MESSAGE FROM THE DEAN

Welcome to the Faculty of Science & Technology (FST), The University of the West Indies, St. Augustine. We are extremely proud and delighted that you have chosen the FST for your tertiary education. This new Faculty which partially replaces the former Faculty of Science & Agriculture, will continue to focus on traditional and important disciplines in science such as Mathematics, Physics, Chemistry, Computer Science and Biological Sciences. We have also begun new programmes in exciting and important areas of technology such as, Environmental Technology, Information Technology, and Alternative Energy Technology and are in the process of developing new programmes in Biotechnology, Electronics and Computer Technology.

The FST is the second largest faculty at the St Augustine Campus and also the most diverse in terms of academic programmes offered. At the FST we have highly qualified and competent academic, administrative, technical and support staff, and many state-of-the-art laboratories. We promise to offer you an educational experience that is second to none.

This booklet contains important information on Faculty Regulations as well as details on our various programmes and courses. We encourage you to become very familiar with it. We have put in place several support systems in order to facilitate your success in your chosen field of study. We encourage you to visit your academic advisor on a regular basis to seek assistance in planning your academic programme of study. We also have a Student Services Unit and a dedicated Deputy Dean (Student Matters) who is readily available to assist in addressing problems that you may encounter from time to time.

On behalf of the staff of the FST, I wish you a warm welcome as well as an enjoyable and successful stay in our Faculty.

Professor Indar Ramnarine

SECTION II - INTRODUCTION

A. PROGRAMME OFFERING IN THE FACULTY OF SCIENCE AND TECHNOLOGY

1. The Faculty of Science and Technology (FST) offers the following undergraduate programmes leading to the award of BSc degrees:

**BSc IN THE FOLLOWING SPECIAL OPTIONS:**

i. Actuarial Science

ii. Biology with specialisations in:
   a) Plant Biology
   b) Zoology
   c) Ecology & Environmental Biology
   d) Biotechnology

iii. Biomedical Technology

iv. Chemistry

The Faculty also offers a BSc (General) degree with major(s) and minor(s) in various disciplines as shown in TABLE 1.

Note: For detailed information on special options/ majors/ minors, please refer to the relevant Departmental sections of this booklet.
2. The degree of Bachelor of Science is awarded on the basis of a programme of studies selected from courses in the Science disciplines together with certain Foundation courses and in some cases a number of approved courses from other Faculties.

3. FST offers the following BSc degrees (the terms Major, Minor, and Special Option are defined in the Glossary):

(a) **A BSc (General) degree with**
   i. a single major in a FST discipline.
   ii. a joint major in two disciplines only, one of which may be from a Faculty other than the FST.
   iii. double majors in a single FST discipline, currently offered only in Mathematics and Biology.
   iv. a single major in a FST discipline PLUS one or two minors from FST and/or other Faculties.

(b) **BSc Special Option** comprising a prescribed set of departmental, inter-departmental FST or out-of-faculty courses.

(c) **Foundation Courses:**
   i. In order to qualify for the award of a BSc degree in the FST, all students must complete a minimum of nine (9) credits of Foundation Courses. These courses are Level I courses and are designed to augment the general education of students.
   ii. The three Foundation Courses (3 credits each) required to be taken by the FST students are:
      • FOUN 1101 - Caribbean Civilisation
      • FOUN 1102 - Academic Writing for Different Disciplines (Option C)
      • FOUN 1301 - Law, Governance, Economy and Society
   iii. The Foundation Course, FOUN 1210 (Science, Medicine and Technology in Society) will NOT count for credit towards programmes in FST.
   iv. The Foundation courses will be examined on a Pass/Fail basis and will not count towards a student’s GPA.
   v. On entry into the FST a student may be required to pass the English Language Proficiency Test (ELPT) before s/he can register for FOUN 1102. However, students with the following qualifications can register directly for FOUN 1102.
      • Grade I in CSEC English Language, or
      • Grade I or II in CAPE Communication Studies, or
      • Grade A or B in General Paper in the GCE A-Level Examination.

4. The following courses which may consist of both theoretical and/or practical components are offered by the University:

(a) **FST Faculty Courses:**
   These are courses offered by the FST (in-faculty courses). These include Level 0 (or Preliminary) courses in Physics, Chemistry, Mathematics and Biology (taught by the Open Campus on behalf of FST), Level I (or Introductory) and Levels II & III (or Advanced) courses. Preliminary courses may be used to satisfy matriculation requirements or pre-requisites for Level I, II or III courses.
   Preliminary courses, however, do not contribute towards the credit requirements for the award of the BSc degree but contribute towards a semester credit loading.

(b) **Service Courses:**
   These provide students with basic technical and analytical skills.

(c) **Out-of-Faculty Courses:**
   These are courses offered by Faculties other than FST which may contribute towards the requirements for the award of a degree. Approval must be granted by the Dean before a student can pursue an out-of-Faculty course if such course is not part of the candidate’s degree programme.

