

Event: Research Seminar

Date: Thursday 17th November, 2011

Venue: Lecture Theatre 3, 2nd Floor, Block 13 (Chemical Engineering Block)

Schedule of Presenters:

TIME	NAMES	RESEARCH TOPIC	FIELD OF STUDY
9:00am	Marcus Arthur	Low Cost Aerial Mapping System for Natural Disasters in the Caribbean	MPhil in Surveying & Land Information
9:30am	Maria Vega	Towards an Approach to Model Human Leptospirosis as an Environmental Disease in the Tropics	PhD in Surveying & Land Information
10:00am	Sandesh Jaggan	Developing a Model to Determine and Assess Sea Level Change in the Caribbean	MPhil in Surveying & Land Information
10:30am	Gabrielle Thongs	The Development of a Decision Support System for Multi-Risk Assessment and Spatial Planning for the Caribbean	PhD in Geomatics
11:00am	Azizi Harris	An Integrated Product Design Methodology for Functions and Geometry through DFX Principles Combined with CAD/CAM Concepts	MPhil in Manufacturing Engineering
11:30am	Adeyanju A. Ademola	Thermal Performance of a Simultaneous Charging and Discharging Packed Bed Energy Storage System	PhD in Mechanical Engineering
1:30pm	Carlotta Bharat	The Investigation of the Effects of Wastewater Irrigation on Soil Productivity and Crop Quality	MPhil in Agricultural Engineering
