INSTITUTE

MAINTENANCE  
WORKSHOP  
SERIES

**Maintenance is key in a downturned economy!  
Stay relevant and maintain that competitive edge.**

**“Maintenance Analysis and Optimization” - 3rd & 4th March and 24th & 25th March 2018**  
Facilitated by the distinguished author of “Maintenance Replacement & Reliability, Theory & Applications” **Professor A.K.S. Jardine**  
Main Areas of Exploration: Physical Asset Management Maintenance Policies, Component Replacement Decisions & Maintenance Resource Management

**“Industrial Automation and Controls” - Saturday 3rd, March 2018**  
Facilitated by the author of 100 published journals and conference papers in the area of Intelligent Controls & Automation-  
**Professor Rickey Dubay**  
Main Areas of Exploration: Intelligent Machines, Systems & Factories, Cognitive Robots and Adaptive Controls & Sensors

**“Optimization of Plant Turnaround / Shutdown Processes” - Saturday 14th, April 2018**  
Facilitated by Senior Lecturer and Programme Coordinator of the MSc Engineering Asset Management Programme-  
**Kishore Jhagroo**  
Main Areas of Exploration: Principles and Concepts of Effective Planning & Scheduling, Handling Reactive Maintenance and Planning & Scheduling for Plant Turnarounds