(d) **Foundation Courses:**
   i. In order to qualify for the award of a BSc degree in the FST, all students must complete a minimum of nine (9) credits of Foundation Courses. These courses are Level I courses and are designed to augment the general education of students.
   ii. The three Foundation Courses (3 credits each) required to be taken by the FST students are:
      • FOUN 1101 - Caribbean Civilisation
      • FOUN 1102 - Academic Writing for Different Disciplines (Option C)
      • FOUN 1301 - Law, Governance, Economy and Society
   iii. The Foundation Course, FOUN 1210 (Science, Medicine and Technology in Society) will NOT count for credit towards programmes in FST.
   iv. The Foundation courses will be examined on a Pass/Fail basis and will not count towards a student’s GPA.
   v. On entry into the FST a student may be required to pass the English Language Proficiency Test (ELPT) before s/he can register for FOUN 1102. However, students with the following qualifications can register directly for FOUN 1102.
      • Grade I in CSEC English Language, or
      • Grade I or II in CAPE Communication Studies, or
      • Grade A or B in General Paper in the GCE A-Level Examination.

5. Courses normally extend over one (1) semester, but in special cases may extend over two (2) semesters.
6. The weight of a course is expressed in terms of credit hours, and the credit-weighting of a course is determined by the Faculty which administers the courses. In general, a course with one contact hour per week for one semester has a weighting of one credit.

C. CO-CURRICULAR CREDITS

7. Courses involving independent, supervised activities which would earn the student co-curricular credits may be pursued upon approval by the Campus Academic Board. The co-curricular programme allows you to choose from a range of non-academic courses that help you to acquire characteristics to excel in life in the 21st century. These courses are practical in nature and help you to develop attributes which are critical for your success.

i. Students are eligible to register for co-curricular credits after their first semester of studies.

ii. Each student is eligible to count no more than three (3) credits towards his/her degree for involvement in co-curricular activities.

iii. The programme of co-curricular activities must have the approval of the Faculty and Academic Board before it is undertaken by the student.

iv. A Deputy Dean with responsibility for Outreach is the Faculty’s Coordinator for the co-curricular programme. Please consult with the Coordinator if you are interested in pursuing co-curricular activities.

v. Co-curricular credits will be awarded on the following basis:
   - students must be involved in the activity for at least one (1) semester
   - explicit learning outcomes must be identified for each activity
   - there must be clearly defined mode(s) of assessment for each activity

vi. The grading of co-curricular activities will be on a pass/fail basis and will not contribute to a student’s GPA.

vii. The three Level I credits earned for involvement in co-curricular activities may be included as part of the overall general credit requirement for the award of the BSc General Degree. However, such credits earned shall NOT be used in the computation of a student’s Weighted Grade Point Average for determining the Class of Honours.

viii. For further details on co-curricular offerings, please consult the Deputy Dean (Outreach) or visit the website at http://sta.uwi.edu/cocurricular/

Examples of approved co-curricular offerings are:

- COCR 1001 - Sports: Minding SPEC (3 Credits)
- COCR 1002 - Debating (3 Credits)
- COCR 1003 - Leadership and/or Service (3 Credits)
- COCR 1012 - Workplace Protocol for Students (3 Credits)
- COCR 1030 – Technology Literacy (3 Credits)
- COCR 1031 – Managing My High (MY HIGH): Alcohol, Drugs and Addictive Behaviours (3 Credits)

Professional Microsoft Office - offered by Campus IT Services (CITS) in conjunction with the FST include:

- COCR 1025 - Microsoft Office Word 2010 (1 Credit)
- COCR 1026 - Microsoft Office Excel 2010 (1 Credit)
- COCR 1027 - Microsoft Office PowerPoint 2010 (1 Credit)
- COCR 1028 - Microsoft Office Outlook 2010 (1 Credit)
- COCR 1029 - Microsoft Office Access 2010 (1 Credit)

D. EVENING UNIVERSITY

8. Currently, the FST offers only the BSc in Information Technology through the Evening University. Please consult the section under the Department of Computing and Information Technology in this booklet for specific details of the programme offered.

9. Students in the Evening University Programme will normally be required to register for a maximum of 9 credits of courses per semester. There will be three semesters per year in the Evening University. Classes will normally be held during the hours of 5:00-10:00 p.m. on weekdays and also on Saturdays. For further general information about the Evening University Programmes, please contact the Office of the Evening University or visit the website http://sta.uwi.edu/evening/introduction.asp
E. **DEAN’S HONOUR ROLL**

10. **Eligibility for inclusion on the Dean’s Honour Roll**

The following guidelines are applicable:

(a) Inclusion on the Dean’s Honour Roll will be on a Semester basis. The Summer School Programme will not be considered.

(b) Students must obtain a Semester GPA of 3.8 and above in any semester

(c) Full-time students must have passed a minimum of 12 Faculty credits in the semester. Part-time and Evening University students must have passed a minimum of 6 credits of Faculty courses in the semester.

Credits gained for the following will NOT be taken into consideration in computing the Dean’s Honour Roll:

- Foundation courses
- Co-curricular offerings
- Internship programmes
- Audited courses
- Summer courses
- Not-for-credit courses

(d) Repeat courses will be included in the computation of the Semester GPA towards the Dean’s Honour Roll

(e) Special consideration will be given to students who are differently-abled and who have obtained a semester GPA of 3.8 and above but who have registered for less than 12 Faculty credits.

