idea of modelling real life and situations using Mathematics. Theory of ordinary differential equations (eigenvalues and eigenvectors) and the linear stability. Application to Medicine (e.g. testing of diabetics), predator-prey models (struggle for survival between two species), Epidemiology (e.g. model of spread of gonorrhoea). A theory of war. Examination: One 2-hour paper 75% Coursework 25%

LEVEL: SEMESTER: COURSE CODE: MATH 3430 (M34E) COURSE TITLE: ADVANCED ALGEBRA I (THEORY) NUMBER OF CREDITS: 4 PREREQUISITES: M20A AND M20B Course Description: Group Theory:
1. Fundamentals
2. Cyclic Groups
3. Cosets
4. Homomorphism Theorems
5. The Sylow Theorems
6. Theory of p-groups
7. Direct products of groups
8. Solvable groups
Ring Theory:
1. Ideals
2. Quotient Rings
3. Polynomial Rings
4. Euclidean Domains
5. Unique factorisation domains
6. Irreducible criteria
Field Theory:
1. Characteristics of Fields
2. Fields of Quotients, Sub-fields and Field Extensions, Splitting Fields
3. Elements of Galois Theory
Assessment: Final examination (One 2-hour paper) 85% Coursework 15%
LEVEL:

GENERAL INFORMATION
Activities of the School of Education

A. Teaching University Programmes at various levels
   • Certificate in Education
     The Art and Science of Coaching
   • Bachelor of Education
     Bachelor of Education (Primary)
     Bachelor of Education (Early Childhood Care & Education)
   • Postgraduate Diploma in Education
   • Postgraduate Diploma in Educational Technology
   • Diploma in Health Visiting
   • Master of Education Degree, M.Ed.
   • Master of Philosophy, M.Phil.
   • Doctor of Philosophy, Ph.D.

The School does not offer all the above programmes every year. Information on the offerings in any year can be obtained at the Office of the Head, School of Education. Effective 1999/2000, the Masters of Education (M.A.) will no longer be offered. Effective 2001/2002, the Masters in Education Degree, M.Ed. is being reorganised and will be offered in the year 2002/2003. Those persons already registered will be allowed to complete the Programmes.

B. Research on Education in the Caribbean
   In the past research was mainly action-based with short term potential. Today, research continues to be system supportive. New focuses within the School are now centred on a thrust towards large-scale projects aimed at dealing with pressing problems in the school system. These efforts are being conducted by research projects, working groups and individual researchers within the School.

C. Curriculum Development and Development of Educational Materials
   In this area, the School collaborates with Ministries of Education and Teachers’ Colleges. The most recent initiative is in writing materials for delivery of university courses by distance. The University has embarked on an increased distance education thrust and the School is being called upon to deliver courses in mixed modes.

D. Outreach Activities
   Staff members are engaged in a variety of professional activities which include the provision of consultancies and services to institutions and organisations in the country. The main categories of public professional services are: the organisation of workshops, conferences and seminars; membership on commissions, professional associations and examining boards; collaborative ventures with associated institutions such as teachers’ colleges; and involvement in community-based activities.

E. Links with other Universities
   The School of Education, St. Augustine, has since its inception established links with the wider community through its provision for the appointment of external examiners, the practice of staff exchanges and invitations to visiting scholars of international repute. These links have proved to be mutually beneficial and are intended to promote development in a number of areas related to education.

SUPPORT SERVICES

The Library
   The Library at the School was created in 1973. It contains a comprehensive collection of materials in the field of education, with growing emphasis on Caribbean publications. The collection numbers approximately 30,000 items consisting of books, monographs, reports, newspaper clippings, files, theses, government documents, microtexts and subject bibliographies. It subscribes to over 170 journals in education. Its services include:
   i. bibliographic searches;
   ii. photocopying;
   iii. listing of new acquisitions;
   iv. user orientation;
   v. alerting staff to new material;
   vi. book loans;
   vii. assistance in using materials, and
   viii. database searches on CD-ROM and the internet
   ix. provision of audio-visual material

The Library serves the staff of the School of Education, staff and students of the wider university community, planners and researchers of the Ministry of Education and other persons whose eligibility is stated in the rules of the Library. The Library also plays an integral part in the teaching and research programmes undertaken by the School through the acquisition and dissemination of published material.

The Multi-Media Production Centre (MPC)
   The Multi-Media Production Centre (MPC) began as a UNESCO pilot project in 1970. The centre is divided into two sections: Audio-visual and Printing. The audio-visual section is a well equipped unit geared for copy reproduction, charts, illustrations, high contrast black and white slides from technical drawings, graphic illustrations and colour slides for educational purposes. Existing studio facilities are used by staff for previewing films and micro-teaching. Staff members conduct workshops and seminars in schools as outreach activities.

The printing section produces a substantial number of useful publications for the School of Education and the University community. The range includes: books, monographs, faculty brochures and booklets, conference and workshop documents, annual reports, research and curriculum development publications, journals, posters, newsletters and it offers general printing facilities.
Caribbean Educational Research Information Service (CERIS)
CERIS is a computerized information service, which provides access to information on education in the English-speaking Caribbean. It operates five main databases: (1) CERIB, which provides references and detailed abstracts to the contents of documents available at CERIS; (2) RESPUB, which provides references and varying levels of bibliographic information to other information resources on education in the region; (3) CERBIO, which provides biographical information on researchers on Caribbean education systems; (4) CERINS, which provides information on organisations which produce educational data; and (5) CERIP, which provides details of Caribbean educational research projects in progress or recently completed. The INNODATA databank of educational innovations developed by the International Bureau of Education is also available on-line, as well as a number of other databases on CD-ROM.

Service is available in the form of on-line access to staff and students of the School of Education, as well as in the provision of reference lists, photocopies, and referral services, on demand, to all researchers, planners, policy makers, and practitioners in the field of education in the region.

Family Development and Children’s Research Centre (FDCRC)
The school was established in September 1988 with an enrolment of 50 pupils in the 3 - 5 year age group. The programme is based on the intrinsic worth of the individual and the obligation to provide optimal learning environments to bring about maximum all-round development. Cognizance is also taken of the critical importance of the first 5 years of the child’s life for later development and the necessity to provide learning experiences, which will promote all-round growth during this crucial developmental phase.

The curricular practice employed in the school is based on the learning centre concept. This approach is posited on the view that pre-schoolers learn more effectively through concrete, play-oriented activities. Consequently, the current trend to formalize instruction for this group through the study of subjects is de-emphasised.

In addition to serving as the model of an enriched environment which could maximize the development of pre-schoolers, the facility functions as a centre for conducting research, and provides laboratory conditions for practical teaching. It is also used as a venue for testing prototypes of print and non-print materials and for mounting public exhibitions of these materials and equipment.

From 1996/97 the School became the central activity in an Early Childhood Care and Education Project which was developed to pursue objectives outlined in the School’s Strategic Plan (1995-2000).

Staff/Student Liaison Committee
Students are represented on a Staff/Student Liaison Committee in the School and on the authorized Campus Body.

The Staff/Student Liaison Committee is a committee comprising staff and student members drawn from the School. The purpose of the committee is to provide a clear channel of communication between staff and students and a forum for discussion of all student related issues.

The authorized campus body, Faculty Board, is a body comprising all academic staff in the Faculty of Humanities & Education plus elected student members. The body deals with administrative matters pertaining to the Faculty of Humanities & Education and the University as a whole.

SCHOOL OF EDUCATION LIBRARY
Rules
The use of the School of Education Library will be governed by the General Regulations for the use of the Main University Library at St. Augustine, except where specifically stated below. A copy of the Main Library’s rules may be consulted in the Library, School of Education. Readers are requested to familiarize themselves with both sets of rules.

Opening hours
(During the Semester)

9. A pocket must be surrendered for each item borrowed. A reader is responsible for any book or other item for which the Library holds a loan form signed by him. This responsibility ends when the loan is officially cancelled.

10. Readers' pockets are not transferable. It is a serious offence to lend or borrow pockets or identification cards.

11. Items are normally loaned for two (2) weeks. They may be renewed for another two (2) week period, provided they have not been requested by other readers. In any event, not more than two renewals will be allowed. Borrowers are requested to examine materials thoroughly and report all damages, discrepancies and irregularities to the Library Staff on duty.

**Reserve Books**

12. Special Reserve Items may be borrowed on short loan (Overnight or three (3) days) where the Library has more than one copy.

   Single copies are available for use in the Library only (three (3) hours).

   Overnight loans start at 3.00 p.m. and must be returned by 9.00 a.m. the next morning.

13. Serials may not be borrowed from the School of Education Library, except by members of the School of Education's Academic Staff. This privilege may be extended to postgraduate students in extenuating circumstances only. Periodicals may be on loan for one (1) week.

14. Some items in the West Indian Collection will be treated as Special Reserve Items.

15. All materials loaned will be subject to recall by the Librarian at any time.

**Serials**

16. The Librarian is empowered to levy a fine upon all readers who fail to return library material within the prescribed period. The fine for late return of books will be one dollar ($1.00) per item for each day the loan is overdue. This fine will apply also to books recalled to satisfy other borrowers' requests which are not returned by a specified time. The fine for late return of books in the Reserve Collection will be two dollars ($2.00).

17. The fines levied above shall not exceed One Hundred Dollars ($100.00) dollars per item.

18. Loss or damage of library material on loan to a reader should be reported immediately. The reader must pay the current cost of replacing a lost or seriously damaged book or other items, in addition to any fine which may have incurred prior to reporting the loss or damage of the item. Replacement costs will include library processing costs up to one hundred dollars ($100.00) per item.

19. If after due notice, a fine or replacement cost of an item has not been paid, the Librarian is authorised to request the Bursar to arrange for the amount of the fine to be recovered by the University.

20. The Librarian shall have the power to waive or reduce fines in any case at his/her discretion.

21. All registered students are also entitled to use the Main Library. Registration must be done at the Circulation Desk at the Main Library, and University identification cards must be presented.
Closing
25. A bell is rung fifteen (15) minutes before closing. All transactions cease five (5) minutes before closing time.

a. The Library is provided exclusively for the purpose of academic study and research. Any conduct inconsistent with this purpose or detrimental to its pursuit by others shall constitute a breach of the rules.

b. All library users must be prepared to present current identification cards entitling them to use the Library and/or its special collections at any time when asked to do so by a member of the library or security staff.

c. Silence shall be observed in the Library.

d. No bags, briefcases, handbags, parcels or other receptacles may be brought inside the Library. They may be left on the shelves provided within the library upon immediately entering the building.

e. Bottles of ink and transistor radios should not be brought into the Library.

f. Chairs and tables and other library equipment, fittings and furniture may not be marked, defaced or disarranged. Readers should not at any time use chairs or tables on which to place their feet.

g. Neither food nor drink should be brought into the Library's service areas or consumed there.

h. Smoking is strictly forbidden throughout the Library's service areas.

i. Books, periodicals, etc. taken from the shelves and used for work in the Library should be left on the tables after use and NOT be replaced on the shelves.

j. All readers leaving the Library must show all books, periodicals, papers, etc. in their possession whether these belong to the University or not. Readers may also be required to open for inspection any receptacle carried out of the Library.

k. The use of a cellular telephone is prohibited in the Library.

l. The Librarian shall at all times have authority to maintain good order in the Library and may exclude from it or suspend from its use any reader who breaks these rules. The Librarian may report to the appropriate University authority any person responsible for serious or persistent breach of these rules; such conduct by any member of the University community shall be considered a breach of University discipline.

Theft and Mutilation
26. The wilful mutilation or defacement of library material, the illegal removal of books or other library material, the attempt to obtain library materials or gain access to library facilities by false pretences or forgery and/or the intentional misplacement of books in the Library, will be considered a major offence against the University, and any person who commits such an offence may be reported to the appropriate University authority for disciplinary action, which may include suspension or expulsion.

27. Any breach of these rules by a reader may render him liable to a fine not exceeding fifty dollars ($50.00) at the discretion of the Librarian.

28. The Librarian may institute such operating rules and procedures in addition to the above as may be deemed necessary and appropriate for better library efficiency and service.

CERTIFICATE PROGRAMMES
REGULATIONS

CERTIFICATE IN THE ART AND SCIENCE OF COACHING

Rationale
There is a need both to improve the quality and increase the quantity and range of social opportunities to develop our youth through educational and other cultural activities. Faced by the threats of modern consumer type recreational pursuits and potentially harmful practices, the health and welfare of our society seem to be at risk.

Sport and physical education must be explored for furthering the integration, movement and fostering human development. It is against this background, primarily, that the Certificate in the Art & Science of Coaching was developed.

The certificate programme is available to those who may not possess the normal university requirements. They may also be taken by other applicants who do not wish to attempt a Degree in Education programme offered by the School of Education, but who are interested in acquiring expertise in an approved area that meets specific needs. The programme is part-time and is intended to take a generic perspective that will draw on and make the skills applicable to all coachable athletic-type sporting disciplines.

Target Groups
The programme is geared towards the upgrading of knowledge and skills of persons, locally and regionally, who are interested or already engaged in coaching at the following levels:

- National
- Clubs and Junior Leagues
- Schools
- Sport Officers
- Community Recreation Personnel
Entry Requirements
Applicants must have
• At least three (3) years coaching experience at Club, School or Community level or attached to an organization as a Sports Officer
• Reached a standard of literacy equivalent to Form Five or equivalent standing

Certificate Requirements
The entire programme consists of nine (9) modules. Each module will be three (3) credits for a total of twenty-seven (27) credits.

Aims of the Programme:
The programme is designed to help coaches:
• Develop their understanding and skills generally and in specific sporting disciplines;
• Impart these understandings and skills to athletes in sporting disciplines;
• Raise the standards of performance of athletes and
• Share with others the philosophy of well-being through sport

The Structure of the Programme:
Session I (13 weeks)
September – December
EDSP4001 (SP40A) Human Anatomy & Physiology of Exercise
EDSP4101 (SP41A) Diet & Performance
EDSP4302 (SP43B) Theory & Practice of Coaching

Session II (13 weeks)
January – May
EDSP4201 (SP42A) Issues & Values in Sport & Physical Education
EDSP4102 (SP41B) Sports Officiating
EDSP4202 (SP42B) Sport Injuries: Prevention & Treatment

Session III (13 weeks)
May – August
EDSP4002 (SP40B) Measurement & Evaluation in Sport & Physical Education
EDSP4401 (SP44A) Observation & Analysis of Human Performance
EDSP4502 (SP45B) Practicum: Working with Athletes

Scheme of Examinations
1. The Certificate in the Art & Science of Coaching will be awarded to candidates who:
   a. have achieved a satisfactory standard in the theoretical aspects of the programme; and
   b. i. have performed satisfactorily in the practice of coaching and/or
     ii. have submitted satisfactory studies where these are required

2. The Certificate may be awarded with a mark of Distinction

3. A candidate may be referred in at most two of the theoretical and practical components of the programme, but a candidate failing to reach a satisfactory standard in both components would be listed as having failed

4. A candidate who has been referred may apply for re-examination on not more than two subsequent attempts within five years of first sitting the examination

Theory
A student's knowledge of the theoretical aspects of the study of sport & physical education and its implications shall be assessed on the basis of written essays, assignments and/or examinations as specified for individual courses.

1. To obtain a pass mark, a student must gain a grade of at least 'D' in each of the requirements
2. The grade for any piece of required written work shall be arrived at in the first place by consensus between two examiners or, in cases where consensus between examiners or, in cases where consensus cannot be arrived at, by finding the median of the grades recommended by the examiners
3. A required written submission shall be assessed in accordance with the guidelines set out in the student handbook
4. Where written requirement submitted by a student is awarded a 'E', it shall be returned to the student for improvement. Such a submission may be resubmitted by a set date and if it is then satisfactory the student will be credited with a grade 'D'.
5. A candidate who has been referred in a written requirement shall be re-examined and passes, he shall be allowed to graduate in November or December of the Semester I following his referral.
6. If a referred candidate is re-examined after that time, he shall be deemed to have failed in the year of his/her referral.
7. A candidate failing to submit a paper by the due date shall be deemed to have failed unless the Board of Examiners approve a late submission or resubmission after August 31 would not permit the candidate to be re-examined until normal examination date in the next academic year.
8. Any required written submission with unsatisfactory features of presentation e.g., with respect to its title page, preface or abstract, acknowledgements, table of contents, figures and illustrations, references, bibliography, appendices, shall be returned to the student for correction, regardless of the agreed grade recommended for it, and will not be finally accepted until those features are satisfactorily amended.
9. All recommended grades by readers or assessors shall be subject to confirmation in the first place by the Campus Board of Examiners and finally by the Faculty Moderators and Faculty Board of Examiners.
10. Regulations on failure are contained in the Faculty Brochure. Students are instructed to consult these.

Practice
A student's competence in the area of specialisation shall be assessed on the basis of continuous assessment.
1. To obtain a pass a student must gain a grade of at least 'D' in the overall assessment.
2. A grade shall be arrived at in the first, by consensus between two or more examiners who have observed the student either together or separately on more than one occasion.
3. Assessment shall be in accordance with the criteria set out in the guidelines of the Student Handbook.
4. In cases where no consensus between examiners can be reached and where the examiners recommended grades are contiguous, the grade shall be recommended by the tutor.
5. It will be permissible for two examiners who cannot reach consensus to invite a third observer, whether an examiner or not, to assist them in arriving at a decision of the St. Augustine Campus Committee of the Board of Examiners.
6. In cases where no consensus can be reached, and where the examiners recommended grades are not contiguous, a grade shall be arrived at by a decision of the St. Augustine Campus Committee of the Board of Examiners.
7. In any consideration of the award of grades the Board of Examiners shall give most weight to the tutor's special expertise, length of contact with and knowledge of the candidate, but the Board shall make the final decision of grades at its own discretion.
8. All grades are subject to the final confirmation by the Faculty Moderators and the Faculty Board of Examiners.

Re-Registration
Students who have been referred to complete the requirement for the award of the Certificate may apply for re-examination on not more than two occasions within a five year period from the year of the first examination.

