Course Code	ECON 3005
Course Title	Monetary Theory and Policy
Level	3
Semester	1 (September - December 2016)
Credits	3
Pre-requisite(s)	ECON 2000 and ECON 2002

INTRODUCTION:

We warmly welcome you to this course, ECON 3005: Monetary Theory and Policy! We hope that you are enthusiastic and committed to hard work—all of which will ensure your success in this course. This course offers you the opportunity to explore the theoretical and practical aspects of monetary policy, with particular reference to developing countries and Caribbean issues. You should attend all lectures and tutorial sessions! Follow a routine that suits you best and this will prove to be a manageable and intellectually rewarding experience. Please remember that we are always willing to assist you throughout your journey, do not hesitate to contact us either via email or during office hours. Good luck and hope you enjoy this course!

TEACHING STRATEGIES:

The course delivery will take the form of a weekly lecture supported by a weekly tutorial. The three (3) hour lectures will be delivered via PowerPoint presentations, which correspond to the main readings for each section of the course. The lecturer encourages student participation during classroom discussions and welcomes feedback from students. A guest lecture may be held during the semester.

Tutorial classes will be based on tutorial sheets, which can be accessed via myelearning. Tutorials are meant to reinforce key concepts covered in lectures. Tutorial attendance is mandatory for ALL students. University regulations allow for students to be debarred from final examinations, if they do not attend at least 75% of tutorial classes. Student attendance will be monitored regularly to ensure that the regulation is enforced.

COURSE ASSESSMENT:

- Mid-term Examination: 20%
- Final Examination 80%

The final exam usually consists of four (4) questions. The duration is 2 hours.

COURSE DESCRIPTION:

This course examines the basic workings of the financial system and monetary policy primarily in developing countries. There is an emphasis on understanding the issues relating to money, the tools of monetary policy, and the role of the Central Bank in Trinidad and Tobago. The general economics and structure of the financial system is also discussed. Furthermore, the main monetary and financial issues relevant to both Trinidad and Tobago and the CARICOM region are examined. For example, the creation of a monetary union, intra-Caribbean investment and exchange rate systems are discussed.

PURPOSE OF THE COURSE:

This course is designed to deepen students understanding of monetary theories and related policy issues. It allows students to gain an appreciation of the workings of the financial system and the ability to analyze monetary issues relevant to the Caribbean region.
