

ENGINEERING THE FUTURE

The Angus Edghill and Richard Edghill families announce new scholarship fund for Barbadian engineers

THE FAMILIES OF Angus Edghill and Richard Edghill, with a multigenerational legacy in engineering and construction in Barbados, are pleased to announce the **Angus Edghill Engineering Scholarship** in his memory. This privately endowed scholarship will be administered by the Barbados Association of Professional Engineers (BAPE) and aims to support the next generation of Barbadian innovators by providing financial assistance to high-achieving secondary school graduates, pursuing undergraduate degrees in any of the engineering disciplines.

As Barbados continues to advance its national development goals, the need for Barbadians who understand our environmental realities, our society, and the unique challenges we face, while also possessing specialized technical expertise across engineering disciplines, has never been greater. Recognizing the financial hurdles many students face when embarking on their university journey, the Edghill families have committed to funding four annual scholarships starting in the 2026-2027 academic year for the next decade. The goal is to develop highly trained, qualified citizens with the skills to carry Barbados forward as we navigate challenges ranging from global economic uncertainty to climate change.

SCHOLARSHIP HIGHLIGHTS:

- **Eligibility:** Open to Barbadian citizens intending to study engineering at an accredited university, who are graduating from secondary school and have been accepted into an undergraduate engineering program, have already commenced their undergraduate program, or are embarking on a masters.
- **Value:** The award will be made toward expenses related to pursuing an accredited engineering degree program (tuition, books and course materials, and accommodation).
- **Selection Criteria:** Based on academic merit, a demonstrated passion for solving local challenges through engineering, and a commitment to Barbados' future.
- **Applications:** Interested students can apply through BAPE's website.

Angus Edghill Engineering Scholarship

Created to assist Barbadian Engineers and to promote the future of the profession in association with:

BARBADOS ASSOCIATION OF PROFESSIONAL ENGINEERS

APPLICATION PERIOD

1st April to
30th June
2026

DELIVERY OF AWARD

31st July 2026

FIELDS OF STUDY:

- Civil Engineering
- Chemical Engineering
- Electrical Engineering
- Mechanical Engineering
- Other Engineering Disciplines

Ages

18-25 yrs

4 recipients

per annum
with maximum

Award of \$25,000

Use of funds

Tuition fees, books, equipment
and other educational
expenses