A person applying for re-examination will be required to re-register as a student of The University Academic Year. All applicants for re-examination must be addressed and sent to:

The Head
Faculty of Education
The University of the West Indies
St. Augustine

For the award of the Certificate every component of the examination must be of sufficient quality to be graded at D, at least. Other general procedures for certificate programmes are:

1. The recommended grade for each piece of written work shall be arrived at in the first place by consensus between two examiners; where consensus cannot be achieved, the final recommended grade shall be arrived at either:
   (a) by finding the median between the two grades or
   (b) by the intervention of a third examiner.
2. All recommended grades in written assignments are subject to confirmation by the Second Examiner and Faculty Board of Examiners.
3. The recommended grade for the Practicum shall be arrived at in the first place by consensus among two or more examiners who have observed the candidate's practice, who have studied the relevant documentation, and who will be guided by the experience of the tutor.
4. The recommended grade for the Practicum is subject to confirmation by the Faculty Board of Examiners.
5. All pass lists are subject to confirmation by Senate.
6. Any required written submission with unsatisfactory features of presentation (e.g., its title page, abstract or preface, acknowledgements, table of contents, figures and illustrations, references, bibliography, appendices and language) shall be returned to the candidate for correction regardless of the agreed grade recommended for it, and will not be finally accepted until those features are satisfactorily amended.
7. A written requirement which merits a grade of 'E' may be returned for improvement. If the candidate resubmits by a given date, within the same academic year, it shall be awarded the minimum passing grade if it is deemed to be satisfactory, and the candidate will be permitted to graduate in the first graduation following.
8 A written requirement which merits a grade of F cannot be re-examined in the same academic year, and the student will be required to re-register and to under-take a new topic.

9 In the event of unusual and extenuating circumstances, a candidate may apply for extension of time for submission of an assignment, addressing the application to the Coordinator of the relevant programme and supplying supporting evidence; medical certificates must be validated by the University Medical Officer.

10 In no other circumstances will a late assignment be accepted. The candidate must re-register according to the University regulations and be provided with a due date in the year of re-registration.

11 A candidate referred or failed in the Practicum is required to re-register under the Regulations.

12 Subject to the above, any candidate who presents himself or herself for re-examination, and is deemed to have achieved a satisfactory standard, will be awarded the minimum passing grade on the components which have been re-examined.

13 Applications for re-registration should be made by the beginning of October, and should be addressed to the The Director, Department of Sports and Physical Education, The University of the West Indies, St. Augustine.

Assessment by Coursework
Except where otherwise stated, assessment in the Certificate programme is by course work and examination. The practicum consists of 60% Coursework, examination 40%. This facilitates, not only a valid assessment of the professional development of the candidate, but also formative feed-back and individualised tuition. The programmes all have an integrative approach to teaching and learning. Emphases are on the transfer of knowledge, skills and attitudes to the complex situations in local classrooms and on an analysis of current trends in educational thinking. Accordingly, the assessment procedures require candidates to adopt critical and problem-solving approaches. Graduates of the programmes are expected to be familiar with educational literature and to be able to engage in writing of an acceptable scholarly standard, as well as to have demonstrated their ability to translate theory into the practice of their profession.

Leave of Absence
1. Students must apply in writing for leave of absence.

2. Leave of absence may be for one or two semesters

3. Applications for leave of absence must be admitted no later than the third week of the semester through the Faculty Dean (or Head of Department).
CERTIFICATE IN THE ART AND SCIENCE OF COACHING
COURSE DESCRIPTIONS

SESSION I: SEPTEMBER - DECEMBER
COURSE CODE: EDSP4001 (SP40A)
COURSE TITLE: HUMAN ANATOMY & PHYSIOLOGY OF EXERCISE
NUMBER OF CREDITS: 3
PREREQUISITES:
EDSP 4001 (SP 40A) – HUMAN ANATOMY & PHYSIOLOGY OF EXERCISE (3 CREDITS)

Rationale
It is essential that coaching personnel, in any form of athletics and games needing the use of the body, should be more than merely acquainted with the human body and the relationship of its parts to the total working of the healthy person. This knowledge is critical for healthy living and even, more so, for rigorous work and play. Students, thus, must be knowledgeable about the range and types of movement that the skeleton-muscular system can make, in order to train/educate the body, without subjecting it to unnecessary distress or injury.

Objectives
Students will:
1. Know the parts of the human body
2. Understand the functions of the body parts and how they are interdependent
3. Relate the understanding of the functions of the body parts to the physical movements required in games
4. Learn how to impart the understandings related to the care of the body
5. Describe the different types of articulation joints in the human body
6. Identify and demonstrate understanding of the position, function and methods of action of the major human muscles
7. Understand the structure and function of the nerves

Content
- The following topics will be covered:
  - Structure of the human skeleton
  - Identification of bone classification
  - Joint articulation
  - Position and function of major skeletal muscles
  - Kinesiological analysis of a sporting movement
  - to enable the student to demonstrate an ability to
  - isolate the component phase of a movement

Procedures
Lectures, group work, laboratory demonstrations, field demonstrations, etc.

Assessment
A kinesiological analysis project 40%
An objective test 60%

COURSE CODE: EDSP4101 (SP41A)
COURSE TITLE: DIET AND PERFORMANCE
NUMBER OF CREDITS: 3
PREREQUISITES:
EDSP 4101 (SP41A) – DIET & PERFORMANCE (3 CREDITS)

Rationale
A continuous supply of energy is vital for sports performance. Coaches need to understand the impact that diet has on performance in both training and competition. It is essential, therefore, that they understand the relationship between nutrient intake and storage, energy metabolism and exercise performance.

Objectives
Students will:
1. Know the major food groups
2. Understand the contribution of each food group to the maintenance and promotion of strength, growth and stamina
3. Understand how to balance and vary diets to achieve different purposes
4. Know the basic principles of food choices and preparation for the purposes of physical education and sporting activities
5. Construct nutritionally sound dietary strategies in order to optimise sports performance and modify body composition
6. Analyse sport performers’ diets in order to make recommendations to meet the demands of their sport.

Content
The following topics will be covered:
- The basic principles of human nutrition with emphasis on weight control, muscle development and stamina
- Dietary requirements for athletes
- Fat carbohydrate and protein as fuel for muscular activity
- Carbohydrate loading and race feeding as aids to endurance performance

Procedures
Lectures, group work, laboratory demonstrations, field demonstrations, etc.

Assessment
Coursework 40%
A written Examination 60%

Analysis of an athlete’s dietary habits making recommendations to modify their eating habits as appropriate.
SESSION I
COURSE CODE: EDSP4302 (SP43B)
COURSE TITLE: THEORY AND PRACTICE OF COACHING
NUMBER OF CREDITS: 3
PREREQUISITES:
EDSP 4302 (SP43B) - THEORY & PRACTICE OF COACHING (3 CREDITS)
Rationale
This course will provide coaches with an introduction to the range of concepts, theories and methods employed to understand the learning and performance of psychomotor skills in sport. It will also assist coaches in recognising that coaching in all sports goes beyond the technical requirements or rudimentary skills of the game. During this course students will have the opportunity to apply this knowledge within the practical context of their choice. Options may be chosen from team sports, aquatics or individual sports
Objectives
Students will:
- Understand skill learning and performance
- Use theory and research in motor learning to identify and solve problems encountered in the learning and coaching of motor skills
- Identify individual differences which affect performance
- Identify some of the psychological factors underlying sport performance
- Apply theory to practice
- Critically evaluate the use of social psychology in coaching and learning situations
Content
The following topics will be covered:
Factors relevant to the sporting contest, namely, sensation and perception, reaction time and anticipation, cognitive processing and decision making
Lecturers will also examine skill development and ability, pre-instructional factors, instruction, practice, feedback, learning and memory
Examination will also be made of the individual differences that affect performance (personality, age, gender, etc)
Factors influencing motivation
The impact of stress and anxiety on performance
The importance of goal setting
Group processes and how they affect the performance of the individual and the team
Procedures
Lecturers, laboratory practicals/experiments, seminars, field demonstrations
Assessment
Written Report 50%
Written examination 50%

SESSION II: JANUARY – MAY
COURSE CODE: EDSP4102 (SP41B)
COURSE TITLE: SPORTS OFFICIATING
NUMBER OF CREDITS: 3
PREREQUISITES:
EDSP 4102 (SP41B) - SPORTS OFFICIATING (3 CREDITS)
Rationale
Match controllers are an essential part of any sport competition. It is they who are responsible for ensuring fair play and interpreting and applying the rules of play and controlling participants’ behaviour. It is important that coaches understand the demands and consequences of officiating.
Objectives
Students will:
1. Understand the need for well trained and physically fit officials
2. Understand the role of the official
3. Understand the importance of communication decisions
4. Understand the basic laws of the major games/activities
5. Discuss the psychological skills that aid official to reach their full potential
6. Analyse the performance of officials
7. Develop a code of conduct for officials
Content
The following topics will be covered:
- The role of the official
- Fitness and mental training for officials
- Specific psychological skills as they pertain to officiating
- Relaxation, concentration, imagery, confidence, communication and goal setting
- Basic laws of the major sporting games/activities
Procedures
Lectures, group work, laboratory and field observations
Assessment
A practical Officiating assessment 40%
Exam 60%
SESSION II
COURSE CODE: EDSP 4201 (SP42A)
COURSE TITLE: ISSUES AND VALUES IN SPORT AND PHYSICAL EDUCATION
NUMBER OF CREDITS: 3
PREREQUISITES:
EDSP 4201 (SP42A) - ISSUES & VALUES IN SPORT & PHYSICAL EDUCATION (3 CREDITS)

Rationale
Coaches do not operate in a sporting vacuum. It is important, therefore, that they understand the social cultural, political, religious and economic contexts within which they will work. It is essential that they understand what sport is and what it means to its participants. Sports must be examined in a multidisciplinary was to illustrate the complex issues of modern day sport.

Objectives
Students will:
1. Critically examine the meanings of sport
2. Understand the holistic context of sport and coaching
3. Examine value judgments and subjective views on sport
4. Examine the ethics and values of sport
5. Relate ideas, values, themes to their specific sporting discipline

Content
The following topics will be covered:
- Ethical issues concerning sporting behaviour
- Attitudes to winning
- Equal opportunities in sport and coaching
- Drugs and sport

Procedures
Lectures, student led seminars, group work

Assessment
Coursework 40%
Exam 60%

SESSION II
COURSE CODE: EDSP4202 (SP42B)
COURSE TITLE: SPORT INJURIES: PREVENTION AND TREATMENT
NUMBER OF CREDITS: 3
PREREQUISITES:
EDSP4202 (SP42B) - SPORT INJURIES: PREVENTION & TREATMENT (3 CREDITS)

Rationale
In sport, injury may occur. It is essential that coaches are aware of potential injurious situations so that they can help in the prevention and avoidance of injury. This can be accomplished by encouraging the use of protective equipment and appropriate mental and physical preparation before participation in sporting activity. Coaches will also need to develop the knowledge and skills necessary for the care and rehabilitation of the injured performer.

Objectives
Students will:
- Identify the prerequisites for safe practice in coaching
- Plan and structure coaching sessions so as to reduce the likelihood of injury
- Be able to render initial advice on, and give relief treatment to injuries sustained.
- Describe common sport injuries and improve awareness of relative seriousness of them
- Understand the need and function of protective equipment
- Identify levels of injury occurrence and predisposing factors

Content
The following topics will be covered:
- Predisposing factors to injuries
- Preventive measures, training, warm-up, rehabilitation and psychological preparation
- Common injuries and methods of occurrence to head, arm, trunk, leg and foot
- Protective equipment and purpose
- Treatment methods - heat, cold, taping, rest, relaxation, movement therapy and physiotherapy

Procedures
Lectures, group work, laboratory and practical field demonstrations

Assessment
Course work 40%
Exam 60%
SESSION III: JULY – AUGUST  
COURSE CODE: EDSP 4002 (SP40B)  
COURSE TITLE: MEASUREMENT AND EVALUATION IN SPORTS & PHYSICAL EDUCATION  
NUMBER OF CREDITS: 3  
PREREQUISITES:  
EDSP 4002 (SP40B) - MEASUREMENT & EVALUATION IN SPORT & PHYSICAL EDUCATION (3 CREDITS)  

Rationale  
A concern for high standards of performance is as important in Physical Education and Sport as it is in other areas of education. The public nature of activities of these types allows for scrutiny by even the uninitiated. It is essential, therefore, that coaches understand training principles and evaluate participation and performance within sport & exercise. Further, the students will develop knowledge of aerobic and anaerobic energy systems as well as the concept of maximal oxygen uptake as this is vital to the understanding of factors that limit performance.  

Objectives  
Students will:  
1. Know the standards by which fitness and performance are measured  
2. Know that standards of fitness/performance will vary with age  
3. Identify components of physical fitness  
4. Understand how the body responds to training  
5. Develop a clear understanding of the major physical limitations to human performance in exercise and sport  
6. Develop the concept of fatigue and endurance in a practical context  
7. Construct, monitor and evaluate a physical conditioning programme  
8. Apply skills and understanding of measurement and evaluation to sporting disciplines and Physical Education  

Content  
Topics will include:  
• Assessment and training  
• Fitness prescription  
• Strength, power and endurance  
• The cardio-respiratory system and musculoskeletal systems  
• Anaerobic metabolism  
• The oxygen pathway  

Assessment  
Design & evaluation of physical conditioning programme  
Examination
SESSION III
COURSE CODE: EDSP 4502 (SP45B)
COURSE TITLE: PRACTICUM: WORKING WITH ATHLETES
NUMBER OF CREDITS: 3

PREREQUISITES: EDSP 4502 (SP45B) PRACTICUM: WORKING WITH ATHLETES

Rationale
This course draws upon the previous coaching experiences of the student as a basis for further work in a specific coaching environment. Students will be brought into contact with a wide range of athletes in terms of ability, personality, motivation and other relevant social and emotional factors.

Coaches will be given practical opportunities to apply the knowledge and skills acquired from earlier courses, and in so doing, develop an appreciation of the importance of employing a variety of coaching styles and strategies for effective learning and successful performance.

Objectives
Students will:
1. Understand the basic skills and principles of the activity/game
2. Apply their understandings in coaching the skills of the activities/game
3. Organise and manage the coaching situation safely
4. Manage the coaching session and maintain records of athlete's activities and performance
5. Identify the need of performers
6. Employ a range of coaching strategies appropriate to the age and ability of the performers
7. Present coaching content in clear language and in a stimulating manner
8. Produce coherent coaching plans ensuring content and progression within the activity content
9. Reflect and evaluate the effectiveness of their planning and coaching
10. Submit a coaching log which demonstrates evidence of
11. Use appropriate language and technology
12. Participate in careful and sustained observation
13. Maintain positive relationships with athletes and coaches

Content
Within their specific coaching context, students will focus on the following:
- The coaching environment (how it is organised and managed)
- Athlete observation (student will analyse how athletes cope with tasks set, the levels of motivation and cooperation)
- Patterns of communication (students will focus on communication patterns both formal and informal. The range of question and answer techniques and skills will be analysed. A review of the use of availability technology in the coaching session)
- Micro coaching sessions

Procedures
Lectures, group work, laboratory demonstrations, practical field demonstrations. Opportunities for observation, small and whole group coaching and self and peer evaluation would also be created. Students will also be created. Students will also be attached to a senior coach in the field for a portion of the semester.

Assessment
Peer review exercise 20%
Plan, deliver and evaluate a coaching session 20%
A coaching log: including information about the coaching environment, athletes performance and motivation and patterns of communication. Details should also be included of planning, preparation and evaluation of coaching.

DIPLOMA IN HEALTH VISITING

Health Visiting education is a planned goal-directed activity determined by the needs of clients, society and learners. It is built on the foundation of basic nursing and midwifery education. The health visiting student brings to the learning environment a range of personal and professional knowledge, skills, attitudes and experiences. The health visiting education programme builds on these attributes by preparing the student to deliver specialised health care to the client utilising principles of research, epidemiology, teaching, management, growth and development, and counseling. Learning is enhanced in an environment which facilitates critical thinking with the School of Education guiding the educational process. Evaluation is ongoing in the health visiting education programme.

Objectives
1. Synthesize knowledge of sciences for the development of innovative health care plans and programmes
2. Examine critically, issues which affect health and health care of individuals, families and communities
3. Strengthen interpersonal, problem-solving, interviewing, counseling, research, management and teaching skills to enhance health promotion and maintenance activities.
4. Conduct health needs assessment of individuals, families and communities.
5. Utilise the epidemiological approach to determine and monitor the health status of the individual, family and community.
6. Utilise the research process for the development of the practice of health visiting.
7. Exercise critical thinking and professional judgment in decision-making.
8. Collaborate with members of the multidisciplinary team and the client in health promotion and health care activities.
9. Use the problem-solving approach to manage client care and health visiting practice.
10. Maintain ethical, moral and legal obligations inherent in health visiting practice.
11. Demonstrate competence in health visiting practice.
12. Demonstrate leadership capabilities in mobilizing resources to advance the practice of health visiting and achieve health gains.

BACHELOR OF EDUCATION REGULATIONS

The Bachelor of Education degree is a professional degree, which is normally intended for practitioners in the field of education. Its main thrust is towards the holistic development of reflexive professionals who are sensitive to the need to combine caring and advocacy with school and classroom management skills, leadership, and information communication technology.

Candidates may pursue a major in either of two (2) options: Early Childhood Care and Education (ECCE) OR Primary Education. Areas of specialisation within the Primary option are: Educational Administration, Language Arts, Mathematics, Science, Social Studies.

The major will be comprised of a compulsory core and professional and content courses as follows:

BEd Early Childhood Care and Education
1. Compulsory Core 51 credits
2. Professional & Content Courses 42 credits

BEd Primary (Educational Administration)
1. Compulsory Core 60 credits
2. Professional & Content Courses 33 credits

BEd Primary (Language Arts)
1. Compulsory Core 60 credits
2. Professional & Content Courses 30 credits

BEd Primary (Mathematics)
1. Compulsory Core 60 credits
2. Professional & Content Courses 31 credits

BEd Primary (Science)
1. Compulsory Core 60 credits
2. Professional & Content Courses 33 credits

BEd Primary (Social Studies)
1. Compulsory Core 60 credits
2. Professional & Content Courses 30 credits

The Bachelor of Education degree in the selected major (and in the case of the Primary option, with the area of specialisation) will be awarded to persons who have satisfactorily completed the programme of study as prescribed above.

