

## **ETHICS & CONFIDENTIALITY**

The Clinic is committed to adhering to the strictest principles of professionalism and ethical conduct. Examiners are qualified to administer and interpret tests properly and understand their professional responsibility for ensuring that the security and integrity of all tests, file and personal client data are handled in a professional and ethical manner.

For training purposes sessions may be observed and/or video/audio recorded.

Client information and records are **CONFIDENTIAL** and will not to be shared with another person or department unless you and/or your parent/legal guardian consent to such action in writing.

Before deciding whether or not to authorize the sharing of personal data, you will be made fully aware of the details that will be shared and asked to sign a **Consent to Release Information** form.

The only exceptions to confidentiality rules include any disclosures that are mandated by law such as a court order, or risk of injury/harm to self or others.

## **Contact Us!**

Please contact us during regular office hours (Monday to Friday, 9am to 5pm).

662-2002 ext. 84511 or 84512

663-8914

Please leave a brief message if we are unable to take your call.

## **PSYCHO- EDUCATIONAL DIAGNOSTIC & INTERVENTION CLINIC**

# PEDIC

## OUR SERVICES

### Psychoeducational Assessments

Psychoeducational assessments use a combination of interviews, behavioural observations and psychometric instruments to help ascertain the cause of a person's learning or behavioural challenges.

These challenges can be specific to problems learning to read or doing math, but can be general in nature, such as problems grasping or remembering academic concepts, and problems focusing (paying attention) or sitting still in the classroom.

The assessment process usually involves one-to-one testing; parent interviews; teacher interviews (if needed); review of records; scoring of tests; interpretation of results; report preparation; and feedback sessions.

### Reading Assessments and Intervention

Reading Assessments use standardized instruments to assess specific reading skills such as phonemic awareness, phonics skills, and fluency. The results of diagnostic assessments are used to assist with intervention and instruction planning.

The clinic offers both individualized, in-clinic and in-school group assessments and intervention.

### Professional Development Training

PEDIC's training programme is designed to enhance professional practice in the areas of assessment, diagnosis and intervention.

Professional development workshops are offered to special education teachers at both public and private schools.

Practicum based training and work-based learning opportunities are available to students and graduates of professional psychology and education Masters and PhD programmes who need additional experience and skill development in their specialty areas.

### SERVICES OFFERED:

- Psychoeducational assessments
- Reading assessments and Intervention
- Professional Development Training