Such students must declare and provide supporting documents as evidence of their disability at the start of the semester.

Decisions for inclusion of such differently-abled students in the Dean’s Honour Roll will be taken at the Faculty’s Board of Examiners Meeting. In addition, such students must be registered with the Academic Support/Disabilities Liaison Unit (ASDLU).

F. **ACADEMIC SUPPORT/DISABILITIES LIAISON UNIT (ASDLU)**

11. The Unit is the first and most important stop for high quality academic support for the diverse population of students throughout the University including full-time, part-time and evening students, international students, student athletes and students with special needs.

(a) **Support Services for STUDENTS WITH SPECIAL NEEDS (Temporary and Permanent)**

- Provision of aids and devices such as laptops, USB drives, tape recorders and special software
- Special accommodations for examinations
- Classroom accommodations
- Academic support
- Liaison with faculties and departments

Students with special needs should make contact before or during registration. Every effort will be made to facilitate your on-campus requirements in terms of mobility, accommodation, coursework, examinations, and other areas.

No student of The UWI will be discriminated against on the basis on having special needs. Sharing your needs before registration will enable us to serve you better as a part of the Campus community.

(b) **Academic Support Services for ALL STUDENTS**

- Educational Assessment – LADS (dyslexia) – LASSI (Study Skills)
- Examination Strategies
- Workload Management
- Career Planning
- Study Skills
- Peer Tutoring

(c) **How do I register at ASDLU?**

- Visit ASDLU to make an appointment to meet the Co-ordinator.
- Complete the required registration form
- Students with disabilities must submit a medical report from a qualified medical professional
- An assessment of the student’s needs will be conducted
- The required assistance will be provided

All Students experiencing academic challenges should communicate with Ms. Jacqueline Huggins, Coordinator, Academic Support/Disabilities Liaison Unit, south of The Alma Jordan Library.

Tel: 662-2002 Exts 83921, 83923, 83866, 84254.

Hours: Monday, Wednesday & Friday 8:30 am – 4:30 pm

Tuesday & Thursday to accommodate Part-time and Evening students.

Email: ASDLU.Office@sta.uwi.edu

Registration forms are available at the office or from the website at www.sta.uwi.edu/asdlu

SECTION IV - Faculty Regulations

All students of the University are subject to University Regulations approved by the Senate of the UWI. Where there is conflict between the regulations of any Faculty and the University Regulations, the University Regulations shall apply.

G. Qualifications for Admission into the Faculty

11. In order to be admitted to the three-year degree programme, candidates must satisfy the University requirements for Matriculation (see the University Regulations for Undergraduate Students) and have passed the CSEC General Proficiency Level examination at Grades I, II or, since 1998, Grade III (or equivalent qualifications) in Mathematics, English Language and three additional subjects listed in Appendix 2.

12. Candidates must also:
   (a) have obtained passes in a minimum of two two-unit subjects at CAPE (or GCE A-Level or equivalent qualification), or
   (b) have an approved Associate Degree or equivalent certification with a minimum GPA of 2.5 in a relevant programme from a tertiary level institution recognised by UWI, or
   (c) have any other appropriate qualifications acceptable to the FST.

13. In addition to the above general qualifications for admission, candidates must also satisfy the specific subject requirements for entry into the various FST programmes they wish to pursue. These are listed in TABLE 2:

TABLE 2: CAPE (GCE A-LEVEL OR EQUIVALENT) QUALIFICATION FOR ENTRY INTO VARIOUS FST PROGRAMMES*
### H. APPLICATION PROCEDURE

14. Applications for entry to the FST must be received by the Admissions Section of the Registry by January 31st of the year in which the applicant wishes to enter and shall be accompanied by certified evidence of all relevant examinations passed. Students are encouraged to apply online at [http://www.uwi.edu/students/admissions.aspx](http://www.uwi.edu/students/admissions.aspx).

### I. LIST OF EXEMPTIONS

15. Provided that requirements to Statute 47 are fulfilled, students admitted to the FST may be exempted with or without credits from Level I and/or Level II or Level III courses if they:

- are holders of degrees from approved universities; or
- have partially fulfilled the requirements of such degrees; or
- are holders of Associate Degrees from approved tertiary level institutions; or
- have transferred from different BSc degree programmes or from other programmes of study within the University.

Application for exemptions must be made upon entry to the Registry (Admissions Section).

16. Where exemptions without credits are granted, students will be required to pursue alternative courses as approved by the Head of Department. The following is a list of exemptions with/without credits currently offered by the FST:

(a) COSTAATT Associate Degree Graduates in ENVIRONMENTAL MANAGEMENT:
Students with a GPA of 2.75 or better admitted into the ENVIRONMENTAL AND NATURAL RESOURCE MANAGEMENT PROGRAMME will be exempted WITH CREDIT from the following:
- BIOL 1462
- AGBU 1005, AGBU 1002 and AGSL 1000 (offered by the FFA)

(b) COSTAATT Associate Degree Graduates in ENVIRONMENTAL TECHNOLOGY:
Students with a GPA of 2.75 or better admitted into the ENVIRONMENTAL AND NATURAL RESOURCE MANAGEMENT PROGRAMME will be exempted WITH CREDIT from the following:
- BIOL 1462
- AGRI 1012, AGSL 1000, AGBU 1002 (offered by the FFA)

(c) COSTAATT Associate Degree Graduates in ENVIRONMENTAL ENGINEERING:
Students with a GPA of 2.75 or better admitted into the ENVIRONMENTAL AND NATURAL RESOURCE MANAGEMENT PROGRAMME will be exempted WITH CREDIT from the following:
- AGSL 1000 (offered by the FFA).