Qualifications for Admission
To be eligible for admission to this programme, an applicant must:
1. have satisfied the matriculation requirements of the university;
2. have successfully completed an approved programme of training for certification as a teacher in his/her country;
3. possess a level of professional experience as a teacher that is deemed satisfactory by the School of Education;
4. possess any other qualification which the School may require from time to time.
Successful candidates to the B.Ed. programme who possess a UWI School of Education Certificate in one of the following: Early Childhood Education, Educational Administration, The Teaching of Language Arts, Mathematics, Science, or Social Studies, or who hold an equivalent Certificate or Associate Degree from an approved institution will experience transitional adjustments. These may include course exemptions (See below) and/or arrangements to complete outstanding others as the School of Education may deem necessary.

Scheme of Examination
1. For the award of the degree, candidates must satisfy the examiners by completing for the chosen option and area of specialisation, the requirements of:
   1) The compulsory core and
   2) The compulsory professional and content courses indicated for a major.

Length of Programme
Non-Grade Point Average (Non G.P.A.) Students
THE FULL-TIME PROGRAMME
1. A full-time student shall complete the degree programme in not less than six (6) and not more than twelve (12) semesters.

2. A full-time student should normally register for not more than fifteen (15) and not less than twelve (12) credits per semester, except in the case of the final two semesters of the degree programme in which a student may seek permission to register for a maximum of forty-two (42) credits (including the Level III University course and not a substitute) to complete the degree.

3. A student will be required to withdraw from the School of Education unless he or she has gained at least –
   12 credits by the end of the second semester
   24 credits by the end of the fourth semester
   39 credits by the end of the sixth semester
   57 credits by the end of the eighth semester
   75 credits by the end of the tenth semester
   90 credits by the end of the twelfth semester

4. For purposes of these Regulations, the semester referred to includes any summer session immediately following it.

Part-time Programme
1. A part-time student shall complete the degree in not less than eight and not more than eighteen semesters.

2. Normally, a part-time student will be required to spread the Level I programme over four (4) semesters. At least one (1) Level I Foundation Course must be done in the first semester.

3. A part-time student will not normally be permitted to register for Level II courses unless he or she has gained at least eighteen (18) Level I credits.

4. A part-time student who has gained eighteen (18) or more Level I credits must take at least twelve (12) and normally not more than eighteen (18) credits in each subsequent year, except with the special permission of the Dean. However, a student who requires fewer than twelve (12) credits to complete requirements for the degree need take only those credits.

5. A part-time student will be required to withdraw from the Faculty unless he or she has gained at least:
   - 6 credits by the end of the second semester
   - 12 credits by the end of the fourth semester
   - 21 credits by the end of the sixth semester
   - 30 credits by the end of the eighth semester
   - 42 credits by the end of the tenth semester
   - 54 credits by the end of the twelfth semester
   - 66 credits by the end of the fourteenth semester
   - 78 credits by the end of the sixteenth semester
   - 90 credits by the end of the eighteenth semester.

6. For purposes of these Regulations, the semester referred to includes any summer session immediately following it.

Grade Point Average (G.P.A.) Students – Full-Time
& Part-Time Students
1. A student whose G.P.A. for a given semester is less than or equal to 0.75 shall be deemed to performing unsatisfactorily, and shall be placed on warning. A student on warning whose G.P.A. for the succeeding semester is less than 0.75 will be required to withdraw.

2. A student on warning shall be counseled by the Dean or a designated Faculty advisor. Such a student may be permitted by Academic Board on the recommendation of Faculty Board to carry a reduced course load.

Award of Degrees
Notification of Results
1. The award of the degree of Bachelor of Education shall be published in a separate Pass List for each option and each subject area of specialisation in which the names of the successful candidates shall be arranged alphabetically as follows:
   A. First Class Honours
   B. Second Class Honours
      i. Upper Division
      ii. Lower Division
   C. Pass

Award of Honours
1. Criteria for Computation

Non-Grade Point Average (Non G.P.A.) Students
   i. The class of degree to be awarded shall be determined on the basis of performance on courses taken at Levels II and III only.
   ii. All prescribed Level III (30 credits) courses shall count towards the award of class. For this purpose, courses with Level II or Level III designation, taken outside the School of Education shall be accepted.
iii. The best eighteen (18) credits from Level II courses shall also count towards the award of class, provided that not more than 9 credits are contributed by Foundations of Education courses; and provided that courses taken outside the School of Education, as well as Professional Specialisation courses also form part of the 18 Level II credits to be used in computation of award.

iv. Foundation of Education courses and Professional Specialisation courses shall not be accepted as substitutes for prescribed courses to be taken outside the School of Education.

v. Courses taken outside of the School of Education shall relate to the area of Professional Specialisation.

vi. The award of Honours shall be assessed on the student's performance in the best forty-eight (48) credits gained from Level II and Level III courses, provided that credits at Level I courses taken in lieu of credits at Level II shall not count for Honours.

vii. To be eligible for Honours a student must have obtained at first attempt at least forty-eight (48) of the fifty-four (54) Level II and Level III credits from which Honours are derived.

(a) Such a student must not have failed more than two semester courses done for Level II and Level III credit, excluding the Level II Foundation Courses.

(b) A course taken for credit and failed not more than twice shall be counted as one failure for the purpose of assessing Honours.

(c) A course taken in substitution for a course that has already been failed twice, and failed, shall be counted as an additional failure for the purpose of assessing Honours.

(d) Where a course which has been failed once is replaced by another course which is also failed all subsequent failures in that or any other course shall count as additional for the purpose of assessing Honours.

(e) A course designated at registration as not for credit (NFC) shall not count for the purpose of assessing Honours.

Grade Point Average (G.P.A.) Students

i. Honours shall be awarded taking into account all the courses designated Level II and III.

2. Class of Degree

i. To obtain First Class Honours, the candidate must achieve a Grade Point Average (G.P.A.) of 3.60 and above.

ii. To obtain Second Class Honours, (Upper Division), the candidate must achieve a Grade Point Average (G.P.A.) of 3.00 – 3.59.

iii. To obtain Second Class Honours, (Lower Division), the candidate must achieve a Grade Point Average (G.P.A.) of 2.00 – 2.99.

iv. To obtain a Pass, the candidate must achieve a Grade Point Average (G.P.A.) of 1.00 - 1.99.

3. Eligibility for Honours

To be eligible for Honours, a student must have obtained at first attempt at least 48 of the 60 Level II and Level III credits from which honours are derived.

i. Such a student must not have failed more than two Level II or Level III courses.

ii. A course taken for credit and failed not more than twice shall be counted as one failure for the purpose of assessing honours.

iii. Failure in a course taken in substitution for a course which has already been failed, shall be counted as an additional failure for the purpose of assessing honours.

iv. Where a course which has been failed once is replaced by another course which is also failed, all subsequent failures in that or any other course shall count as additional failures for the purpose of assessing honours.

v. A course designated at registration as not for credit (NFC) shall not count for the purpose of assessing honours.

Aegrotat Degrees
1. A candidate who has obtained at least three-quarters of the credits required for a Bachelor's Degree but has been unable through illness to complete the programme may apply under the University Regulations for the award of an Aegrotat Degree.

2. An Aegrotat Degree will not be awarded unless the Board of Examiners considers that, in the courses which have been completed, the candidate has reached a standard which, if also reached in the remainder of the programme, would have qualified the candidate for the award of a Degree.

3. An Aegrotat Degree will be awarded without class.

4. Holders of an Aegrotat Degree are not permitted to re-enter for the same Degree programme but may proceed to a second or higher degree on complying with the Regulations for such Degree.

Withdrawal
i. A candidate may be allowed to withdraw from the programme at any time before it is completed if the Board of Examiners is satisfied that for reasons of health or other circumstances he/she is genuinely unable to continue the programme profitably. Such a candidate shall not be deemed to have failed and may be asked to complete the requirements, if the circumstances are adjudged to justify this.

ii. Any candidate who withdraws from the programme without the approval of the Board of Examiners shall be deemed to have failed.

iii. A candidate may be required to withdraw from the programme at any time if the Board of Examiners is satisfied that he/she is not applying himself/herself to fulfill the requirements of the programme. Such a candidate shall be deemed to have failed the Programme.

Cross-Faculty Courses
1. Students must choose Cross-Faculty Courses which are in line with their Professional Specialisation. Please consult your Advisor at the School of Education.

2. Final year (Level III) students cannot choose Year I Cross-Faculty Courses.

3. Students should also consult the Regulations for the Award of Class of Degree for the Bachelor of Education.

4. Cross-Faculty Courses can be chosen from those offered by the Faculties of the Humanities & Education, Natural Sciences and/or Social Sciences.

LEVEL: I
SEMESTER: I
COURSE CODE: EDFA1401 (ED14A)
COURSE TITLE: SCHOOLING, PERSONAL AND SOCIAL DEVELOPMENT
NUMBER OF CREDITS: 3
PREREQUISITES: None

Course Description: This course offers an introduction to the psychological, philosophical, and sociological foundations of human knowledge and the development of schooling. It focuses on the history of ideas, theories of cognition and learning, and their relation to the evolution of schooling, personal and social development. It seeks to achieve these objectives through examination and discussion of specific and related themes from the three foundation areas in education, and by focusing on current concerns with curriculum development in the area of Health and Family Life Education.

Objectives:
Participants will:
1. Identify and explain the issues in schooling, personal and social development through application of knowledge from the foundation areas in education;
2. Apply key principles, concepts, and theories from the psychology, philosophy, and sociology of education and Health and Family Life Education to issues of schooling, personal and social development;
3. Describe the development of schooling in the Caribbean and internationally;
4. Explain that the goals of education relate to intellectual, personal, and social outcomes;
5. Critically analyse the organisation of schooling.

Content:
The Philosophy of Education
- Schooling to sustain communication
- Talk and thought: thoughts and statements; evidence and reasons for belief; meaning and truth
- Concepts and the school's curriculum: explanations; theories, and concept acquisition
- Fallibilism: history and the truth of history
- Schooling as the organisation of disagreement

The Psychology of Education
- Child development theories (0-11 years); pre-natal influences; physical, social, and cognitive development
- Gender socialisation
- Family and the school's role in child development
- Child rearing and early school practices and their relationship to cognitive development
- Health and Family Life Education theory and practice

The Sociology of Education
- Sociological theory — perspectives on the social (functionalism, Marxism, interpretive, critical, and postmodernism)
- Historical background to schooling
- The economy, church, state, and family and the evolution of the education system

Assessment
A written assignment of no more than 2,500 words — (100%).
LEVEL: I  
SEMESTER: 
COURSE CODE: EDRS1410 (ED141)  
COURSE TITLE: SCHOOL AND CLASSROOM MANAGEMENT  
NUMBER OF CREDITS: 6  
PREREQUISITES: 

Course Description: Contemporary efforts at educational reform are focused on the school as the centre of change. Effective school and classroom management practices are therefore critical elements of educational reform strategies nowadays. This course engages participants in the examination of school improvement and other contemporary educational reform efforts and in the analysis of the school and classroom management research and practice that these reforms have spawned. Specifically, the course addresses the need for the establishment of a positive (supportive, respectful, democratic) school culture that fosters teacher competence, student motivation, security and growth, and parental and other stakeholder participation and cooperation.

How teachers establish a balance between their capacity for caring and the strong urge to establish and maintain inflexible order and control; how they think about, plan, and implement some preventive management strategies across different classroom sub-settings and tasks, will be the focus of the classroom management aspect of this course. This course seeks to ensure that teachers can conceive and implement sound school and classroom management.

Objective  
1. participants will develop good preventive management strategies that foster and support transformational relationships in the school and in the classrooms.

Content
• Education for all: success for all and school improvement  
• School effectiveness, school improvement, and the reformed vision of the school curriculum: the school as the centre of change  
• Understanding the school and classrooms as learning environments: characteristics and contradictions in school and classroom management  
• Establishing, maintaining, and improving the environment for learning:  
  • The physical environment and social interaction and security  
  • The physical environment and symbolic identification  
  • The physical environment and growth  
  • Technology as an educational issue  
• Diversity and inclusiveness:  
  • Teaching rules and routines  
  • Student cooperation in teaching and learning  
  • Preventive discipline: school and classroom imperatives  
  • Implications for pedagogy  
• Beyond preventive discipline:  
  • Inappropriate behaviour (minor, major, and chronic misbehaviours)  
  • Use of sanctions, penalties, rewards, etc.  
  • Restoring and maintaining order  
  • Working with and relating to students with serious problems  
• Managing school and classroom time:  
  • Recognizing “types” of time  
  • Relationship among time, learning and achievement  
  • Increasing learning time  
• Classroom subsystems: principles and practices:  
  • Individualized instruction  
  • Seat-work  
  • Course-work  
  • Discussions, conferences, symposia, colloquia etc.  
• Relating to stakeholders (special emphasis on parents):  
  • Parental involvement  
  • School and classroom involvement with parents  
  • Hindrances, motivators, and supports.

Assessment
1. Two (2) written assignments each  30% each  
2. a school investigation and report  40%
LEVEL: I  
SEMESTER:  
COURSE CODE: EDTL1720 (ED17T)  
COURSE TITLE: INSTRUCTIONAL DESIGN I  
NUMBER OF CREDITS: 3  
PREREQUISITES:  
Course Description: The choices and decisions a teacher makes with respect to classroom activities determine to a large extent the type of experiences students have and the quality of their learning outcomes. Teachers therefore need to be apprised of the complex range of issues that accompany decision making for any act of teaching and learning in any situation. This course on instructional design aims to develop in the teacher both an awareness and habit of searching out the complexities involved in the pre-planning, planning, implementation, and evaluation phases of instruction. Teachers would then be able to use this knowledge to create a purposeful and logical set of teaching strategies that are organized to achieve intended learning outcomes suited to the learning needs identified for any group of students.  
Objectives  
Participants will:  
1. Revisit and restate relevant learning theories;  
2. Explore the ways in which the learner and the learner’s characteristics are critical in planning for teaching and learning;  
3. Explore the ways in which the characteristics of the teacher are critical in planning for the teaching and learning process;  
4. Diagnose, identify, and prioritize students’ learning needs;  
5. Develop instructional objectives in the cognitive, affective, and psychomotor domains to meet those needs, having identified the priority learning needs of students;  
6. Select relevant content;  
7. Explore the link between students’ needs and interests and choice of teaching and learning strategies;  
8. Select appropriate and relevant teaching and learning strategies including encoding and transformational activities;  
9. Plan for organizing the physical teaching/learning space;  
10. Select and use relevant resources including small media and information communication technology;  
11. Plan for monitoring student learning;  
12. Plan for assessing student learning;  
13. Plan for evaluating the teaching/learning process.  
Content  
• Characteristics of students—nationality, community, ethnicity, socio-economic status, intelligence, language, gender, age, religion, interests, aptitude, experience, motivation—identifying the learning needs of a specific classroom group  
• Developing and writing aims and instructional objectives  
• Task analyzing content and objectives  
• Selecting teaching and learning strategies to match student needs and rationalizing suitability of selections  
• Steps in an act of learning viz. Expectancy, attention, apprehending, encoding, etc.  
• Selecting and managing resources including small media and information communication technology  
• Individualizing learning  
• Differentiating instruction  
• Assessment and evaluation practices and techniques as teaching/learning tools.

COURSE CODE: EDMA1721 (ED17U)  
COURSE TITLE: MATHEMATICS APPRECIATION (BED PRIMARY OPTION ONLY)  
NUMBER OF CREDITS: 3  
PREREQUISITES:  
Course Description: Generally, public perception of mathematics is one of a subject that requires an individual to memorize facts and become proficient at algorithms. Many therefore dread mathematics and its study. At the primary level, many teachers are known to teach mathematics as they were taught, interpret teaching as telling and, generally, to keep the content of mathematics compartmentalized. It is imperative that, as generalists, all primary school teachers experience the art, power, and beauty of mathematics. It is the goal of the course to empower primary teachers to think of themselves as communicators of mathematics by enlarging their view of mathematics and allowing them to gain a sense of the structures and connections within the discipline. Participants will gain an understanding of mathematics and is role in the development of civilization. This enriched experience of mathematics should make the subject more appealing.  
Objectives  
Participants will:  
1. Explore mathematics not as a rigid set of facts but a growing body of knowledge;  
2. Recognize that mathematics is discoverable;  
3. View mathematics as a creative human enterprise;  
4. Write about mathematics so that readers are interested and informed;  
5. Explore connections between and among mathematics topics;  
6. Improve basic mathematical skills through mathematical excursions;  
7. Use a variety of approaches and problem-solving skills to solve problems;  
8. Find logical fallacies in mathematical arguments.  
Content  
• The nature of mathematics  
• The language of mathematics  
• The fundamentals of elementary mathematics  
• Logic and problem solving in mathematics  
• Modern mathematics and mathematical culture  
• Mathematical excursions  
• Mathematical modeling

SEMMESTER: I
COURSE CODE: EDFA2401 (ED24A)
COURSE TITLE: CULTURAL DIVERSITY, CITIZENSHIP
AND SCHOOLING I
NUMBER OF CREDITS: 3
PREREQUISITES:

Course Description: The foundations of education – philosophy, psychology, and sociology – offer an integrated study of issues related to cultural diversity, citizenship, and schooling, in a two-part course, over the academic year. One major issue is that the provision of education in culturally diverse, democratic nation states continues to pose dilemmas for policymakers, school systems managers, and classroom teachers in every sphere of human knowledge. This course addresses the dilemmas posed by the continued necessity to promote equity, social justice, and effective citizenship given the existence of multiple forms of prejudice/racism, sexism, creedism, classism, ableism and ageism. It recognises the importance of the critical link between education and health in any effort to promote greater social justice through schooling.

Objectives:
Participants will:
1. Add to their knowledge of how the foundation areas can contribute to a deeper understanding of educational issues;
2. Study schooling in diverse and plural societies;
3. Develop critical perspectives through which issues of diversity, citizenship, and schooling can be examined;
4. Identify some of the major controversies and dilemmas in contemporary social life that impact on education;
5. Recognise Health and Family Life Education as an integral component in understanding the impact of diversity in schooling.

