Calling all TT undergrad and postgrad STEM (science, technology, engineering or mathematics) students

NASA

International Internship Project (NASA I²) 2019

The NASA I² project was developed to facilitate a structured educational exchange among students from Trinidad and Tobago, and other international interns, under the mentorship of NASA's science and engineering workforce.

RESEARCH AREAS INCLUDE:

- Advanced Life Support Internship Opportunity
- Biosensor Development
- CubeSat Cluster Test-Bed
- Nanotechnology in Electronics and Sensor Development
- Prognostics and Health Management
- Rotorcraft Aeromechanics

Applications are open to ALL Trinidad & Tobago Nationals including those studying abroad.

Application deadline:

January 8th, 2019

Internship period:

June 5th – August 11th, 2019