(d) COSTAATT Associate in Science Degree in BIOLOGY:
Students entering the Faculty with a GPA of 2.75 and above in the COSTAATT Associate in Science Degree in Biology will be exempted WITH CREDIT from the following:
- CHEM 1062, BIOL 1262, BIOL 1263, BIOL 1362, BIOL 1364 and BIOL 1462
(e) COSTAATT Associate in Science Degree in CHEMISTRY:
Students entering the Faculty with a GPA of 2.75 and above in the COSTAATT Associate in Science Degree in Chemistry will be exempted WITH CREDIT from the following:
• CHEM 1065, CHEM 1066, CHEM 1067 and CHEM 1068

(f) COSTAATT Associate in Science Degree in PHYSICS:
Students entering the Faculty with a GPA of 2.75 and above in the COSTAATT Associate in Science Degree in Physics will be exempted WITH CREDIT from the following:
• PHYS 1211, PHYS 1212, PHYS 1213, PHYS 1214, PHYS 1215 and PHYS 1216.

(g) Students who have The UWI ROYTEC Associate Degree in Information Systems Management (ADISM) with a minimum GPA of 2.50 will be accepted for entry without exemption/credits into the following programmes:
• BSc General (Major/Minor (Computer Science)
• BSc Computer Science
• BSc Computer Science and Management
• BSc Information Technology

(h) UWI ROYTEC Associate Degree in Information Systems Management (ADISM). Students with a GPA of 2.75 or better admitted into the BSc INFORMATION TECHNOLOGY programme will be exempted with credits from the following courses:
• INFO 1500, INFO 1501, INFO 1502, INFO 1503, INFO 1504, INFO 1505, INFO 1506, INFO 1507.
and will be permitted to register for Level II courses:

J. REGISTRATION

17. (a) A student pursuing a degree in the FST may register as a full-time student, a part-time student or as an Evening University student. A student may apply to change his/her status during the tenure of the degree.

(b) A student who is in full-time employment may pursue a degree as a part-time student or as an Evening University student only.

(c) Full-time students may take up employment for not more than 12-hours per week without losing their full-time status. A student who is employed for more than 12-hours per week shall be registered as a part-time or an Evening University student.

(d) A full-time student is normally expected to register for 12 to 15 credits per semester at Level I and 12 to 16 credits per semester at Levels II/III.

(e) A part-time student is normally expected to register for 6 to 9 credits per semester offered under the day programme.

(f) An Evening University student is normally expected to register for 6 to 9 credits per semester at Level I and 6 to 12 credits per semester at Levels II/III.

18. (a) Students must register for courses that they wish to pursue by the dates prescribed by the Campus Registrar.

(b) Changes to registration (add/drop courses) will be permitted only within the prescribed periods at the start of Semesters I and II. (Refer to the Campus Web Site and Notice Boards for actual dates)

(c) A student’s registration for a course is complete only after his/her financial obligations to the University have been fulfilled.

19. (a) Registration for any course constitutes registration for the associated examination. A student will therefore have failed the course if s/he does not attend the examination without having previously been allowed to withdraw from the course or without having tendered evidence of illness at the time of the examination, certified by a medical practitioner recognised by the University. In the latter case, the medical report must reach the Campus Health Service Unit (HSU) no later than seven days after the date of the relevant examination.

(b) Medical Certificate/Report forms are available online at http://sta.uwi.edu/onlineForms.asp

(c) In cases where the medical submitted for a missed coursework examination is approved by the Campus HSU, the candidate shall be granted a substitute coursework examination at a date prescribed by the relevant Department.

(d) In cases where the medical submitted for a missed final examination is approved by the Campus HSU, the grade designation of AM (Absent Medical) will apply provided that the student has passed the coursework in that particular course. The designation AM carries no penalty.
20. (a) A student who has passed a course will not be permitted to re-register for that course.

(b) A student may not be allowed to register for a course on the grounds of repeated failure or poor performance in that course.

K. PROGRESS THROUGH THE PROGRAMME

21. (a) Students admitted to the three-year programme, in addition to registering for the required Level 1 courses, may also register for a maximum of 12 credits in ONE of the Preliminary subjects offered (Biology, Chemistry, Mathematics or Physics) for the purpose of obtaining pre-requisites for entry into a programme of choice. However, the total permissible credit loading per semester must not be exceeded.

(b) Students may not register for preliminary courses in a subject which overlaps substantially with CAPE/GCE A-Level courses (or equivalent) previously passed.

(c) Full-time students are required to register for Level I Faculty courses equivalent to a MINIMUM of twelve credits, per semester.

(d) Part-time students are required to register for courses equivalent to a MINIMUM of 6 credits per semester.

(e) Evening University students are required to register for courses equivalent to a MINIMUM of 6 credits per semester.