Content:
The Philosophy of Education
• Legitimacy of state schooling in a culturally diverse society
• Mutual relations of citizens; the cognitive condition and attitudes necessary for citizenship
• National culture and minority culture in state schooling

The Psychology of Education
• Theories of cognitive, language, and concept development (including gender differences)
• Learning styles and different ways of learning; theories of moral development

The Sociology of Education
• Education in the post-independence era; the nature and purposes of partnerships in education
• Dilemmas posed for collaboration and cooperation – church, state, economy at ECCE, primary, secondary, and tertiary levels
• Globalisation and education

Assessment
A written assignment of 1,500 words (30%) and a written assignment of 2,500 words. – (70%)

LEVEL: II
SEMMESTER: II
COURSE CODE: EDFA2402 (ED24B)
COURSE TITLE: CULTURAL DIVERSITY, CITIZENSHIP AND SCHOOLING II
NUMBER OF CREDITS: 3
PREREQUISITES:

Course Description: The foundations of education – philosophy, psychology, and sociology – offer an integrated study of issues related to cultural diversity, citizenship, and schooling, in a two-part course, over the academic year. One major issue is that the provision of education in culturally diverse, democratic nation states continues to pose dilemmas for policymakers, school systems managers, and classroom teachers in every sphere of human knowledge. This course addresses the dilemmas posed by the continued necessity to promote equity, social justice, and effective citizenship. It recognises the importance of the critical link between education and health in any effort to promote greater social justice through schooling.

Cultural Diversity, Citizenship and Schooling I is a prerequisite for this course, which uses the theories and general understandings offered in Part 1 as a platform for the study of specific issues related to cultural diversity, citizenship, and schooling. Some of those issues include the involvement of the church in education; schooling to accommodate the diverse needs of children; gender and ethnic relations; and the nature of the relationships of family life in the Caribbean with health and education. Health and Family Life Education (HFLE) in particular is to be studied against a backdrop of cultural diversity and citizenship issues. It thus becomes an integrated approach to the study of HFLE through the three foundation areas.

Objectives:
Participants will:
1. Debate and make presentations on issues of diversity and citizenship in schooling;
2. Describe and explain how the principles, concepts, and theories from the philosophy, sociology, and psychology of education can be applied to an analysis of issues in education;
3. Reflect on the educational implications of health and family life with respect to issues such as diversity and citizenship;
4. Critically evaluate present practices in schooling against yardsticks of equity and inclusiveness;
5. Suggest ways in which schooling may reduce prejudice in all its forms.

Content:
The Philosophy of Education
• Problems of religious education in a multi-religious society
• Organisation of religious teaching – exclusion from government schools; segregation within school; integrative comparison
• Issues of content: understanding other religions’ revelations
• Issues of appropriate attitudes to followers of other religions: condemnation, conversion, tolerance, respect

The Psychology of Education
• Ecological systems theory
• Needs of special children
• HFLE issues
The Sociology of Education
• The Caribbean Family – a sociological study
• Gender as an issue in family, health, and education
• The family, health, and schooling
• Health and Family Life Education and the curriculum

Assessment
The course will be assessed through group presentations (40%) and a written assignment of 2,500 words – (60%)

LEVEL: II
SEMESTER:
COURSE CODE: EDCU2013 (ED20M)
COURSE TITLE: INTRODUCTION TO CURRICULUM STUDIES
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description:
This course seeks to provide a conceptual framework that can be used to curriculum analysis and decision-making by exposing students to different view of the major curriculum elements and the dynamic nature of the curriculum process. It also seeks to expose students to psychological and sociological influences on the curriculum as well as how change occurs in and through the curriculum.

Assessment
One (1) major assignment worth 100% of the final grade. Students are encouraged to write their thoughts and responses to any issues that arise during the course in a journal for discussion during tutorial sessions.

Course content: outlined below
• The meaning of key terms and concepts
• Cognitive development and learning theories
• Foundational sources for curriculum
• Orientations to curriculum
• Approaches to curriculum development
• Procedures for assessing needs
• Curriculum implementation and change
• Curriculum and program evaluation

COURSE TITLE: CLASSROOM TESTING & EVALUATION - BASIC
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description:
The overall aim of this course is for students to develop an awareness of the usefulness of testing to the teacher and to develop basic skills in test construction.

Content:
Why measure and evaluate? Kinds of tests used in education. Qualities that good tests should possess; specification and classification of educational objectives; planning of an educational test – setting up a table of specifications; writing achievement test items – various types of objective and essay items; choosing appropriate item types for levels of response required; putting the items together into the final test; understanding of basic statistical concepts such as the mean, standard deviation and correlation, and their application to the analysis of test scores; writing questionnaire items, designing scales for measuring affective outcomes, practical skills; norm / group referenced and criterion referenced testing; analysis and evaluation of data from nrt and crt; designing a simple classroom research study to show how the skills developed in this course can be applied.

Assessment:

SEMESTER: II
COURSE CODE: EDFA201 (ED32A)
COURSE TITLE: THE CHALLENGE OF HUMAN DEVELOPMENT
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: The development imperatives of the Information Age require a primary focus on the changing concept of human development and its implications for schooling in postmodern societies. Human Development Theory is treated as central in this course to an understanding of the postmodern condition and education. The theory speaks to the issues of equity, productivity, empowerment and sustainability in development. This course provides some engagement with these issues through the study of the foundations of education – philosophy, psychology, and sociology. Participants will examine themes related to postmodernism and schooling in the 21st century.

Objectives:
Participants will:
1. Reflect on and evaluate postmodern analyses of contemporary social life;
2. Identify and describe how the information age requires changing emphases in education and schooling;
3. Analyse the concept of human development and compare it with past and contemporary ideas of development;
4. Critically assess reforms in education against the precepts of human development and the demands of the information age and globalisation;
5. Reflect on ways of guiding all students into being better prepared for the challenges of social life in the 21st century.

Content:
The Philosophy of Education
• Elements of conceptions of human development
• 18th century liberal theory – selections from Condorcet
• 19th century Marxist theory – from alienation to liberation
• Early 20th century – conservatism and tradition
• Late 20th century – postmodern criticism of ‘grand narratives’
The Psychology of Education
• Development of healthy self-concept and positive self-esteem in children
• Gender role development
• Emotional and affective development
• Promotion of creativity
The Sociology of Education
• Alternative theorizing about development to macro-economic thinking
• Focus on contextualities and meanings in schooling and development
• Reform from below
• The sociology of the reformed curriculum

Assessment:
The course will be assessed by a written assignment of 2,500 words – (100%).
Objectives:
Participants will:
1. Monitor student performance in order to minimize student failure;
2. Diagnose learning needs of any child or group of children at the primary level in reading, writing, and mathematics;
3. Select intervention(s) relevant to diagnosis;
4. Successfully sequence, introduce, and teach new skills and concepts, as well as provide meaningful practice and necessary remediation for previously taught skills;
5. Formally and informally assess students’ progress.

Content:
Module 1 – Reading Assessment and Intervention
- Measures of phonological and phonemic awareness, and oral fluency
- The error analysis process
- Measures of reading comprehension
- Selecting the intervention to match the learning need
- Developing and implementing interventions.

Module 2 – Writing Assessment and Intervention
- Measures of written expression
- Development, administration, and scoring of measures of written expression
- The error analysis process
- Development and implementation of instruction to introduce new skills and for necessary remediation
- The writing process
- Expository and narrative writing structures
- Handwriting: teaching/learning and corrections
- Qualitative scoring procedures for written expression

Module 3 – Mathematics Assessment and Intervention
- The nature of learning disability/difficulty in mathematics
- Diagnosing for teaching/learning in mathematics classrooms
- Adapting Mathematics instruction for students with perceptual and cognitive processing deficits
- Mathematics instruction for the gifted and talented.

SEMESTER: II
COURSE CODE: EDEC1501 (ED15A)
COURSE TITLE: EARLY EDUCATION AND EDUCATIONAL INTERVENTION
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: Building upon the course ED452, the understanding of development will be studied in the context of schools and early education. The types of cognitive and social development that are structured into classroom and learning relationships, and the dynamics which constrain this development will be explored. Discussion will focus on the role and importance of early education. Various models of early education programmes will be discussed; especially drawing upon studies and programmes developed in the Caribbean. The structure of ideal classrooms and schools will be related to the learning objectives and proposed outcomes of early education programmes. Concepts of natural education, compensation and intervention will be discussed.
Content:
Role of early schooling; cognitive and social applications; practical facilities for development; role of intervention / compensation; responsibility for education; legal implications of education.

PREREQUISITES:
Course Description: Early education centres are gathering points where much information is discussed and passed on between educators and parents. This course is designed to enhance the organisational and management skills of teachers in the classroom as well as to provide teachers with skills and resources necessary to work effectively with parents and the community. The course will seek to provide opportunities for students to choose appropriate classroom activities/strategies to foster learning; examine and analyse various schemes and approaches for management of early education; organise facilities and experiment with general managerial skills for work with children, parents and aides; and, examine resources available to teachers for parental education in Trinidad & Tobago.
Content:
Curriculum development; the role of play in early childhood development; selecting appropriate equipment and supplies; administrative skills for early childhood administrators; school organisation/school climate; and, classroom management.

COURSE CODE: EDEC02 (EDB)
COURSE TITLE: HEALTH, SAFETY AND NUTRITION OF THE YOUNG CHILD
NUMBER OF CREDITS: 
PREREQUISITES:
Course Description: Within every meeting place of young children special attention must be given to their safety and health care. Classrooms are noted for the transfer of childhood illnesses amongst pupils. Those in the charge of young children must know about normal physical development and abnormalities of the young school child. They should be in a position to identify childhood illnesses minimally when to recommend that parents seek medical attention for their children. Thus the course will focus on patterns of normal physical development and discuss illnesses and abnormalities. From this basis features of child care can be illuminated in relation to the school and home. Basic first aid sessions will be integrated into the course. Government criteria for school hygiene will be reviewed.
Content:
Accident prevention; identification of childhood illnesses; first aid (basic); care of the young child; hygiene of the young child; standards of school hygiene.

LEVEL: II
SEMESTER: II
COURSE CODE: EDEC2022 (ED20V)
COURSE TITLE: LANGUAGE AND LITERACY IN EARLY CHILDHOOD EDUCATION
NUMBER OF CREDITS: 3
PREREQUISITES: NONE
Course Description: This course will focus on the development of curricula activities for young children. The theoretical and research theories and studies will form the rationale and several approaches will be utilized. This course offers students an overview of current research and professional practices which affect young children's literacy development.

Content:
1. Components of whole language - possibilities and awareness of what constitutes a balanced Literacy Programme.
2. Vocabulary development in the literacy programme.
3. Assessment and evaluation in the literacy-centred classroom.
5. Integrating Spelling into the Reading-Writing classroom.
6. Models of Literacy Instruction.
7. Literacy development - strategies children use to become readers and writers.
8. Recording and reporting children's literacy development.
10. The use of music and drama to facilitate language development.
11. The use of computers in literacy instruction.

Assessment
1. Assignment 50%
Assignments of equal weighting are to be given in the following five areas:
a. Literacy development
b. Recording and reporting
c. The use of music and drama to facilitate language development
d. The use of computers in literacy instruction
e. Puppetry in Early Childhood classrooms.
2. Written essay 2,000 words 50%

COURSE CODE: EDEC2021 (ED20U)
COURSE TITLE: CHILDREN IN ACTION: EFFECTIVE CURRICULUM STRATEGIES FOR USE IN EARLY CHILDHOOD ENVIRONMENTS
NUMBER OF CREDITS: 3
PREREQUISITES: EDEC1504 (ED15D) CURRICULUM DEVELOPMENT CLASSROOM ORGANISATION AND PARENT EDUCATION
Course Description: Few occupations demand the level and intensity of communication as teaching. Teachers interact with groups of active children for sustained periods of time. It is therefore of critical importance that they understand their role and are provided with effective strategies to promote the overall development of young children.
Objectives:
This course extends students’ knowledge on curriculum theories and practices for children ages three to eight years. Students will explore strategies for creating exciting learning environments for young children. The adult’s role as facilitator will also be explored.
Content:
• An overview of child development principles
• The active learning approach
• An examination of the ways in which children construct knowledge
• Creating key experiences through projects, group work and other teaching strategies
• Establishing a supportive climate as a basis for positive Adult/Child interactions
• Involving families in active learning settings
• Working in teams: Adult collaboration to promote active learning
• Arranging and equipping spaces for active learners
• Materials production with a focus on creating indigenous materials
• Key experiences in early childhood development - Creative representation, language and literacy, initiative and social relations, movement, music, cognitive development
• Use of computers in Early Childhood environments.
Assessment
1. Portfolio 25%
2. Child study project 25%
3. A written assignment 50%

**COURSE TITLE: SPECIAL EDUCATION/ADVANCED STUDIES**  
**NUMBER OF CREDITS: 3**  
**PREREQUISITES: EDEC 1501 (ED15A) EARLY EDUCATION AND EDUCATIONAL INTERVENTION**

**Course Description:** This course examines the changing paradigms of early intervention and special education for young children with special needs. Inclusive models of service delivery will be explored including the teacher as facilitator and resource consultant. Models currently in use in infant programmes and home visiting programmes will be explored. This course will take an in-depth look at the special needs child in the early childhood classroom. The course will look at how early intervention influences the child’s functioning in the classroom. Discussion will focus on the role and importance of identification and recognition of children with special needs and appropriate referral, where necessary for further assessment. Students will be introduced to methods of observing and reporting the characteristics of children having special needs. Emphasis will be placed on the normalisation, integration, identification of children with special needs and the adaptation of the curriculum to meet the needs of special children. Various models of programmes will be examined, especially drawing upon studies and programmes developed in the Caribbean.

**Objectives:**

At the end of this course students will be able to:

1. Identify children who may have special needs
2. Report the behaviours and characteristics of children with special needs so as to enhance appropriate intervention
3. Adapt classroom environments, programmes, curriculum and attitudes to facilitate the learning of children with special needs
4. Utilise alternative, portfolio and informed assessment to measure the learning of children with special needs
5. Translate assessment information into classroom instruction
6. Facilitate parental involvement in their children’s education

**Content:**

The following topics will be covered:

- Identification, diagnosis and assessment
- Alternative assessment
- Curriculum development and Adaptation to the Special Needs Child
- Observation and Reporting of the Behaviour & Characteristics of Children with Special Needs
- Interpreting the Assessment Report
- Inclusive Strategies for Early Childhood Educators for Informal and Formal Settings
- Effectiveness of parental involvement and special needs children

COURSE TITLE: ADMINISTRATION AND SUPERVISION OF EARLY CHILDHOOD ENVIRONMENTS  
NUMBER OF CREDITS: 3  
PREREQUISITES: EDEC2025 (ED20B) – APPROPRIATE CURRICULUM MODELS FOR EARLY CHILDHOOD EDUCATION  
Course Description: This course will allow local and international students from a variety of professional ECCE backgrounds to explore models, methods and techniques of supervision. The focus of this course is on instructional supervision and its role in the effective management of public and private ECCE centres. The course will also allow for theory and practice and the use of experiential and participatory methods of learning through supervision and mentorship. Its focus is on the development of collegial and helping behaviours, specific supervisory techniques and skills and appropriate leadership and motivation behaviours. Students will be given opportunities to design and implement peer supervision, mentor and coaching systems for the variety of early childhood settings in their country of origin. Opportunities for exchanging ideas and discussions on supervisory styles of management will also be addressed.  
Objectives:  
• To enhance the skills of students in the area of clinical supervision  
• To aid students to use helping behaviours as strategies to motivate fellow workers and improve the quality of ECCE programmes.  
• To explore techniques of mentoring and supervision which could enhance their skill as potential teacher trainers  
• To prepare effective ECCE environments to support young learners  
Content:  
• The nature of instructional supervision  
• The instructional process - models of effective teaching  
• Clinical supervision - techniques and phases of supervision  
• Leadership behaviour in the supervisory role  
• The teacher/caregiver as facilitator  
• Conferencing and interpersonal skills  
• Organising developmentally appropriate Early Childhood Settings  
• Planning and managing Early Childhood Programmes  
• Training and mentorship of ECCE trainees  
• Training and mentorship of ECCE practitioners. Mentoring of Trainers and Parents on home visiting

PREREQUISITES: EDEC2021 (ED20U) CHILDREN IN ACTION: EFFECTIVE CURRICULUM STRATEGIES EDEC2024 (ED20X) CARING FOR INFANTS AND TODDLERS  
Course Description: This course will provide the student with an opportunity to engage in specialised scholarly fieldwork. Area of study must be related to the curriculum, the administration process or any other area which pertains to the discipline of Early Childhood Education.  
Objectives: Participants will be encouraged to:  
1. Reflect on their past experiences in ECCE and their term of internship during their practicum.  
2. Improve the environment/institutions in which these practices were undertaken.  
Procedure: Students will select an area of fieldwork in one aspect of Early Childhood Education and will undertake a practical experience in this area. Fieldwork will focus on programme planning and implementation, independent experience, evaluation and assessment and qualitative/quantitative research. Field experience may also be completed in another country. Guidelines are available from the Faculty (ECCEP at the School of Education). Participants will be responsible for:  
(i) Selecting a Field Study topic  
(ii) Locating an institution as a base for the study  
(iii) Conducting and reporting the study.  
Content: Revision of principles and techniques of Educational Research Methods with a focus on action research. Fieldwork under the supervision of a faculty member.  
Assessment: A report: the length of the report on Field Study is approximately three thousand five hundred (3,500) words. – (100%)

LEVEL: II
SEMESTER: II
COURSE CODE: EDEA1102 (ED11B)
COURSE TITLE: INTRODUCTION TO ORGANISATIONAL DEVELOPMENT (OD) OF SCHOOLS
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: In a world characterised by rapid technological changes and information obsolescence, any sustained emphasis on system maintenance without the concomitant focus on constant adaptability of organisational structures and strategies must be viewed as detrimental to organisational health.

The concept of organisational self-renewal at the macro as well as at the micro levels, therefore, is seen as a necessary survival imperative in this new millennium. The capacity for self-renewal at the school level cannot be viewed solely from the traditional top-down perspective. In-school, self-initiated interventions must be encouraged and teachers must acquire the necessary competencies and be provided with support to pursue the goal of the education system.

Teachers and administrators must be professionally prepared with the prerequisite technical, human, conceptual, and philosophical understandings to intervene with economy, efficiency, and effectiveness. The course is therefore designed to equip teachers with an understanding and appreciation of organisational development (OD) strategies. Special emphasis will be placed on intervention techniques through action research in their school.

