

A proposal to formally incorporate EOR projects in Repsol

Elena Escobar

Repsol Technology Center

Elena Escobar is PhD in Petroleum Engineering from Texas A&M University. Dr. Escobar is a Consultant in Reservoir Recovery Processes from E&P Technology Direction at CTR in Móstoles. Presently, she is Manager of the ISI Project, one of the seven strategic R&D projects of E&P Technology Portfolio. ISI project is focused in the development of EOR processes, specific for Petrocarabobo field. She has been working over last 28 years in EOR projects for Repsol, Alberta Research Council and PDVSA-Intevep, during that time she has been technical leader of different thermal and gas EOR projects and EOR Pilot Tests. During 2007-2009, she served as mentor of the Repsol Reservoir knowledge community.