(f) In order to satisfy the minimum requirement for entry to the advanced part of the programme (Level II and III), a student must normally record passes in Level I courses equivalent to a minimum of twenty-four (24) credits of Faculty courses.

(g) A student who has obtained passes in Level I Faculty courses equivalent to twelve (12) credits in the first two (2) semesters of full-time study may, on the approval of the Dean, be allowed to register for a limited number of Level II courses in addition to those courses required to complete Level I requirements. However, the total credit loading per semester must not be exceeded.

(h) Full-time students who require NOT MORE THAN TWENTY (20) CREDITS in order to graduate, who have satisfied all Foundation course requirements, and are exempted from laboratory coursework in at least one course, may be allowed to register for twenty (20) credits of Faculty courses with the permission of the Dean.

L. STUDY ABROAD/EXCHANGE PROGRAMMES

22. UWI students, while at exchange Universities, will continue as regular full-time students of the University of the West Indies. Such students will pay UWI tuition fees and pursue matching and/or approved courses for credit. Credits earned abroad will be transferred to UWI and applied to regular Faculty degree requirements in accordance with Regulations 47.

23 (a) FST students who wish to participate in an exchange programme at an approved institution and desire to have the credits obtained used toward a UWI degree, must obtain written approval in advance from the Dean and register for equivalent courses offered by FST. Failure to do so may preclude the acceptance of the credits earned at the exchange institution.

(b) Students must normally have a minimum Cumulative GPA of 3.0 and have spent at least two semesters of full-time study at UWI to qualify for the Exchange Programme.

(c) Where the course to be taken is to be substituted for a UWI course, the content of the course must be certified in advance by the relevant Department as being equivalent to the UWI course. Course outlines and syllabuses must be provided by the student in order to facilitate the evaluation process.

(d) Only grades earned at the exchange institution and not the marks shall be used in the computation of the student's GPA.

Students are advised to visit the website of the Office of Institutional Advancement and Internationalization (International Office) for a current list of Universities with which UWI has entered into cooperative arrangements for study exchanges at http://sta.uwi.edu/international or contact:

M. EXAMINATIONS

24. In order to pass a course, a student must have satisfied the examiners in the associated examinations and must have attended at least 75% of classes associated with that course.

25. The Academic Board on the recommendation of the Faculty Board concerned, may debar a student from writing the examination associated with a course, based on attendance of less than 75% of lectures/laboratory classes/tutorials. The designation recorded for such a candidate in that course will be DB (debarred).

26. The examination associated with each course shall be conducted mainly by means of written and/or practical papers, normally taken at the end of the semester. However, oral examinations as well as performance in coursework in the form of essays, in-course tests, research papers, projects, or continuous assessment of theoretical and/or practical work may contribute towards the final grade awarded in a course. (Refer to individual course outlines and the departments for the specific modes of assessment and their weightings)

27. When practical papers and/or practical coursework contribute towards an examination, candidates must satisfy the examiners in both the theoretical and practical aspects of the course (unless specified otherwise). On the basis of performance in the practical part of the course, students may, on the recommendation of the Department concerned, be exempted from the practical part of the final examination.

28. (a) A student may be granted supplemental oral examinations in failed Level II/III courses accounting for not more than eight (8) credits provided that the student has completed all level I requirements and passed a minimum of 30 levels II/III credits.

(b) Students passing such oral examinations will be awarded the minimum pass mark of 40% (Grade D, Quality Point 1.0) and will not have any right of appeal or review of the outcome.

(c) Students offered oral examinations may choose to decline the offer.

29. A student who fails the examination associated with a course may be given permission to repeat the course and the examination on subsequent occasions.

30. In the event that such a student has satisfied the examiners in the practical coursework component of the failed course, the candidate may, on the recommendation of the relevant Department, be exempted from the laboratory coursework.

31. A Remedial course in FST offered as part of the Summer School Programme is considered a repeat of the course.

N. PLAGIARISM DECLARATION

32. A declaration must be made in accordance with the University Regulations on Plagiarism (First Degrees, Diplomas and Certificate) and must be attached to all work submitted by a student to be assessed as part of, or the entire requirement of the course, other than work submitted in an invigilated examination. By signing this declaration, a student is declaring that the work submitted is original and that it does not contain any plagiarised material. See Appendix 3 at the back of this booklet for the Plagiarism Declaration and the University's Regulations regarding Plagiarism.
O. GENERAL REQUIREMENTS FOR THE AWARD OF THE DEGREE

33. In order to be eligible for the award of the BSc degree in FST, students must have:
   
   i. been in satisfactory attendance for a period equivalent to at least six (6) semesters of full-time study from entry at Level I
   
   ii. obtained passes in Levels I, II and III and Foundation Courses amounting to the number of credits shown in TABLE 3
   
   iii. a minimum Weighted Grade Point Average of 1.00
   
   iv. the minimum 93 credits required for the award of a BSc General Degree, a MINIMUM of 24 Level I credits of which 12 must be FST credits and at least a major from FST, or
   
   v. a minimum of two years of full-time study and 60 credits provided that they possess qualifications from another recognised tertiary level institution.

