

On Thursday 19th April 2018, the Society for Physics Advancement, Research and Collaboration (SPARC) was officially relaunched at the University of the West Indies, St. Augustine campus. The new and revitalized society aims to provide an avenue which bridges the gap between interest and career path. This Society is headed by an interim committee; Tarik Murell (President), Karishma D. A. Ramnath (Vice-President), Ricalda Aguilera (Treasurer), Jesse Ramkalawan (Secretary), Jordan Rodriquez (Techincal Advisor) and Yohance Wellington (Public Relations Officer), for the Academic year 2018/2019.

They intend on doing this by creating a platform which allows Physicists and Physics enthusiasts the opportunity to get hands-on experience in the Physics field, developing a community of curious persons, who can ask questions about the universe and go about answering them. Engaging with the membership of the society was a key topic also expressed to members, highlighting plans for the upcoming academic year 2018/2019 such as; The hosting of the Society's logo competition, the first t-shirt design competition, movie nights, interactive lecture sessions and a series of Physics principle-based competitions.

Dr. Ricardo Clarke, The Head of the Physics Department, gave his blessing to the Society, vowing to assist, to the best of the department's ability. Original Sparkies, Dr. Shirin Haque and Mr. Randy Ramadharsingh also spoke about the history of the society and their hopes for the new committee to carry it forward. As it seems, this new band of misfits already has a lot planned for the next academic year and are looking to start off with a bang!
