International Master
Degree Program

Agricultural Economics
and Management

College of Economics and Management,
Sanya Institute
China Agricultural University

An aerial photograph of a road and agricultural fields. The road is a multi-lane highway with a blue guardrail, curving through the landscape. The fields are a vibrant yellow-green color, likely rice paddies. In the foreground, there are several palm trees and other tropical vegetation. The overall scene is bright and sunny.

The China Agricultural University

China Agricultural University (CAU) is the origin of China's modern agricultural higher education and one of the very top agriculture science based universities in China and the world. It is ranked by US.News the 2nd Agricultural Science University in the world. As the platform for scientific research and talent cultivation on agriculture economics and management, the College of Economics and Management jointly with Sanya Institute of CAU offers the International Master Degree Program in Agricultural Economics and Management at Yazhou Bay Science and Education Park at Hainan Free Trade Port. The Program is to train international top talents for economics, trade and management of agricultural business.

The International Master Degree Program

The Master Degree Program of Agricultural Economics and Management cultivates students to understand the fundamental theories of economics and management, as well as knowledge of agricultural science; to be familiar with the current development status and trends of agricultural economy and trade both domestically and internationally; to learn the basic analytical techniques, method and skills of economics and management; to be familiar with economic and trade laws and international policies; as well as strong language and written expression skills for the business purpose. The Program also offers students great opportunities for internships in different agricultural business and trade enterprises at China and internationally.

The graduate of the Program will be able to work in agricultural business management, domestic and international trade, finance and accounting at all levels of government departments, agricultural and forestry enterprises, international trade organizations and companies, and education or research institutions.

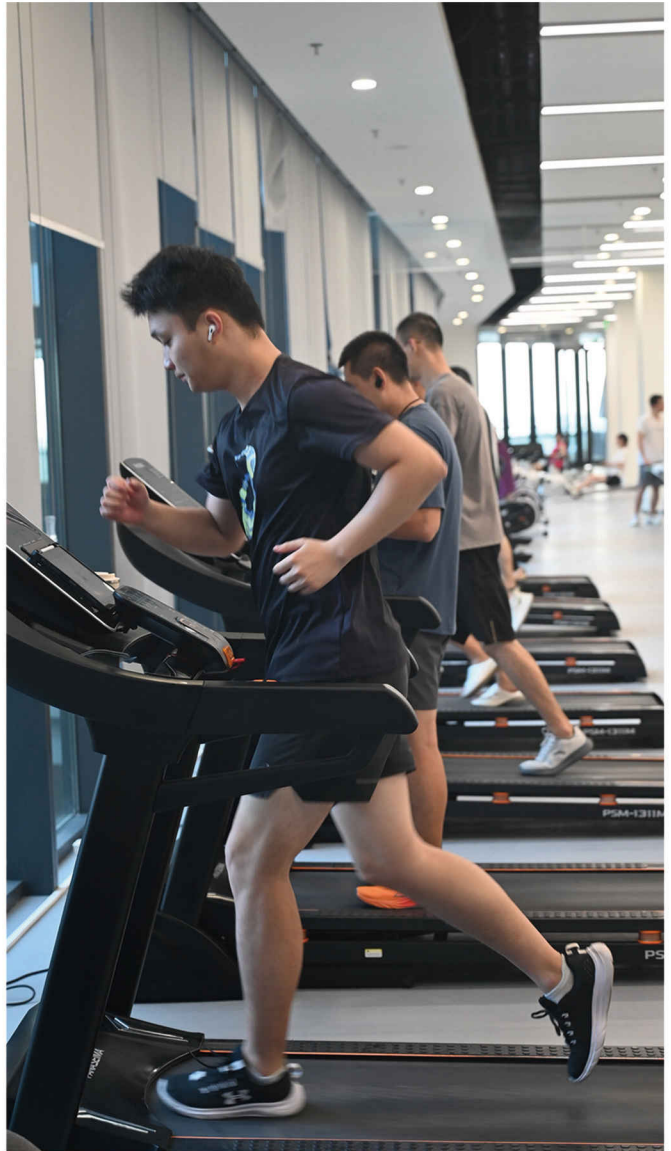

The location of the Program

The Program is located in Sanya Institute of China Agricultural University, Yazhou Bay Science and Education Park, Sanya City, Hainan Free Trade Port, China.

CAU Sanya Institute was established in 2020 with the support of the China's Central Government. The institute has built about 100,000 square meter teaching and research buildings with more than 400 master and doctoral students. Based on the plan of government, in three years, the total postgraduate students will research 1000.

The Yazhou Bay Science and Education Park was built by the Chinese government to develop the Hainan Free Trade Port. Currently, 14 universities and research institutes, including Shanghai Jiao Tong University, Zhejiang University, Chinses Academy of Agricultural Science, and China Agricultural University etc. have established Institutes in the Hainan Free Trade Port. A number of international universities, such as The University of Glasgow, Queen Mary University of London etc. Have also established its international joint colleges in the place.

With Hainan Free Trade Port starting to implement a free trade policy similar to Hong Kong in 2025, it will attract a large number of multinational enterprises and education and high-tech organizations. It is worthwhile to mention that Hainan Province is an island located in a tropical region, with a minimum temperature of 20 degrees Celsius throughout the year and no typhoons. It is the region with the best air quality in China and also the best tourist destination in China, making it very suitable for work and life.