PLEASE NOTE CAREFULLY THAT THE CREDIT REQUIREMENT FOR THE AWARD OF THE BSc DEGREES VARIES DEPENDING UPON THE PROGRAMME YOU ARE PURSUING

34. Students will be granted credits only once for the same course offered under different majors/minors. In such cases students will be required to pursue alternative courses which must be approved by the Dean.

35. Exemptions from specific parts of the degree programme may be obtained under the provision of Regulations 15 and 16.

P. DECLARATION OF MAJORS, MINORS AND SPECIAL OPTIONS

36. (a) Students are required to register for a major/special option upon initial entry into the Faculty. However, students may request a change in major/minor option as they progress along their degree. Students desirous of pursuing majors in a Faculty other than FST must apply for and obtain official approval from that Faculty before pursuing such majors.

   (b) Students must make a final declaration of their proposed majors/minors/special options by the end of the registration period of the semester in which they intend to graduate.

   (c) Students who have met the requirements for the degree for which they have registered/declared may not register for further courses in pursuit of that degree.

Q. TIME LIMITS FOR COMPLETION AND ENFORCED WITHDRAWALS

37. (a) A Semester grade point average (GPA) based on grades earned on all approved courses for which the student is registered in a semester, will be used as the basis for the determination of his/her academic standing.

   (b) A student whose GPA in any Semester is less than 1.00 will be placed on warning.

   (c) A Dean’s Hold will be placed on a student on warning. Such a student will have to seek academic advising from the Dean before the Dean’s hold can be removed. This MUST be done within the prescribed registration period at the start of the Semester. A reduced academic load may be recommended.

* NB: This is the MINIMUM REQUIREMENT and may vary depending upon the credit requirements for the major/minor you are pursuing
(d) A student who is on warning and who fails to obtain a semester GPA of at least 1.00 in the succeeding semester will be required to withdraw from the Faculty.

38. For the purposes of Regulation 39 below, any semester in which a student is registered part-time, will be counted as half of a semester of full-time study.

39. (a) Full-time students will normally be required to complete the requirements for the degree in a minimum of six or a maximum of ten semesters of full-time study.

(b) Students who do not complete the programme within the maximum period stated in Regulation 39 (a) above will normally be required to withdraw from the Faculty at the end of the academic year in which the maximum time limit is reached.

40. In the event that a student has exhausted the maximum period stated in Regulation 39(a), but still requires for the completion of the degree programme:

(a) passes in courses totaling no more than eight (8) credits, and/or

(b) passes in Foundation courses only,

approval may be sought from the Board for Undergraduate Studies for an extension of the period of study by one or two consecutive semesters.

41. For the purposes of Regulation 39(a) any semester for which a student has obtained Leave of Absence from the Faculty shall not be counted.

42. A student who was required to withdraw for reasons of failure to progress may be re-admitted to the Faculty on the following conditions:

(a) A minimum of two consecutive semesters has elapsed since the date of withdrawal.

(b) The FST is satisfied that the contributing circumstances for the withdrawal have altered substantially.

(c) All grades previously obtained, (except those for courses that have been deemed outdated), shall continue to apply for the purpose of determining the student’s GPA.

(d) Courses pursued in the UWI Summer School during the period of withdrawal shall be included in all relevant grade point average calculations if the student re-enters the Faculty.

43. (a) A student who was required to withdraw from the Faculty must apply for re-entry by the date prescribed by the Campus Registrar. A student will not be admitted before a year has elapsed. Application for re-entry must be done prior to the deadline for applications as follows:

(b) A student who is required to withdraw at the end of Semester I of an academic year must reapply by 15th December of the following academic year for readmission in Semester II of that academic year.

(c) A student who is required to withdraw at the end of Semester II or Summer Session of an academic year must reapply by 30th January of the following academic year for readmission in Semester I of that academic year.

(d) A student who was required to withdraw and was re-admitted and then required to withdraw for a second time, will not normally be considered for re-admission again until a minimum period of five years has elapsed.

R. LEAVE OF ABSENCE AND VOLUNTARY WITHDRAWAL

44. (a) A student who wishes to be absent from the Faculty for a semester or more may apply for Leave of Absence.

(b) Leave of Absence will not be granted for more than two consecutive semesters in the first instance. However, students may apply for an extension of Leave of Absence.

(c) Leave of Absence will not be granted for more than two consecutive years.

(d) Applications for Leave of Absence should normally be submitted no later than the end of the prescribed change in registration period in the relevant semester.

45. A student who does not register for any course during a semester without having obtained Leave of Absence will be deemed to have withdrawn from the University and will have to re-apply for entry to the University if s/he so desires.
46. A student who voluntarily withdraws from the University and then applies for re-admission within five (5) years shall be granted exemption and credit for all courses previously passed unless the Department concerned declares that the material covered in a course has become outdated. All grades previously obtained except those for courses declared outdated shall be used in the determination of the GPA of such a student.

S. GPA AND CLASS OF DEGREE AWARDED
47. (a) All students in the FST, irrespective of their date of entry into the FST, are subject to the current GPA regulations.

(b) A Cumulative Grade Point Average based on all courses completed for which grades have been obtained (excluding Preliminary courses, those taken on a Pass/Fail basis, audited courses and courses designated I or IP), will be calculated and recorded on the student's transcript.