Objectives:
Participants will:
1. Explore the dynamic nature of organisational culture and climate;
2. Investigate the essential elements of a model school using the OSN and Discrepancy models;
3. Engage in examining and creating mission and goal statements for schools;
4. Generate policy statements for the efficient operation of the various sub-sectors of schools;
5. Select appropriateness intervention strategies for initiating and sustaining school improvement.

Content:
• Introduction to organisational development
• Organisational climate and culture as they relate to school effectiveness
• The model case of an excellent school
• School diagnosing – the Organisational Systems Network (OSN) Model
• Creating the school's mission and goal statement
• Imaging the desired school culture (through identification and clarification of the school's main tasks)
• Imaging the desired school culture (through identification of the school's programmes)
• Imaging the desired school culture (through identification of the school's technologies)
• Imaging the desired school culture (through the school's methods of acquisition, management, and distribution of resources)
• Imaging the desired school culture (through identification of the school's organisational structures)
• The Discrepancy Model and Intervention Theory
• OD methodologies

Assessment
Students will be assessed on the basis of:
1. Group Assignment – which will include presentation of hard copies and oral presentations of policy documents created from Sessions 5-10. This will account for 40% of final mark.
2. Individual Assignment – which will consist of a report on a school problem of not more than 2,500 words, utilizing the Discrepancy Model and Intervention Theory. This will account for 60% of final mark.
LEVEL: II  
SEMESTER: I  
COURSE CODE: EDEA2118 (ED21R)  
COURSE TITLE: MANAGEMENT OF RESOURCES IN EDUCATIONAL ADMINISTRATION  
NUMBER OF CREDITS: 3  
PREREQUISITES:  
Course Description: Increasingly educators in modern society are faced with the reality that to be effective and efficient the delivery of education must be informed by an understanding of:  
• the impact of the external environment on schools  
• the tasks administrators must perform  
• the programmes that must be designed  
• the resources required to run programmes  
• the structures needed to manage the quality of programmes to be delivered  
• the type of climate and culture needed to promote quality education  
This course, therefore, has been designed to impart a range of skills and competencies that will enable the leadership in local and Caribbean primary schools to recognise and accept all of the imperatives identified above. More specifically, its main mission is to equip administrators to effectively and efficiently manage the buildings and equipment of their schools as well as the financial and material resources to run programmes.  
Objectives:  
Participants will:  
1. Explain the various ways in which the economic, social, political, and technical environment impacts on schools;  
2. Reflect on and evaluate their role in contributing to quality education at a time of diminishing resources;  
3. Develop skills in cost/benefit analysis, accountability, fiscal and cost-effectiveness systems;  
4. Evaluate how participatory structures of governance in schools can contribute to effective use of resources;  
5. Apply knowledge of resource allocation in optimal delivery of the curriculum.  
Content:  
• An overview of management of material and financial resources and school development planning  
• Project planning and management in schools  
• Education and financial management: an overview and historical legacy  
• An introduction to financing public education; the macro and micro perspective

LEVEL II
SEMESTER: I
COURSE CODE: EDLA2113 (ED21C)
COURSE TITLE: THE TEACHING OF LITERATURE (3 CREDITS)
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: This course is predicated on the notion that literature represents a major area of the specialised use of language. In fact, children's literature, both informative and imaginative, provides a rich and varied resource that makes possible the integration of the language arts. The course introduces teachers to a concept of children's literature that would encourage the search for meaning through shared experiences and personal response. Literature, as a vehicle for trans-cultural understanding and values clarification, will also be emphasised.
Content:
The concept of children's literature; children's literature in the context of childhood and popular culture; the various genres; reader-response theories; approaches and strategies to teaching; literature across the curriculum; integration of language and literature; reading children's literature cross-culturally; selection and evaluation; assessing cognitive and affective outcomes in literature for children.
Assessment
Course work (60%) and an in-class test (40%).

LEVEL II
SEMESTER: II
COURSE CODE: EDLA2105 (ED21E)
COURSE TITLE: LANGUAGE STRUCTURE CONTENT OF ENGLISH TEACHING
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: This course is designed to give teachers: an understanding of the language situation in the West Indies, with special reference to their individual territory; an introductory understanding of the phonology, morphology and syntax of basilectal and mesolectal forms of language; and, to develop in teachers the ability to observe contrasts between the language forms referred to above.
Content:
The socio-historical background to language in the West Indies. The contemporary language situation, basilect, mesolect, acrolect. The structure of broad Creole and the structure of standard English. Forms of pronoun, noun and verb morphology, syntactic patterns in the verb phrase, modifying phrases and clauses within sentences, lexical characteristics and contrasts, characteristics of the mesolect. The notion of “interlanguage”. Differences between mesolectal forms and inter-languages. Language variation in the individual and the community. An introduction to the phonology of creole. Creole influenced speech and standard varieties of English. Contrastive analyses, error analyses, morpho-syntactic and lexical characteristics of formality and informality in speech and writing. Characteristics of writing.
Assessment
A written assignment (40%) and a task involving the phonemic transcription of a piece of non-standard speech, a morpho-syntactic analysis of it, and a contrasting of it against the morpho-syntax of English. (60%)

SEMESTER: II  
COURSE CODE: EDLA2106 (ED21F)  
COURSE TITLE: THE LANGUAGE USE CONTENT OF TEACHING ENGLISH  
NUMBER OF CREDITS: 3  
PREREQUISITES:  
Course Description: This course introduces teachers to the fundamental significance of language use in the teaching of English by introducing them to this feature of language learning from the early functionalists like Halliday to the present day genre theorists. Students will learn to do simple analyses of discourse and genre for teaching the construction of meaning in all of the language modes. They will understand the implications of genre teaching to schema and form at one end of the spectrum and social change at the other.  
Content:  
Assessment

SEMESTER: I  
COURSE CODE: EDLA3112 (ED31D)  
COURSE TITLE: LITERATURE FOR CHILDREN  
NUMBER OF CREDITS: 3  
PREREQUISITES: EDLA210S (ED21E) -THE LANGUAGE STRUCTURE CONTENT OF ENGLISH TEACHING.  
Course Description: This course is designed to give teachers an understanding of the role of emotion, feeling and imagination in response to literature; to help teachers appreciate the use of language in literature; to determine and practice techniques and strategies for getting learners to read literature and respond appropriately to it.  
Content:  
Develop in learners the ability to read sensitively for one’s self and for others, and develop the ability to perceive the associations and connotations that exist in literary material and that link such material to the emotions, feelings and imagination; develop in teachers a knowledge of, and an acquaintance with, the range of literary materials that are appropriate for learners in different maturational levels; determine and practice techniques and strategies for - getting learners to perceive principles of composition and structure in different kinds of literary materials; and motivating learners towards the creation of literature. Consideration of, and practice in, implementing different levels of teaching including the requirements of the CXC English-B syllabus and section “D” of English-A syllabus.  
Assessment  
Two essays of equal weighting – (100%).
LEVEL: III
SEMESTER: I
COURSE CODE: EDLA3113 (ED31J)
COURSE TITLE: STRUCTURE OF CREOLE
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: Creole is the vernacular of the majority of the population of Trinidad & Tobago, and occurs as a matter of course in the speech and writing of students, especially primary schoolchildren. But because of its genesis in slavery as well as its continued co-existence with the high-prestige official language, Standard English (SE), with which it shares many features, especially vocabulary, many people see it by comparison in negative terms – e.g., as a ‘broken’ or inferior form of English – and some are unwilling to even allow that it qualifies as language. Based particularly on Creole’s occurrence in various shapes and forms in the attempted SE of primary schoolchildren, this course is designed to show teachers that Creole is a rule-governed, systematic variety of speech and to give them a scientific appreciation of its structure so that they can better appreciate the errors in attempted SE that their students make (as a basis for the development of more rational and effective intervention strategies).
Objectives: Participants will be able to:
1. Identify aspects of Creole structure that are different from SE structure.
2. Analyse aspects of Creole on different levels of language organisation (e.g., phonology, morphology, syntax) and in discoursal use.
3. Systematically represent Creole in writing, using English spelling conventions and phonemic notation.
4. Analyse aspects of Creole structure and use in the classroom (as a basis for development of more rationale teaching units and lesson plans).
Content:
- The vowel and consonant systems (including sequences of vowels, consonants, and vowels and consonants)
- Types of syllables
- Pronunciation: word and sentence accent
- Phonemic notation
- The structure of words
- Content versus grammatical morphemes
- The noun and pronoun systems (focus, e.g., on the bare noun, determiners with nouns, pluralisation, personal pronouns, demonstratives, possessives, interrogatives, reflexives)
- The verb system (focus, e.g., on the bare verb, preverbal particles, modals, negation, predication)
- Typical phrases
- Miscellaneous grammatical categories (e.g., quantitatives, intensifiers, relative pronouns, temporals, comparatives, sentence tags, prepositions)
- Miscellaneous phrases (e.g., existential, front-focussing, serial verbs, patient-subject)
Assessment
- A project on the analysis of some aspect of Creole structure and use in the classroom (60%).
- An in-class test on miscellaneous matters (40%).

LEVEL: III
SEMESTER: II
COURSE CODE: EDLA3111 (ED31K)
COURSE TITLE: PRINCIPLES, APPROACHES, AND METHODS IN TEACHING STANDARD ENGLISH IN THE CARIBBEAN
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: Standard English (SE) is both the official language and the language of education in the Anglophone Caribbean and has been taught and learned as such from the establishment of the school system in the region. But children in Trinidad & Tobago, as indeed in other English-speaking Caribbean countries, routinely speak a Creole-influenced vernacular which, though closely related to it lexically, is substantially different grammatically. This vernacular is typically a mixture of Creole, Standard English, and interlanguage forms and meanings, but with a bias towards Creole grammar. Typically, too, the children do not consciously know critical differences between SE and Creole. As they mature, they pick up more and more SE from both the local and global environment, but their routine speech continues to be dominated by Creole grammar, especially as levels of cultural self-acceptance increase. Teachers therefore find themselves in a situation where they need to know how much oral and written SE to teach their children (including what structures when), and what pedagogical principles, approaches, and methods might be most effective in the attempt to teach SE at the different levels/stages of proficiency across the curriculum.
Objectives: Participants will be able to:
1. Appreciate the nature and function of language in general and language in the Caribbean in particular.
2. Appreciate that grammatical integrity does not depend on social attitudes and aesthetics.
3. Appreciate that learning/acquisition of SE is inescapably developmental on various grounds.
4. Identify learners’ developmental systems and use a variety of approaches to analyse them.
5. Critique and develop instructional approaches and methods.
6. Formulate relevant principles of teaching/learning.
7. Develop effective teaching units on the structure and use of SE.
8. Develop effective mechanisms to evaluate and test learning.
Content:
• The nature and function of language.
• Language in the Caribbean context.
• First and second language acquisition.
• Learning a standard dialect.
• Language teaching theories and their implications for practice.
• Principles of language teaching.
• The content of the language arts curriculum.
• Curriculum resources and materials.
• Teaching comprehension, composition, and presentation of narrative, expository, and persuasive discourse through the language arts, separately and collectively.
• Principles of unit design.
• Language testing and evaluation.

Assessment
A research essay (40%) and a project (60%)

LEVEL: III
SEMESTER: II
COURSE CODE: EDLA3319 (ED335)
COURSE TITLE: REFLECTION AND TEACHER DEVELOPMENT IN LANGUAGE ARTS EDUCATION
NUMBER OF CREDITS: 3
PREREQUISITES: EDLA1180 (ED118) - DEVELOPING LITERACY ABILITY

Course Description: This course provides participants with an opportunity to reflect on their teaching experiences and continue the lifelong process of professional development. Participants will have the opportunity to examine and critically appraise perspectives on the nature of language, language education, and classroom instruction in the contexts of their own personal philosophies of language education and theories of learning. As participants frame and reframe their experiences, they should come to a deeper understanding of the social and institutional contexts that shape their practice and be empowered to make decisions that should improve practice as well as promote their own professional growth.

Objectives:
Participants will:
1. Demonstrate proficiency in the use of the reflective process to analyse and improve their own practice;
2. Compare various models of effective language and literacy instruction;
3. Discuss the problems that may arise in sustaining a reflective habit;
4. Discuss similarities and differences between issues they face and those reflections on practice reported in the literature on primary language arts education;
5. Devise and evaluate approaches to address critical issues/problems in language education and language teaching in Trinidad & Tobago.

Content:
• Perspectives on the nature of language
• Reflection as inquiry into practice
• Contemporary views on language education and the application to classroom practice
• Issues in the language arts classroom
• Models of professional development
• Maintaining a reflective stance in the language arts classroom
• The process of journal writing and use of other reflective tools
• Planning for teacher reflection

Assessment
A Teaching Portfolio 100%
The portfolio is intended to illustrate the extent to which course objectives have been achieved, and to provide evidence of students’ work as practitioners, along with self-evaluation of growth and development.

Justification for Assessment:
The nature of the course with its emphasis on the reflective process supports a portfolio assignment that captures both the processes and products of practice.

Methodology
Emphasis in this course will be on the writing process as a medium for reflection. Participants will (in addition to keeping a reflective journal) engage in electronic “journaling” with members of journal teams, using a “share, respond, re-evaluate” format. Delivery will be by interactive lectures, mini-workshops, discussions, student presentations, and peer teaching.

MATHEMATICS COURSE DESCRIPTIONS

LEVEL I

SEMESTER: I

COURSE CODE: EDMA1901 (ED19A)
COURSE TITLE: TEACHING MATHEMATICS AT THE PRIMARY LEVEL
NUMBER OF CREDITS: 3
PREREQUISITES:

Course Description: The demands of the new social and world environment require that all individuals, as a basic prerequisite for effective mathematical functioning, acquire an understanding of mathematical concepts, proficiency with skills, and a positive attitude to the subject. The foundation is laid, at the primary level, for this interaction with mathematics as a window to the world.

In this course, participants will explore the development of concepts in the elementary mathematics curriculum. They will interpret the content of the primary mathematics curriculum beyond the confines of textbooks through explorations of strategies and activities aimed at fostering quality instruction and promoting meaningful learning experiences. Concept development is traced through the primary school, providing important insights for teachers. How children learn specific concepts and what can be done to motivate and support this learning are emphasised. Innovative teaching techniques are introduced. Mathematics manipulatives and other classroom materials are presented as a means of helping students acquire a solid understanding of mathematics.

Objectives:
Participants will:
1. deepen their understanding of the content of the primary mathematics curriculum
2. explore mathematical tasks that will engage students’ interests and intellect
3. examine ways to promote the investigation and growth of mathematical ideas
4. develop competence in instructional practice
5. discuss theory and theoretical issues that impact on the delivery of the primary curriculum

Content:
- Foundations for effective instruction in primary mathematics
- Concepts and skills in primary mathematics
- Selecting and managing content and resources for mathematics instruction
- Exploring appropriate and effective teaching approaches
- Classroom assessment of mathematics learning
- Problem-solving in mathematics

Assessment
A written assignment (100%)
In-house Exam (100%)
LEVEL: I
SEMESTER: II
COURSE CODE: EDMA1902 (ED19B)
COURSE TITLE: MATHEMATICS FOR PRIMARY TEACHERS
NUMBER OF CREDITS: 3
PREREQUISITES:

Course Description: The course will develop teachers’ knowledge of the mathematics needed to teach at the primary level. Participants will examine topics in the primary mathematics curriculum to develop meaningful understanding of key concepts using a problem-solving approach. Participants will explore the diversity of mathematics and develop quantitative skills and reasoning ability in their quest to develop mathematical thinking as a requisite for exemplary mathematics performance.

Objectives:
Participants will:
1. demonstrate an understanding of the development of the topics in the primary curriculum
2. demonstrate an understanding of key concepts in the primary mathematics curriculum
3. examine and competently apply algorithms related to the above
4. be introduced to aspects of algebra and pre calculus that enhance the study of the above
5. apply concepts to real world situations through problem-solving activities
6. use calculators and technology to explore ideas in various topics.

Content:
• numeration systems
• equations and inequalities
• patterns
• systems of measurement
• area and perimeter
• volume and surface area
• describing and analysing data
• graphing data and making predictions
• sampling, predictions, and simulations
• plane figures
• symmetric figures
• polygons and tessellations
• space figures
• mappings

LEVEL: II
SEMESTER: II
COURSE CODE: EDMA2901 (ED29A)
COURSE TITLE: PROBLEM-SOLVING IN MATHEMATICS
NUMBER OF CREDITS: 3
PREREQUISITES:

Course Description: This course aims to assist students in developing mathematical problem-solving skills and in becoming independent learners. All too often emphasis in mathematics is on algorithms and their superficial application in artificial situations. Problem-solving should take the learner beyond routine textbook problems. The focus will be on mathematical reasoning. Class discussions and problem-solving sessions will help participants analyse and become aware of their mathematical power. In coming to value the experience of problem-solving, participants, as teachers, will appreciate the role of problem-solving in learning mathematics.

