## **Network on a local level**

- Become involved in a NACE local section which holds local events like lunch and dinner meetings, training courses, trade shows, golf outings and more. NACE Sections give members opportunities to get involved with the organization, make contacts, and further their professional interests. NACE offers resources to our Section members to keep up with current news and events to keep you involved and connected.

## **Become an expert through our extensive resources**

### **Who are our experts?**

- NACE Technical Committees are comprised of NACE members who volunteer their expertise to develop corrosion-related standards that are internationally recognized and globally accepted.
- Access our publications and technical library at [nace.org/store](http://nace.org/store).
- Standards increase work safety, implement risk assessment, cut costs, maintain proper maintenance and inspection, and preserve the longevity of products and infrastructures.