(c) A Weighted Grade Point Average based on grades obtained on ALL LEVEL II AND III COURSES registered for, including all courses in the declared major(s)/minor(s)/option whether passed or failed, will be used in the calculation for determination of the class of the degree. (See Regulations 48 and 49 for the relationship between marks, Grade Point Average and Class of Honours).

(d) First Class Honours, Second Class Honours (Upper and Lower Division), or a Pass degree will be awarded on the basis of the Weighted Grade Point Average (GPA) of all Level II/III courses taken (passed and failed).

T. GRADING SCHEME
48. The Grading Scheme used in the FST is as follows:

<table>
<thead>
<tr>
<th>Mark</th>
<th>Grade</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>86-100</td>
<td>A+</td>
<td>4.3</td>

<td>1.3</td>
</tr>
<tr>
<td>40-42</td>
<td>D</td>
<td>1.0</td>
</tr>
</tbody>
</table>

Minimum pass grade is a D with a quality point of 1.0.

U. CLASS OF HONOURS
49. A student’s class of degree will be based on his/her Weighted Grade Point Average (GPA) as follows:

<table>
<thead>
<tr>
<th>Honours</th>
<th>Weighted GPA</th>
</tr>
</thead>
<tbody>
<tr>
<td>First</td>
<td>3.60 – 4.3</td>

V. AEGROTAT DEGREE
50. (a) A candidate who, by virtue of illness, was prevented from attending examinations or part of the examinations associated with one or more Level II/III courses in the year of anticipated graduation may apply to the Board for Undergraduate Studies through the University Registrar for an Aegrotat pass in the course. Such an application will only be granted if all the following conditions are satisfied:

i. The relevant Head of Department reports that, on the basis of the candidate’s performance during the period preceding the examinations, the candidate was expected to pass the examinations concerned and has satisfactorily completed any associated coursework.

ii. The application reaches the University Registrar not later than thirty (30) days after the date of the last paper in the examination concerned.

iii. The application is accompanied by a medical certificate attesting to the illness and issued by a medical practitioner recognised for this purpose by the University.

(b) No grade will be awarded in respect of an Aegrotat pass, and a candidate, having been awarded an Aegrotat pass, will not be allowed to re-enter the examination for the course concerned on a subsequent occasion. An Aegrotat pass may not be used to satisfy a Prerequisite for other Level II/III courses.

(c) A candidate, having satisfactorily completed the degree programme, who includes Aegrotat passes in courses counted for the degree programme, will be eligible for the award of an Aegrotat degree, provided that both of the following conditions are satisfied:

i. the courses in which the Aegrotat passes have been granted (and which need to be counted towards the award of the degree) are equivalent to no more than twenty-four (24) credits.

ii. no more than sixteen (16) credits mentioned in c (i) above arise from courses making up the candidate’s major.

(e) The Aegrotat degree will be awarded without Honours.
SECTION V - REGULATIONS GOVERNING THE FST SUMMER SCHOOL PROGRAMME

The FST generally offers remedial courses for students who are repeating laboratory-based and/or non laboratory-based courses during the Summer School. The FST may also offer a limited number of full courses that are non laboratory-based in the Summer School. The maximum number of credits for which a student may register in Summer School is normally nine (9).

1. ELIGIBILITY FOR ADMISSION TO THE SUMMER SCHOOL PROGRAMME
The following categories of students are eligible for admission to the Summer School Programme:

a. Registered students of the University who have to repeat any of the course(s) offered.

b. Registered students of the University who have not taken the course(s) previously but fall into one of the following categories:
   - Students of the University who have not yet completed the requirements for the degree, diploma or certificate programme for which they are registered.
   - Registered UWI students from other UWI campuses.

c. Students of the University who have been granted (a) leave of absence for Semester 1 and/or 2 preceding the Summer School Programmes, or (b) permission to Write “Examinations Only”, or (c) who have been asked to withdraw and are desirous of continuing with their programme of study

d. Other persons, not students of the University, who are eligible to matriculate at either the normal or lower level or as a mature student

2. APPLICATIONS
Please visit the Campus Website for further information.

3. FEE PAYMENT
Students will be required to pay a fee for each course registered for in the Summer School Programme. This fee is subject to change. Please visit the university website for current fees.

4. ATTENDANCE
MINIMUM ATTENDANCE of 75% of Lectures/Tutorials is required. Attendance at laboratory classes/field trips is compulsory.

5. COURSE SELECTION AND REGISTRATION
Persons desirous of pursuing courses in the Faculty’s summer programme are required to visit the website at http://www.sta.uwi.edu/ or consult the Faculty Notice Boards and timetables for a list of courses being offered in the Summer School Programme before registering.

6. LATE REGISTRATION
a. Students may be permitted to register up to the end of the 2nd week of the start of the Summer School Session on payment of an additional late registration fee of TT$150.

b. In cases where examination results for Semester II are declared after May 31, students may be permitted to register up to the end of the 2nd week of the start of the Summer School session.

c. Summer School students may apply for a change of registration by no later than the end of the 2nd week of the start of the Summer School session.