Objectives:
Participants will:
1. examine the nature of problems and problem-solving
2. identify the steps in problem-solving
3. explore a variety of problem-solving strategies
4. engage in problem-solving
5. review the literature on problem-solving
6. develop instruments for assessing problem-solving
7. devise activities to motivate students to solve problems

Content:
• problem posing and problem-solving
• the goals of problem-solving
• problem-solving strategies
• models of problem-solving
• language and problem-solving
• assessing problem-solving
• factors affecting problem-solving success
• using technology to enhance problem-solving
• creating resources in the mathematics classroom to promote problem-solving

Assessment

SEMESTER: II  
COURSE CODE: EDMA2902 (ED29B)  
COURSE TITLE: TEACHING MATHEMATICS TO CHILDREN WITH SPECIAL NEEDS  
NUMBER OF CREDITS: 3  
PREREQUISITES:  
Course Description: The course will challenge participants to acknowledge students’ potential as they explore the various factors that can explain students’ success or failure. In examining the factors, participants determine what strategies can be developed to lower students’ fears, promote integrated learning, and build positive self-concept. Through a study of differentiated programmes, they evaluate how instruction can be structured to meet the widely varied needs of students in the classroom.  
Objectives:  
Participants will:  
1. Translate the goals of mathematics education into curricula for students with different needs  
2. Discuss and advance strategies for helping students to become lifelong mathematics learners  
3. Evaluate resources to promote learning in mathematics by students with differing learning needs  
4. Use calculators and computers as resources to support mathematical learning  
5. Develop appropriate assessments to evaluate progress and performance.  
Content:  
• Identifying the needs of students in mathematics classrooms  
• Learning styles and mathematics performance  
• Identifying the student with learning challenges in mathematics  
• The remediation process  
• Meeting the mathematical needs of academically gifted students  
• Resources and mathematical activities to support different learners  
• Differentiated assessment strategies  
Assessment

LEVEL: III  
SEMESTER: I  
COURSE CODE: EDMA3901 (ED39A)  
COURSE TITLE: MATHEMATICS AROUND US  
NUMBER OF CREDITS: 6  
PREREQUISITES:  
Course Description: “The more teachers know and appreciate mathematics, the more easily and effectively this knowledge and appreciation can be passed on to their students.” The public at large thinks of mathematics as a sequence of basic facts and algorithms with little meaningful daily application in the world around us. This course will offer participants a view of mathematics as a lived experience. It will incorporate pedagogical innovations to build a community of learners, make students more adept problem solvers while improving mathematical thinking and communication as a requirement for substantial and well-targeted change in content and in classroom practices in elementary classrooms. The mathematics that will be discussed and discovered will require participants to be creative and innovative in recognising and interpreting sources of mathematics around them.  
Objectives:  
Participants will:  
1. Review the history of mathematics as it recounts mathematics as a lived experience  
2. Investigate the environment for sources of mathematics  
3. Explore the relationship of mathematics with other areas of study  
4. Apply mathematical models to various daily activities in society  
5. Use the calculator as a resource to support mathematical understanding  
6. Utilize technology appropriately as a student and teacher to experience mathematics.  
Content:  
• The history of mathematics  
• Myths in mathematics  
• Mathematics in the society  
• Careers in mathematics  
• Mathematics in nature  
• Making connections with mathematics and other subjects  
• Mathematical modelling  
• Mathematics and technology

SEMESTER: II
COURSE CODE: EDMA3902 (ED39B)
COURSE TITLE: TRENDS AND ISSUES IN MATHEMATICS EDUCATION
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: The general literature and research on mathematics education worldwide draw attention to issues of gender, ethnicity, teacher preparation, educational environment, and resources as foremost in contributing to students’ success, or failure, with mathematics. Additionally, in Trinidad & Tobago, there is a history of mathematics teaching that is textbook driven and chalkboard bound. This course is designed to facilitate a reflective inquiry and analytic approach to examining theory, practice, and research in mathematics education. It will provide the opportunity for discussion of current trends and issues to explore the status of mathematics in the school system.
Objectives:
Participants will:
1. Become familiar with the history of mathematics education in Trinidad & Tobago
2. Read and discuss recent literature on the teaching of mathematics
3. Discuss mathematics issues including but not limited to scope and sequence of topics, acquisition of spatial skills, gender bias, multiculturalism, and math anxiety
4. Examine the Trinidad situation and provide suggestions to meet the challenges presented
5. Review resources for teaching and assessing mathematics
Content:
• How students learn mathematics
• Gender and mathematics
• Goals of the mathematics curriculum
• The culture of mathematics classrooms
• Resources for teaching mathematics
• Student performance in mathematics
• Assessment in mathematics

LEVEL: I
SEMESTER: I
COURSE CODE: EDSC1106 (ED11F)
COURSE TITLE: BASIC CONCEPTS IN SCIENCE
NUMBER OF CREDITS: 3
PREREQUISITES:

Course Description: This course is designed to strengthen teachers' conceptual understanding of fundamental concepts in science. The aim is also to provide them with a holistic view of these concepts, and thus develop facility in making links in the content of the primary science curriculum. It should provide the knowledge base to enable teachers to make informed decisions about the selection and design of learning experiences, and provide opportunities for inquiry and the acquisition of experiential evidence.

Objectives:
Participants will:
1. Compare theories on the origin of the earth;
2. Discuss the structure of the earth and its place in the universe;
3. Relate the principles of classification to the form and function of living organisms;
4. Discuss the properties and behaviour of water and its role in the environment;
5. Describe the structure, properties, and behaviour of the atom;
6. Use the mole as a quantity of measure in chemical reactions;
7. Explain patterns and trends in the behaviour of elements in the periodic table;
8. Discuss forms of energy and their inter-conversion;
9. Collect and interpret various forms of empirical data.

COURSE TITLE: TEACHING SCIENCE – AN INTEGRATED APPROACH
NUMBER OF CREDITS: 3
PREREQUISITES:

Course Description: The distinctive characteristics of science have implications for the way in which it is to be taught. Teachers need to explore the complex issues of this component of the school curriculum in order to make informed decisions about content, skills, and attitudes to be developed, and strategies to be employed. This course is designed to give teachers an overview of primary science curricula, and to help them develop an understanding of children's learning in science. It should also help teachers develop competence in the use of a range of teaching strategies.

Objectives:
Participants will:
1. Articulate the theory and philosophy that inform their classroom practice;
2. Discuss competing views of the nature of science and the implications for the teaching of science;
3. Relate the goals of primary science education to global goals of science education and to the national goals of education in Trinidad & Tobago;
4. Apply principles of learning theories to the science classroom;
5. Demonstrate competence in the use of a range of approaches to science teaching and instruction.

Content:
- Nature of science and scientific inquiry
- Science education as part of general education in the primary school
- Aims and objectives of primary science education
- Implications of learning theories for primary science
- Approaches to primary science teaching

Assessment
Written assignment  (100%)
LEVEL: II
SEMESTER: I
COURSE CODE: EDSC2218 (ED22R)
COURSE TITLE: SCIENCE AROUND US: PRINCIPLES AND APPLICATIONS
NUMBER OF CREDITS: 6
PREREQUISITES:
Course Description: This course will build on the knowledge base acquired in EDSC1106 (ED11F). The aim is to facilitate meaningful conceptual understanding using a thematic approach that contextualizes science and shows its relevance to man's activities. This should better position teachers to make informed decisions about the selection and design of learning experiences in the science classroom, and provide opportunities for inquiry and the acquisition of experiential evidence. The course is divided into two modules.

Objectives:
Participants will:
1. Apply physical quantities such as vectors, scalars, power, and energy to everyday situations;
2. Apply basic principles of equilibrium and gravity to the operation of mechanical devices;
3. Describe the reactions of functional groups of organic molecules;
4. Discuss the domestic and industrial applications of organic molecules in terms of their structure and function;
5. Critically analyse the impact of man's activities on the environment, for example, the removal of raw materials and the destruction of natural ecosystems;
6. Explain changes in the environment (abiotic and biotic) in terms of the redistribution of energy;
7. Relate the fundamental principles of genetics to complex global issues such as selective breeding and genetic engineering;
8. Collect and interpret various forms of empirical data.

Module 1
Content
• Work and energy (e.g., work/energy theorem, kinetic and gravitational potential energy, gravitational momentum and energy changes, efficiency, power and machines)
• Equilibrium and gravity (e.g., forces in equilibrium, centre of mass/gravity, apparent weightlessness and artificial gravity)
• Physical and chemical changes in the abiotic environment (e.g., cycles in nature, earthquakes, volcanoes, and mountains)

Assessment
Practical examination 40%
Written examination 60%

Module 2
Content
• Cellular biology – maintenance and continuation of life
• Natural and synthetic materials – preparation, properties, and uses (e.g., minerals to elements, structure and reactions of organic molecules, naturally occurring and man-made polymers)
• Genetics and evolution – fundamental principles
• Industry and the environment (e.g., acid rain, greenhouse effect, ozone, reaction rates and chemical equilibrium)

COURSE CODE: EDSC3307 (ED33G)
COURSE TITLE: REFLECTION AND TEACHER DEVELOPMENT IN PRIMARY SCIENCE EDUCATION
NUMBER OF CREDITS: 3
PREREQUISITES: ED34D (EDSC 3404) - ISSUES AND TRENDS IN SCIENCE EDUCATION AND SCIENCE CURRICULUM

Course Description: This course provides participants with an opportunity to reflect on their teaching experiences and continue the lifelong process of professional development. Participants will have the opportunity to examine and critically appraise perspectives on the nature of science, science education, and classroom instruction in the contexts of their own personal philosophies of science education and theories of learning. As participants frame and reframe their experiences, they should come to a deeper understanding of the social and institutional contexts that shape their practice and be empowered to make decisions that should improve practice as well as promote their own professional growth.

Objectives:
Participants will:
1. Demonstrate proficiency in the use of the reflective process to analyse and improve their own practice;
2. Compare various views on the nature of science;
3. Integrate perspectives from contemporary science education literature and theories of learning into their practice;
4. Discuss similarities and differences between issues they face and those reflections on practice reported in the literature on primary science education;
5. Devise and evaluate approaches to address critical issues/problems in science education and science teaching in Trinidad & Tobago

Content:
- Perspectives on the nature of science
- Reflection as inquiry into practice
- Contemporary views on science education and the application to classroom practice
- Issues in the science classroom
- Models of professional development
- Science education in an era of educational reform in Trinidad & Tobago
- Values and ethics in science teaching and learning

Assessment
A Teaching Portfolio 100%
The portfolio is intended to illustrate the extent to which course objectives have been achieved, and to provide evidence of students’ work as practitioners, along with self-evaluation of growth and development.

Justification for Assessment:
The nature of the course with its emphasis on the reflective process supports a portfolio assignment that captures both the processes and products of practice.

Methodology
Emphasis in this course will be on the writing process as a medium for reflection. Participants will (in addition to keeping a reflective journal) engage in electronic “journaling” with members of journal teams, using a “share, respond, re-evaluate” format. Delivery will be by interactive lectures, mini-workshops, discussions, student presentations and peer teaching.

COURSE DESCRIPTIONS

LEVEL: I

SEMESTER: II

COURSE CODE: EDSS1201 (ED12A)
COURSE TITLE: THE TEACHING OF SOCIAL STUDIES I
NUMBER OF CREDITS: 3

PREREQUISITES:

Course Description: This course helps teachers to prepare for social studies teaching. The teaching of social studies is compulsory at the primary level and up to Form 3 at the secondary level in the schools of Trinidad & Tobago. The introduction of social studies into the school curriculum has not been accompanied however by sustained programmes geared to familiarise and/or update teachers in the needed content and skills demanded of those who must teach the subject. ED45D, ED45E, ED45F and ED45G are a programme of courses geared to fill these needs in social studies teaching.

Content:
The nature of social studies, curriculum organisation, characteristics of effective teaching and planning, writing instructional objectives, evaluation of student learning, methods of teaching map and graphiacy skills, concept attainment strategies, questioning and discussion, small groups, and values and attitudes.

Assessment
One assignment (75%) and a Practicum (25%)
LEVEL: II
SEMESTER: II
COURSE CODE: EDSS2220 (ED22T)
COURSE TITLE: THE ECONOMY AND SOCIAL LIFE IN TRINIDAD & TOBAGO
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: A major aim of Social Studies teaching is to address aspects of social life in ways that capture their relatedness. Social Studies teachers must therefore possess a critical awareness and understanding of the relationships among social institutions if this aim is to be achieved. This course addresses this concern. It is designed to develop a critical awareness and understanding of the significance of the economy for social life in Trinidad & Tobago in the period after 1950.
Content:
Concepts such as the New Global Economy and the Information Age, human resource development, the private sector, the market, the economy, work and work ethic, education, income distribution, wealth and poverty.
Assessment
Two in-course tests (50%) and one written assignment. (50%)

LEVEL: III
SEMESTER: I
COURSE CODE: EDSS 2502 (ED21G)
COURSE TITLE: THE HISTORIAN’S SOURCES AND CLASSROOM TEACHING
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: Historians use a wide variety of human artefacts as sources of information from which to construct accounts of changes in the past. The course is aimed at introducing varied types of sources to teachers to show how these can be used in the classroom and on educational visits outside the classroom to acquire knowledge of methods of investigation and knowledge of historical events. Problems of description, dating, interpretation, and evaluation will be discussed. These activities will be directed especially to the understanding of the history of Trinidad & Tobago, to the history of the district in which the school is located, and also the history of the wider region of the Caribbean.
Objectives:
Participants will:
1. Identify and explain historians’ uses of a variety of sources relevant to the history of Trinidad & Tobago;
2. Make use of varied sources in their classroom teaching;
3. Evaluate controversies related to the justification of historians’ claims about the past.
Content:
- The elusive past: relating presently observable objects to unobservable past events
- Pictorial sources: maps, paintings, photographs, movies, etc.
- Material sources: natural objects used by humans, tools, machines, household implements, etc.
- Buildings: houses, churches, schools, mills, etc.
- Statistical sources: government and other publications
- Oral sources
- Textual sources: unpublished and published sources
- Fact, fiction, and the truth of history
Methodology
Workshops; seminars; classes.
Assessment
1. Development of teaching materials using pictorial, textual and statistical sources 20%
2. Report of a student project using sources from outside the school 80%

LEVEL: II
SEMESTER: II
COURSE CODE: EDSS2906 (ED29F)
COURSE TITLE: TEACHING GEOGRAPHICAL SKILLS
NUMBER OF CREDITS: 3
PREREQUISITES:
Course Description: In this course a range of geographic skills of utility to Social Studies teachers at all levels, are introduced, with practical examples for the student to master. Associated teaching methodologies and potential classroom problems are discussed.
Content:
Skills related to the reading and interpretation of Caribbean topographical and atlas maps - the concept of a map, different types of maps; map skills; topographic maps: direction and location, bearings, grid references, the concept of scale; measuring distance; contour lines - recognising simple features; orienting a map in the field; gradients, cross-sections, settlement patterns on maps, relief, drainage, communications and settlement. Skills related to the Earth’s shape and movement - latitude, longitude, projections, time zones. Skills involved in transforming statistical data into graphics - bar, line and curved graphs, clock graphs and pie charts; two- and three-dimensional maps, diagrams and dynamic and flow maps; symbol maps (weather maps), pictograms, dot maps and line maps; and, skills related to sketching, sketch map construction and drawing diagrams for classroom use.
Assessment
Two written assignments (60%) and an in-house examination (40%).
LEVEL: III  
SEMERTER: II  
COURSE CODE: EDSS 3107 (ED31G)  
COURSE TITLE: TEACHING FOR CHOICES AND DECISIONS  
NUMBER OF CREDITS: 3  
PREREQUISITES:  
Course Description: One purpose of the teaching of social studies is to enable students to think about how they should make choices and decisions in their lives. The overall aim is the enhanced thoughtfulness of future parents, workers, and citizens.  
Objectives:  
Participants will:  
1. Study practical reasoning and theories of choice relevant to the classroom teaching of decision-making at home, in the family, in school, at work, and as citizens;  
2. Using a variety of media, compose dilemmas and problems for the practice of decision-making as part of classroom teaching;  
3. Make use of written and oral dialogues for the expression of dilemmas requiring choices and decisions.  
Content:  
- Personal [prudential] planning  
- Strategic planning among co-operators and competitors  
- Bargaining  
- Markets and their failures  
- Conventions, rules, institutions  
- Public choice and electoral systems  
Methodology  
Workshops; seminars; classes.  
Assessment  
1. Two tests (20 % each)  
2. Project involving development of teaching materials  

---

LEVEL: III  
SEMERTER: II  
COURSE CODE: EDSS 3108 (ED31H)  
COURSE TITLE: SOCIAL EXPLANATION AND THE TEACHING OF SOCIAL STUDIES  
NUMBER OF CREDITS: 3  
PREREQUISITES:  
Course Description: Explaining why social changes take place, why certain types of social groups exist, why certain institutions and practices are maintained is a part of any teaching of social studies. Implicit in any explanation are particular concepts and theories. In the social sciences these forms of explanation are often contradictory. At primary level, teachers will not be teaching these different theories and explanations in class. However, these theories and explanations are unavoidably implicit in their teaching.  
Objectives:  
Participants will:  
1. identify the presuppositions of their own teaching;  
2. evaluate how forms of social explanation have significant implications for views of religion and human nature (free will, agency, rationality, etc.);  
3. consider how students, even at the primary level, may begin to be made aware of some of these issues in relation to their own social life in Trinidad & Tobago.  
Content:  
- explanation: its nature and purpose  
- explanatory narrative: geological, biological, historical  
- rational action explanations  
- hermeneutic interpretations of human conduct  
- socio-structural explanation  
- socio-biology and evolutionary psychology: natural selection as explanation  
- theistic explanation: divine intervention in human affairs  
- review: primary school teaching and the metaphysics of social thought  
Methodology  
Classes and seminars.  
Assessment  
1. A critical study of a work of social theory and its application to the teaching of social studies  
2. Development of teaching materials using different forms of explanation
LEVEL: II
SEMESTER: II
COURSE CODE: EDSS3120 (ED2T)
COURSE TITLE: ENVIRONMENTAL SYSTEMS
NUMBER OF CREDITS: 3
PREREQUISITES:

Course Description: One of the most dynamic aspects of Social Studies education at any level is the study of ways in which people and environments interact as attempts are made to modify the landscape. Environmental systems are in a continuous state of flux because of both physical and human influences. Teachers of Social Studies at the primary and lower secondary levels need to develop an awareness of this changing nature of the environment and how and why physical and human phenomena have together shaped the present form of particular places. The local case study of specific sites provides an immediate avenue for creating this awareness. However environmental issues are both local and global concerns. A basic understanding of concepts attained while researching the local case study will help the teacher to recognise and address the issues at both levels. Additionally the study of places is only made complete through a study of related map and globe skills used to judge the significance of the particular locations or places.

Objectives:
Participants will be able to:
1. Understand how internal tectonic forces form the major physical landforms and influence the distribution of natural resources.
2. Use maps to locate and explain earthquake and volcanic hazards in the Caribbean and at home.
3. Recognise the interrelationship between tectonic forces that construct and denudational forces that reduce landforms in the Caribbean.
4. Appreciate the need for small island developing states (SIDS) to build sustainability in their use of resources such as soils, water and natural vegetation.
5. Evaluate the effectiveness of specific attempts to preserve the natural environment in the local community.
6. Explain the concept of Central Places as an explanation for the distribution of towns and villages in Trinidad.
7. Identify favourable contributing factors and predict how a village may progress through development stages to become a major city.
8. Evaluate the need for support services and how these may change as the population in towns and villages undergoes change and development.

