# RESEARCH TIPS: The Design

The NGL has invested in a number of Research Methods Text Books and Guides to assist you with producing Distinction worthy research papers.

Visit us today!

Before beginning your paper, you need to decide how you plan to design the study. The research design refers to the overall strategy that you choose to integrate the different components of the study in a coherent and logical way, thereby, ensuring you will effectively address the research problem; it constitutes the blueprint for the collection, measurement, and analysis of data. Note that your research problem determines the type of design you should use, not the other way around! (USC Libraries 2018)