Content:
Module 1 is based on the physical environment. It explains how the earth is shaped through tectonic and denudative forces and explores measures taken to mitigate against natural hazards in the Caribbean. This is followed by an understanding of the need for Small Island Developing States, such as Caribbean countries, to guard against the effects of pollution and practice conservation of their resources including water, soils and natural vegetation.

Module 2 is based on the built-up environment. The Central Place Theory is used to explain the development of towns and villages in Trinidad or Tobago. The specific changes in the larger growth centres in Trinidad are tracked over the last twenty years examining factors that have contributed to their development including population growth, migration, accessibility, communication and transport.

Recurring Concepts
Landform, location, site, situation, diffusion, density, relief, natural resources, urbanization, accessibility, communication, transportation, population growth, change, inertia, migration, range of a good, community, village, hamlet, conurbation, city, metropolis, megalopolis, necropolis, aerial differentiation, spatial differentiation

Assessment
Two written assignments of equal weighting on each module.

BACHELOR OF EDUCATION  
(PHYSICAL EDUCATION)

Aims
The programme is designed to provide you with opportunities for learning about teaching physical education as we understand it today. We will be presenting you with opportunities to question your own and others’ practice in the light of the most recent research and ideas about physical education. Students in this programme will arrive with a considerable amount of experience which needs to be shared, debated and tested and we aim to help you do this within a theoretical framework that is informed by recent research. By the end of the programme you should be able to understand why you teach as you do and be able to continually investigate more effective ways of helping your students to learn.

Structure
One of the innovative approaches in this programme is the Reflective Practice module which starts at the beginning of the three years and continues until the end. It is designed to provide a continuous thread throughout the programme and to help you make sense of all your learning. All of the usual requirements of professional reflective practice – reviewing, planning, acting and reviewing again – occur in continuing cycles. The reviewing will include making use of feedback that you receive about your progress in the programme and you will be assessed on your ability to demonstrate how you have made use of this information.

For each block of teaching there will also be an integrated assignment; seven integrated assignments in total. This will require you to think holistically about the modules that you have been studying throughout the semester. In each block of teaching there will be three modules that will contribute to your integrated assignment. The blocks will contain a theory module, a skill acquisition module and a pedagogy module. The assignment will ask you to indicate how you understand the relationships between these three areas and the marks you achieve in these assignments will be summative. If you have gained exemption from a module because you have already studied the subject to a high level, you will still be expected to use your knowledge to complete the assignment which will contribute marks to the Reflective Practice module.

The modules which encompass this degree programme are as follows:

- Skill Acquisition courses are weighted x 1
- All other Level 2 courses are weighted x 2
- Reflective Practice and Field Study are weighted x 3

Timetabling of modules
We will have several international experts coming to Trinidad and Tobago to teach the programme initially. Whilst this is exciting in that it will provide you with an excellent programme, it provides us with some logistical problems. Juggling your availability, as full-time teachers, with that of the expert lecturers and professors, who also have teaching commitments at home, is a challenge for us all. Modules will, therefore, be taught in various modes. A few will be taught in the evenings over five weeks. Others will use a combination of evenings and Saturdays, whilst some will be taught in full days for a week or half days over two weeks. Often you will be expected to study during vacation time. It is important that you highlight any potential problems with such scheduling in plenty of time. If you don't tell us about problems, we will not be able to help you sort them out.

Other aspects of the programme
Given the geographically dispersed nature of the student group in this programme, we have a number of strategies for ensuring that everyone can gain access to the resources they need.

The first of these is the requirement that you will have a laptop computer that meets certain specifications. You will each have a UWI email address and so communication with each other and with staff should be straightforward. You will have access to a student loan in order to purchase a laptop computer, details of which will be provided at orientation.

You will also be offered the opportunity to work within a learning community that will be organised at orientation. These communities will, in the first instance, be geographically based so that you can meet physically with your group between class hours. The group will have telephone conferencing facilities and a Moodle site through which information and ideas can be shared with others in the group. Each group will also be allocated a member of staff who can provide support. The groups will be self-organising and not monitored or led by any one person. Learning communities are a tool which can be used to share skills and ideas and not a means of assessing its members.

A representative from your group will be invited to contribute to the regular evaluation meetings that will be organised by the University’s Instructional Development Unit (IDU). This will involve meetings at the University which will, whenever possible, occur at times when you are in St. Augustine to attend classes. Other support will be provided for Information Technology. At orientation or soon after, those whose skills in Information Technology are lacking or rusty will be offered support to upgrade them. Information Technology experts will be employed to provide you with ongoing advice and guidance.

IMPORTANT REGULATIONS

Submitting assessed work

• We distinguish between formative and summative assessments in this programme. All summative assessments must be completed if you are to pass the module. Some formative assessments may also be declared as mandatory for a pass mark although the grade they are given does not contribute to the overall module grade.

• Unless otherwise stated by the lecturer, all written work should be word processed. You will be informed of the specific criteria for each piece of work by the module lecturer at the start of the module.

• Work must be submitted before or at the latest by, 5 p.m. on the day of the deadline that you are given. Work which is submitted after this time will be considered to be a late submission. There may be occasions when work has to be posted. The postmark must be, at the latest that of the deadline date. If you are posting work, please obtain a certificate of postage. In some cases work may be emailed. The date and time of the sending of the email will be recorded in the office and you too should keep a copy of this sent mail.

• Wherever possible, each piece of work should be submitted with a Feedback Sheet attached. This will be used by the person marking your work to give you feedback to which you must respond in your portfolio.

• If you know that you are going to have problems submitting work on time, please inform us as soon as possible. There are very few exceptions made to the rule that work must be submitted on time. In the case of illness, you should note that although the grade they are given does not contribute to the overall module grade, the exemption is granted, the percentage mark awarded for the final examination will be increased correspondingly.

Regulations with Respect to Absence from Coursework Test

• A student who is absent from Coursework examination may apply to the Dean of the Faculty for exemption from this examination no later than one (1) week following the date of this examination. He/she must at the same time submit to the Campus Registrar a valid justification for such absence (such as a medical certificate in case of illness). The Dean will consider any such request for exemption in consultation with the relevant Head of Department and course lecturers. If the exemption is granted, the percentage mark awarded for the final examination will be increased correspondingly.

• A student may request permission to submit Coursework assignments, essays, etc. after the stipulated deadline date on the basis of a valid justification (such as illness, in which case a valid medical certificate must be submitted to the Campus Registrar). This request must be made normally within forty-eight (48) hours after the stipulated deadline date and must be addressed to the Dean, who in consultation with the relevant Head of Department and module lecturer may allow the extension. In very exceptional circumstances, the Dean, acting on the advice of the relevant Head of Department and module lecturer, may consider requests for exemption from submission of the Coursework assignment, essays, etc., and, if granted, the percentage mark awarded for the final examination will be increased.

Plagiarism

This is a particular kind of cheating which students sometimes do inadvertently. According to the University definition (2006/2007 UWI Examination Regulations for First Degrees, 78 (iv) p. 28):

‘Plagiarism is the unauthorized and/or unacknowledged use of another person’s intellectual effort and creations howsoever recorded, including whether formally published or in manuscript or in typescript or other printed or electronically presented form and includes taking passages, ideas or structures from another work or author without proper and unequivocal attribution of such source(s), using the conventions for attributions or citing used in this University.’

Note that, in this example, plagiarism has been avoided as the University’s words are in quotation marks and the source of that information has been fully acknowledged. Plagiarism is one of the worst kinds of academic cheating and it is important that you learn how to avoid doing it inadvertently. If you are in any doubt about whether what you are doing constitutes plagiarism, please ask for advice and guidance before you lose marks.
SECTION 3: PROGRAMME SPECIFICATIONS AND MODULE OUTLINES

Programme Specifications
Main Educational Aims:
• to develop the capability of students to acquire and communicate a dynamically changing theoretical perspective of physical education which is supported by a current evidence based understanding of relevant sciences, pedagogy, and physical activity, sport and exercise content;
• to provide students with the intellectual and practical skills that will enable them to ask relevant questions in the study and practice of teaching physical education and apply appropriate research skills to the answering of those questions;
• to enable students to apply their skills as teachers to work collaboratively within the school system and the wider community;
• to enable students to engage in lifelong learning to develop their capabilities as teaching professionals through new experiences.

Intended Programme Outcomes
This B.Ed. programme is designed to produce competent, confident, professional secondary physical education teachers who will be able to:
• demonstrate and discuss from a human movement perspective, the major aspects of motor skill acquisition; the mechanical principles of movement, musculoskeletal functioning and injury; and the content of physical activity, sport, and exercise;
• identify from a physiological perspective, the major systems within the body that affect or are affected by physical activity, sport and exercise and be able to articulate how these might vary across individuals or environments; and how changes across the lifespan affect physical health, growth, and development;
• from a psychological perspective, recognise reasons people take part in physical activity and sport, how participation is maintained, how participants respond, and what strategies might be applied to enhance performance;
• articulate the rules, skills, strategies, and ethos of physical activity, sport, and exercise;
• integrate content knowledge of physical activity, sport, and exercise, the scientific bases of performance, and social and psychological influences on performance into teaching adolescents;
• competently perform a wide variety of physical activities, sports, and exercise forms, demonstrating sound scientific techniques and strategies;
• hypothesise and test relationships using current knowledge of motor skills and behaviour to inform the process of teaching;
• use research methodologies and theoretical underpinnings of teaching from scientific, pedagogical, and content knowledge sources to interpret and critically evaluate new information;
• discuss and evaluate autonomous and reflective practice in research and teaching;
• communicate effectively in oral and written presentations to varied audiences;
• utilize information technology to gather information, handle data, and present visual material;
• apply knowledge and understanding to solve problems effectively;
• contribute appropriately to collaborative activities in classroom, school, and community contexts;
• creatively apply information technology skills in teaching.

Module Outlines
Please note that this information is subject to modification. Final module outlines will be given to you at the start of each module.

Skill Acquisition Courses
Rationale
During each of the six (6) semesters of the Bachelor of Education Degree in Physical Education - Secondary, students will be taking at least one skill acquisition course. This degree is all about teaching prospective educators how to teach a sporting activity. These courses provide students with an introduction to the various sports, their rules and skills. Most importantly, these courses instruct tomorrow’s Physical Education teachers on how to impart their knowledge of sport, physical activity, and exercise to others. As there are far too many sports played in the Caribbean to possibly teach each as an individual unit of material, sports have been grouped by their major elements of play. Sports played as games have been divided into three categories: invasion games containing sports based upon entering an opponents’ territory to score while still trying to protect your own goal (e.g. soccer, basketball, hockey); net/wall games with sports played over a net (e.g. tennis, volleyball) and sports played off of a wall (e.g. squash); and target/field games where hitting a target demonstrates accuracy (e.g. archery, golf) and field games that are not invasive (e.g. cricket). Aquatics contain all sports based on or in water (e.g. swimming, water polo, diving, canoeing). Track and field has all of the running, throwing and jumping events based around athletics. Gymnastics and dance covers the broad areas of educational gymnastics as well as Olympic and artistic gymnastics and dances used in Caribbean culture. Sport is a medium where people share their culture and geography such as the martial arts and scuba diving and may be the choice for life fitness for some Caribbean citizens. Therefore courses in adventure education and contemporary activities have also been included in the Skill Acquisition area.

Intended Learning Outcomes
Successful students will be able to:
1. state, write and apply the rules of the sport/activity
2. demonstrate, at the basic level, the foundation skills of that sport/activity.
3. describe and articulate the contributions that the sports sciences have made to the production of those skills.
4. teach the foundation skills and rules of that sport/activity to secondary school adolescents, using sound sports science knowledge and techniques.
5. competently apply pedagogical principles and approaches in their teaching.
6. identify the relevance of the selected sport/activity in the overall physical education programme.
Content
Each course introduces students to at least one selected sport/activity. This includes:
- Brief history
- Fit into the physical education programme
- Rules and the ways to enforce them
- Performance of the basic foundation skills with an emphasis on scientifically sound techniques of skill production

When students have a basic understanding of the sport/activity they will be taught how to impart their knowledge to secondary school students by:
- Constructing lesson plans for the sport/activity
- Using sound scientific and pedagogic principles in their planning
- Teaching a group of secondary school students the skills and rules of the selected sport/activity
- Playing the sport/activity

Assessment
1. Apply knowledge and understanding to a demonstration of competence in designing and teaching relevant skills. (learning objectives 1, 2, 4, 5).
2. An assignment for the portfolio which integrates material from the theoretical, skill acquisition and pedagogical courses within the teaching period. (learning objectives 3, 6).

- Understanding human movement as content of physical education
- Understanding communication and advocacy principles for publicizing physical education programs
- Distinguishing physical education from recreation & leisure and interscholastic sport
- Justifying inclusion of physical education in the school curriculum and more particularly as an examinable subject
- Developing arguments for instructional physical education as the basis of lifelong physical activity dispositions for secondary students
- Understanding restrictions and requirements for modifying physical activity instruction for students with visual, hearing, motor, and other types of disabilities
- Recognizing specific situations in teaching physical activity with legal implications for teachers
- Understanding various ethical principles of which physical educators should be aware
- Developing a rationale for secondary physical education through the study of human movement and its scientific and pedagogical knowledge bases

Assessment
1. Essay analyzing the current state of physical education in the country (10%)
2. Written plan for students with certain disabilities (10%)
3. Written analysis of a case study on a legal issue (10%)
4. Plan for implementation of models-based instruction (10%)
5. Quiz (20%)
5. An assignment for the portfolio which integrates material from the theoretical, skill acquisition and pedagogical courses within the teaching period. (40%)

COURSE CODE: PYED 2011
COURSE TITLE: BIOMECHANICS
NUMBER OF CREDITS: 3
PRE-REQUISITE: PYED 00 (Functional Anatomy)

Content
- Forces and movements of force
  - Qualitative
  - Quantitative
- Maintaining equilibrium/changing motion
- Linear kinematics
  - Vector quantities
  - Scalar quantities
  - Sports projectiles
  - Resolving forces
- Mechanical work, power and energy
- Newton's laws of motion
- Torques and movements of force
- Angular kinematics
- Centre of gravity determination
- Fluid mechanics
  - Swimming
- Application of mechanical theories to the human body
  - Bones as levers
  - Joints as angles
- Qualitative biomechanical analysis
  - Improving technique
  - Improving training
  - Understanding injury development
- Anthropometry measures
- Application of anthropometry
  - Talent identification
- Technology in biomechanics
  - 3D kinematics and kinetics
  - Electromyographical measurements
  - APAS

Assessment
1. Two examinations, one as a mid-semester examination covering material for the first half of the course and the other a final examination covering the last half of the semester (weighted 30% and 70%).
2. An assignment for the portfolio which integrates material from the theoretical, skill acquisition and pedagogical courses within the teaching period.
COURSE CODE: PYED 202
COURSE TITLE: MOTOR CONTROL AND LEARNING
NUMBER OF CREDITS: 3
PRE-REQUISITES: NONE

Contents
- Motor dichotomies and stages of learning
- Central nervous system and motor pathways
- Motor Programme Theory
- Vision
- Proprioception
- Attention
  - Anticipation
  - Response preparation time
  - Selective attention
  - Attentional capacity
- Memory and forgetting
- Knowledge of results
  - Knowledge of performance
  - Feedback scheduling
- Instructional presentation
  - Teaching styles
  - Teaching aids
- The learning environment
  - Whole – part learning
  - Practice distribution schedules
  - Transfer of learning
- Mental practice
- Competition
- Motivation

Assessment
1. Three group posters as reports on motor control experiment, learning experiment and teaching survey.
2. Quiz (40%)
3. Research report on pupil learning/individual teaching (60%)
4. An assignment for the portfolio which integrates material from the theoretical, skill acquisition and pedagogical courses within the teaching period.
COURSE CODE: PYED 2003
COURSE TITLE: PSYCHOLOGY OF PHYSICAL ACTIVITY
NUMBER OF CREDITS: 3

Content
- Theories, research and measurement tools of
  - Motivation
  - Self Determination
  - Expectancy-Value
  - Competence
  - Motivational Goal Orientations
- Individual differences, dispositional, contextual factors, and the effect on participation/performance of
  - Self esteem construct
  - Control
  - Attributions
  - Locus of causality
  - Identity
  - Stress
  - Arousal
  - Group dynamics

Assessment
1. Cognitive map of relationships between motivation, perceptions of competence and control. Support the model by research evidence and identify ways that factors affecting participation and performance can be used in the design of optimal learning environments (100%)
2. An assignment for the portfolio which integrates material from the theoretical, skill acquisition and pedagogical courses within the teaching period.

COURSE CODE: PYED 2004
COURSE TITLE: PHYSICAL ACTIVITY AND HEALTH
NUMBER OF CREDITS: 3
PRE-REQUISITES: NONE

Content
1. A small group, problem-based learning approach to investigate the topic of physical activity and health
2. Current research-based recommendations concerning adolescent diet and physical activity
3. Changes in diet, physical activity, societal contexts, and social pressures and associated changes in access to healthy food and opportunities for activity
4. Data collection from a group of adolescents concerning their values, beliefs and behaviours
5. Analysis and interpretation of findings, presentation of groups’ results
6. Proposal for how physical education might effectively address some of the issues discovered through the problem-based learning in the research project
7. Effect on physical activity of social and individual values in adolescence; the role of culture, parents and peers; effect on provision of opportunity for all; the impact of the effective physical educator
8. Categorisation of activities that provide acute and chronic physiological changes; appropriate fitness activities before and after puberty for boys and girls; effects of different types of activity on growth factors such as bone density
9. Recommended activity levels for children and adolescents
10. The role of physical activity in building self esteem and perceptions of competence; acute and chronic psychological responses
11. Particular issues for adolescents: body image, menarche, growth rates, identity, gender stereotyping, competition
12. Connections between school physical education local community-based activities for adolescents; analysis of the effectiveness of these opportunities for appropriate health-related activity
13. Guidelines for ideal physical education curricula for sustainable, health-related physical activity

Assessment
1. Small group project promoting wellness and group poster on the value of physical activity for health (30%)
2. Report for the school principal (max 1000 words) justifying a health-related physical education curriculum for adolescents (70%)
3. An assignment for the portfolio which integrates material from the theoretical, skill acquisition and pedagogical courses within the teaching period.
COURSE CODE: PYED 2005
COURSE TITLE: PHYSIOLOGY OF PHYSICAL ACTIVITY
NUMBER OF CREDITS: 3
PRE-REQUISITE: PYED 1003 (FUNCTIONAL ANATOMY)
Content
• Metabolism, energy and basic energy systems
• Metabolic rate during rest and exercise
• Work and power
• Acute adaptations of the body to exercise
  • Acute cardiovascular response to exercise
• Chronic adaptations of the body to exercise
  • Chronic adaptations to strength training
  • Chronic adaptations to aerobic training
• Respiratory regulation during exercise
• Quantification of exercise intensity using heart rate
• Blood lactate and rating perceived exertion
• Maximal aerobic capacity
• Environmental influences on performance
  • Thermoregulation
• Neuromuscular adaptations to resistance training
• Nutrition and physiological capacity in sport
Assessment
1. A report of two exercise physiology laboratories. Rationale, methodology and results for both practicals will be presented separately with a discussion that combines the interpretation of both data collections. (100%)
2. An assignment for the portfolio which integrates material from the theoretical, skill acquisition and pedagogical courses within the teaching period.

COURSE CODE: EDME 2006
COURSE TITLE: CLASSROOM TESTING & EVALUATION
NUMBER OF CREDITS: 3
PRE-REQUISITES: NONE
Content:
• Measurement or assessment
• Different assessments:
  Types, Purposes, Formats
• Judging the reliability and validity of assessments
• Test development
• Interpreting performance scores
• Affective outcomes of assessment
• Using assessment to affect students’ approach to learning
Assessment
To be arranged

COURSE CODE: PYED 3004
COURSE TITLE: REFLECTIVE PRACTICE
NUMBER OF CREDITS: 3
PRE-REQUISITES: NONE
Content
Portfolio preparation includes:
1. Effective meetings with portfolio tutor and others to guide and monitor choices of portfolio materials
2. Clear use of feedback to improve preparation of portfolio materials, improvement to the next assessed piece of work, group work etc.
3. Effective demonstration of progress toward greater professionalism using evidence added to the portfolio
4. Portfolio content may consist of such items as previous educational and physical activity, sport, and exercise performance; ongoing teaching and coaching performance; reflective statements and evaluations by adults of student work; goals and achievements. It will include the prescribed content as a minimum.
5. Use of multiple technologies to present portfolio materials most effectively
6. Accurate completion of the following forms associated with portfolio development.
  In each semester an integrated assignment, using understanding, knowledge and skills from the three areas studied (pedagogy, skill acquisition and theory), will be added to the portfolio and assessed as part of the portfolio. This assignment will be set and marked by the teachers responsible for the parallel course during that teaching period and students will receive feedback about their assignment as soon as it has been marked. Their increasing ability to interpret feedback and use this to improve the next performance will be an important criterion in the final, summative assessment for credit.

Assessment
Assessment of the portfolio overall will take place at Level III when credit is applied. Students will be informed, at Level I, of the criteria for assessment.

Programme Specifications
Main Educational Aims:
• to develop the capability of students to acquire and communicate a dynamically changing theoretical perspective of physical education which is supported by a current evidence based understanding of relevant sciences, pedagogy, and physical activity, sport and exercise content;
• to provide students with the intellectual and practical skills that will enable them to ask relevant questions in the study and practice of teaching physical education and apply appropriate research skills to the answering of those questions;
• to enable students to apply their skills as teachers to work collaboratively within the school system and the wider community;
• to enable students to engage in lifelong learning to develop their capabilities as teaching professionals through new experiences.

Intended Programme Outcomes
This B.Ed. programme is designed to produce competent, confident, professional secondary physical education teachers who will be able to:
OUTREACH PROGRAMMES
These courses are open to adults and are specifically tailored to meet the needs of parents, caregivers, teachers, nursing aides and those with a vested interest in the well-being of young children.

PARENTING AND THE PRESCHOOLER
Course Outline
An overview of the course; classical development theory; developmental milestones; managing the 0-4 year old; bonding; parents under stress; parents as partners in the early childhood years; child-rearing practice; discipline; punishment vs. praise; and, home and school.

PARENTING AND THE SPECIAL CHILD
One of the most difficult and challenging tasks in the world is that of child-rearing. It is assumed that parenting is an automatic behaviour and that parents are natural bearers of the gifts necessary for this most important role. When these parents are confronted with the additional issue of raising a child needing special care, they are even less prepared or informed to rise to the challenge and deal with the additional issues of extra special medical, education and management needs.

The course has been designed with such parents in mind. It will attempt to meet the needs of parents, caregivers, and anyone in contact with children needing special care. It will look most importantly at the person as a parent and the person as a person. It will discuss the way children develop, normal behavioural patterns, what parents need to look for and when, and how to recognise when a behaviour and development, needs further investigation.

Participants will be advised how and where to seek professional help, how to deal with the impact of such children on the family and on the community. Issues of schooling and coping with special children across the life-span of parents and thereafter will also be covered.

Course Outline
On becoming a parent; Overview of the stages of child development; Group session (high risk parents/high risk children, other contributing factors, is development any different? and, intervention strategies); Types of impairments /handicapping conditions; Families with handicapped children; Group session (parents as partners); Sources of parental support; Group session (prevention to keep your child healthy); The special child in the classroom; Sociological issues related to families with special children; and, issues throughout the life-span.

HEALTH, NUTRITION & SAFETY OF THE YOUNG CHILD:
AGES 3-6
The course will focus on the health promotion, prevention and treatment of common childhood diseases. At the end of the course the student will be able to identify pre-birth factors which affect the health of the neonate; describe the development of a child from birth to eight years; understand the relationship between the external environment and the physical and emotional development of the child and examine strategies for prevention and intervention which can ensure the health and safety of the young child.

To be awarded a certificate, candidates must obtain at least a C- in each component of the course.

Child Psychology: Birth to Six Years (25 hrs.)
Students will be aware of the developmental characteristics in the foetus and infant; be knowledgeable of the principles of growth and development in the young child; be conscious of the process of cognitive development in the young child and be able to provide for a positive group experience for children and adults by setting limits that are consistent with the goals of the programme.

Assessment
Class presentation of recent studies in the area; papers on topics covered in the course; preparation of a scrapbook with relevant topics in an area; and, contribution to group work.

Health, Safety and Nutrition of the Pre-School Child (15 hrs.)
On completion of the course, trainees will be able to utilize knowledge gained in health, safety and nutrition in the management of preschoolers, ages 3 - 6 under their care/supervision. Trainees, upon completion of the course, will know the definition of basic knowledge of the normal growth and development of the preschool child, ages 3 - 6; be knowledgeable about what constitutes environment and be able to provide same for the preschool child, ages 3 - 6; and, know the basic principles underlying good nutrition for the preschool child.

First Aid (10 hrs.)
On completion of this course, students will know the definition of the term, First Aid; know the meaning of common terms used in First Aid; understand the aims of First Aid; know the principles of First Aid management; apply the principles of First Aid management in emergency; demonstrate skill in providing First Aid for casualties and show concern for the welfare of casualties by reassuring children who are apprehensive/upset.

Assessment
Short essay-type questions; a quiz; and, practical role play.

Methodology (30 hrs.)
Objectives
To expose the teacher to the basic individual differences of preschoolers; to provide a variety of methods of teaching suited to the developmental levels of preschoolers; to expose the students to all areas of the curriculum and also assist them in adapting or devising appropriate curricula for the particular aims of the preschool and to allow the teacher to gain experience in all areas of planning in the learning process.

Assessment
1. Selecting one method learnt and applying it in the practical setting.
2. a. Preparing forecasts and lesson plans.  
   b. Planning an appropriate preschool curriculum.

Practicum (60 hrs.)
Objectives
To provide the students with opportunities for positive interaction with preschoolers; to assist the student in managing a preschool classroom competently and to provide opportunities for developing materials appropriate for preschoolers and using these effectively in the classroom.

Assessment
1. Evaluation of teaching aids.
2. Application of areas of planning to the actual preschool classroom.
3. Application of knowledge learnt in theory about the taught child to the practical setting.
4. Developing a conducive learning environment through use of curriculum areas learnt in theory.

ORGANISATION AND MANAGEMENT OF A PRESCHOOL
There are in existence in our society a wide variety and a large number of institutions and organisations providing early childhood care and education. Many of these can certainly benefit from management and organisation that are more informed by the insights and understanding that have come from systematic study of environments of this kind. Commitment to providing good quality care must be buttressed by the ability to organise in such a way that it can be effectively delivered. Moreover, all early childhood educators need to possess those skills and abilities which can help them to improve the delivery systems over which they have control.

Eligibility for entry
1. Successful completion of the Course for preschool teachers offered by the School of Education or, a course of equivalent standard.
2. Experience in, the operation of or managing, a preschool.
3. Five GCE or CXC passes, one of which must be English.

Structure of the Course
The proposed course has two components -
1. Introduction to administration in early childhood education.
2. The pre-school curriculum and the learning environment.

Introduction to Administration in Early Childhood Education
Students will understand the concept of early childhood education; become familiar with basic organisation theory and its relevance for operating preschools; gain mastery in the techniques of various types of record-keeping and other information systems; master techniques for the evaluation and deployment of staff and understand the importance of the partnership between home and school in early childhood education.
Assessment
A written assignment of 1,500 words (40%); an examination, (60%). Alternatively, course assessment could be continuous in the form of several short papers.

The Pre-School Curriculum and the Learning Environment
Students will be able to describe the features of a learning environment which is conducive for the development of the preschooler; master the skills of creating the environment; master the skills of developing the preschool curriculum and creating/selecting appropriate supporting teaching/learning materials and develop skills of evaluating learning resources.

Assessment
A Project (40%) and a written examination, (60%).

APPENDIX

GUIDELINES FOR FORMAL ASSIGNMENTS
Guidelines specific to each assignment are detailed below. In addition to these, the following technical requirements must be observed.

i. Conventions of grammar, spelling, punctuation, and paragraphing.
ii. Consistent use of the recommended APA style for citation and referencing.

A. Foundation Areas Essay
(3,000 words)
The essay is required to be an analytical discussion of concepts and findings in Philosophy of Education, Psychology of Education, Sociology of Education and Language in Education and Health and Family Life Education as they relate to the topic under consideration.
In this essay the student is expected to:

i. Examine critically the underlying assumptions of the topic chosen;
ii. Demonstrate an understanding of the meaning of the concepts he/she is using or discussing;
iii. Select and evaluate from the literature views and information that are relevant to the topic;
iv. Develop arguments logically, establishing continuity;
v. Provide evidence/support for claims made;
vii. Relate reading to personal experience both as student as teacher, and to the specific cultural and social issues which underlie educational practice in Trinidad & Tobago;
vii. Draw warranted conclusions.

B. The Curriculum/School Study
(5,000 words)
The Curriculum/School Study is an evaluated account of an investigation of a school or classroom situation. It is a learning exercise aimed at giving the teacher an opportunity to:

i. Develop and apply research skills in the classroom or school setting;
ii. Demonstrate the ability to apply relevant theory to classroom practice or school administration.

Format of Curriculum/School Study
i. An abstract of about 300 words (a loose copy of the abstract must also be submitted).
ii. The Problem
   • background to the problem including the setting
   • statement of the problem
   • significance of the study
   • research questions
iii. Review of related literature to include:
   • crucial tools, concepts and the accurate location of these within the existing literature
   • points of similarity with and departure from your study and the location of these within the existing literature
   • a justification for your study focus with reference to the literature

iv. Research Methodology
   • description of the sample or case
   • research plan
   • description of instruments used
   • detailed report of procedures used in carrying out the research plan

v. Presentation of findings
   • presentation of data
   • data analysis
   • interpretation of findings

vi. Summary and Conclusions
   • implications of findings
   • recommendations

vii. References

viii. Appendices
   • samples of materials used and/or collected
   • samples of students’ work
   • samples of tests, and other data collecting instruments
   • unit outline
   • lesson plans
   • tables, diagrams, graphs
   • other relevant material

C. Dissertation
   (5,000 words)
   The dissertation is an extensive scholarly exploration of a topic of educational significance in Trinidad & Tobago.

   i. It must reflect critical and original thought applied to a comprehensive investigation of the chosen issue.

   ii. Offer suggestions and recommendations for dealing with the related aspect of educational practice, policy, or administration.

   iii. Integrate relevant matter from education theory, curriculum practice in interpreting and developing the topic in a comprehensive way.

Empirical data or other documented materials may be used to illustrate and support the presentation. The following is an example of how the dissertation may be presented:

   a. An abstract of about approximately 300 words. (A loose copy of the abstract must also be submitted);

   b. A brief introduction to indicate the topic and its treatment;

   c. An extended treatment of the topic which may take one of several forms, e.g.
      1. A written discussion, in essay format, which critically examines and analyzes the topic;
      2. Other text or non-text formats in which the topic is critically examined and presented. In such cases the presentation must be supplemented by a written analysis of the topic;

   d. Conclusions and recommendations for action based on knowledge gained from the literature and from the writer’s own thinking and experience

   e. A bibliography.

Requirements For Format
Instructions on format presented here do not cover all types of research reports. Students are required to discuss any peculiar problems with their tutors.

   a. All written assignments for formal assessment must be typed:
      • On plain quarto, one side only;
      • With double-spacing throughout
         i) long passages of quotation should be set in from the left margin,
         ii) the first line of the bibliography should be indented five spaces to the right
         iii) with a right margin of one inch, and the top, bottom and left margins of 1 inch.

   b. All written assignments must be submitted within the covers supplied by the Department.

   c. It is the student’s responsibility to give adequate directions to the typist with respect to matters of format and presentation.

   d. Students are expected to make very early arrangements with a competent typist and to collect the manuscript some days in advance of the deadline for thorough checking to eliminate typing and other errors.
Requirements for References

A. Why you must give references

References must be given for everything which you take from another author because:

i. Not to do so is PLAGIARISM, literary and intellectual theft and cheating passing off as your work what is really that of someone else.

N.B: THE PENALTY FOR PLAGIARISM IS EXPULSION FROM THE UNIVERSITY OR DEBARMENT FOR A NUMBER OF YEARS.

ii. Those assessing your work need to know what exactly is your own work and what you have taken from elsewhere and so to be able to check that you have quoted or used it correctly.

iii. Other readers (e.g. Future Diploma in Education students) also need to know what is your own and what is not, so they can quote the correct source and follow up your references.

B. When to quote or mention other works

i. Every time you use the ideas or words of another writer, you must indicate their source so as to avoid plagiarism.

ii. If you use his actual words, put them in single quotation marks and give the reference.

iii. If you put his ideas into your own words, you must still give the reference to the source.

iv. Quoting the actual words is necessary when:

You wish to show that the writer actually said a particular thing;
You intend to examine in detail what he said;
It is a definition of a key term.

v. Otherwise you should try to put another’s ideas into your own words so as to show that you understand what he said.

vi. Except as stated in (iv), avoid long quotations.

vii. DO NOT MERELY QUOTE, for that occupies space without anything being said by YOU. Use what you quote, as in (iv), or to support your argument.

   e.g. Do not merely quote several definitions, but criticize them and conclude with the one which you accept and are going to use, or give that one only.

   MAKE SURE THAT THE READER WILL KNOW THAT YOU AGREE OR DISAGREE WITH WHAT YOU QUOTE.

viii. Beware of quoting an author as saying something with which he does not in fact agree. Writers often set out a certain position in some detail before going on to criticize, modify or reject it. Therefore read before and after the particular passage to make sure that it does express the writer’s own position.

C. How to give references

a. In the body of the text:

   i. When you quote or take ideas from an author, give the author’s name, authors’ names, the date of publication, and, if you quote or cite a particular part, the page number, page numbers, or chapter. Fit your citations neatly into your sentences. Quotations should be double spaced. Quotations must be accurate, following the wording, spelling and interior punctuation of the source.

   As Hirst and Peters (Hirst and Peters, 1970, p.43) say, “development” suggests irreversible changes “the direction of which is characteristic of that which develops”.

   Some people (e.g. Bantock, 1980, Chap.1) still see merit in the Renaissance ideal of education.

   ii. When you cite two works by the same author published in the same year, distinguish them by a, b, etc.

   There is evidence (Hallam, 1969a, 1969b) that even at the age of 16 many pupils cannot understand the abstract terms used in the teaching of History.

   iii. Where you take a quotation from one author when quoted by another, give the name of the original author and the details of where you found it.

   Progressive educators are apt to give vague statements of aims such as “Life is the trade I would teach him” (Rousseau, quoted Bantock, 1980, p.43).

   iv. Use single quotation marks for the quotation within the quotation.

   Bantock (1980, p.43)”but the principle behind the progressive view of the curriculum is essentially that of the accidental: Rousseau wishes for an education that will be immediately useful - ‘life is the trade that I would teach him’”.
v. To set out a long quotation, indent the whole quotation from the left margin and use double spacing.

Biehler and Snowman (1982) noted:
In many respects, students are in a better position to evaluate teachers than anyone else. They may not always be able to analyse why what a teacher does is effective or ineffective (which might be true of an experienced expert observer), but they know, better than anyone else, whether they are responding and learning. Furthermore, students form their impressions after interacting with a teacher for hundreds or thousands of hours.

C. How to give references
b. In the Bibliography
   i. BOOKS
   The Bibliography should not be divided into sections. All works, regardless of number of authors, or whether they are books or articles etc., Must be placed in alphabetical order of surname of author, editor or publisher. No separate listings should be made for books, articles, etc.

   1. ONE AUTHOR

   2. TWO AUTHORS

   3. MORE THAN TWO AUTHORS

   4. NO AUTHOR GIVEN

   5. AN ORGANISATION OR INSTITUTION AS “AUTHOR”

   6. AN EDITOR OR COMPILER AS “AUTHOR”

7. TRANSLATIONS

8. WORKS IN SEVERAL VOLUMES

9. AN ESSAY IN A COLLECTED WORK

ii. ARTICLES
   a. Periodicals

   b. Newspapers

   N.B.: If you cite more than one essay in the same collected work, list the collection separately under the editor’s name (see Books: A7 above) and then list each essay separately by author’s name and in the appropriate place.

iii PUBLISHED PROCEEDINGS OF A CONFERENCE

iv. DISSERTATIONS (Unpublished)

v. THESIS (Unpublished)