6. EXAMINATIONS & COURSE LOADS
a. Examinations for courses taught in the Summer School shall be conducted in accordance with the University Examination Regulations.

b. Summer School students shall write the University Examinations appropriate to the course(s) for which they are registered.

c. Students shall not normally be permitted to register for more than THREE one-semester courses (usually 9 credits) in any given Summer School Session. Students are advised to check the timetable before registering.

d. Finalising students may apply, to the Faculty Dean to pursue up to a maximum of 12 credits.

e. A student is deemed as finalising if that student has only a maximum of 12 credits left to complete the degree/certificate/diploma requirement.
Students may request permission to carry forward coursework marks for courses pursued in Semester I and/or II to the Summer Programme.

All such requests must be submitted, through the Faculty Dean, to the Assistant Registrar, Student Affairs (Admissions) before the student is allowed to register.

NOTE: Registration for a course offered in the Summer School implies registration for the examination of that course.

7. AWARD OF CREDITS
   a. Credits for courses successfully completed in the Summer School shall be granted to registered students of the University including those on approved leave of absence.
   b. Persons wishing to pursue a course(s) to be considered as ‘Not for Credit’ (NFC) must seek approval prior to registering for the course. All such requests must be made, in writing, or on the required form, to the Dean of the Faculty. Students will not subsequently have such credit altered.
   c. Summer School students who have not been offered a place at the University have no automatic right of acceptance into any Faculty of the University.
   d. Persons who are accepted into the University may be granted credit/exemption for courses successfully completed in the Summer School provided that five (5) yeas have not elapsed since the completion of the relevant course(s).
   e. Students who do not satisfy normal matriculation may not use the credits gained in the Summer School for both matriculation and degree purposes.

8. APPLICATION FOR WITHDRAWAL
   a. Students may withdraw from a course by applying to the Assistant Registrar (Admissions) in writing and copying the Faculty Dean or Summer School Coordinator. The student should clearly state the reasons for the withdrawal and complete the required application form for refund where applicable.
   b. Applications for withdrawal from a course must reach the Assistant Registrar (Admissions) no later than two (2) weeks after teaching has begun. Students, who wish to withdraw from a course after the deadline date, must apply to Academic Board, through their respective Faculty Office.

9. REFUND POLICY
   a. A refund penalty is charged as follows:
      i. No penalty before May 30th, 2014
      ii. 25% of tuition fees up to June 2, 2014 (up to the end of the 1st week of teaching)
      iii. 30% of tuition fees up to June 9, 2014 (up to the end of the 2nd week of teaching)

10. PAYMENT OF FEES
    a. Part payment of fees is NOT allowed
    b. Fees must be paid at any Branch of Republic Bank Ltd. using the bank deposit slip provided
    c. Registration in the summer session will carry a non-refundable registration fee
    d. Courses not dropped by the deadline date will be counted and the student would be billed accordingly.
    e. Late registration fee/late payment penalty includes the registration fee PLUS the Late Registration fee/late payment penalty.
SECTION VI - PRIZES

A number of prizes are offered on an annual basis to students in the Faculty based on outstanding academic performance. The following is a list of such prizes. Note that this list is subject to alteration.

**FACULTY PRIZES**

These prizes are awarded to all First Class Honours students within the Faculty by the Office of the Dean.

**DEPARTMENT OF CHEMISTRY**

- **THE WESTERN SCIENTIFIC PRIZE**
  Awarded for the best Year I performance in Chemistry

- **THE BERGER PAINTS TRINIDAD LTD. PRIZE**
  Awarded for the best Year II performance in Chemistry

- **THE CHROMASPEC LTD. PRIZE**
  Awarded for the best Year II performance in Chemistry & Management

- **THE INDUSTRIAL GASES LTD. PRIZE**
  Awarded for the best Year III performance in Chemistry

- **THE SOUTHERN SYSTEMS LTD. PRIZE**
  Awarded for the best graduating student in Chemistry

- **THE PERKIN ELMER/SCALAR SCIENTIFIC PRIZE**
  Awarded for the best performance in Analytical Chemistry

- **THE WESTERN SCIENTIFIC PRIZE**
  Awarded for the best Year III performance in Chemistry & Management

- **THE CHERYL BOWLES CHALLENGE TROPHY PRIZE**
  Awarded for the best Final Year Analytical Chemistry Project

- **THE ANIL DEISINGH PRIZE**
  Awarded for the best Graduating Student entering the Chemistry Postgraduate Programme

**DEPARTMENT OF LIFE SCIENCES**

- **PLANT SCIENCE**
  - **THE PROFESSOR E.J. DUNCAN PRIZE**
    Awarded for the best Research Project in Plant Science

- **BIOCHEMISTRY**
  - **THE BRYDEN PI CARIBBEAN PRIZE**
    Awarded for the best Year II performance by a student majoring in Biochemistry

- **THE ANGOSTURA LIMITED PRIZE**
  Awarded for the best Year III performance by a student majoring in Biochemistry

**BIOLOGY**

- **THE REPUBLIC BANK LTD. PRIZE**
  Awarded for the best Year I performance in Biology

- **THE NEAL AND MASSY PRIZE**
  Awarded for the best Year II performance in Biology

- **THE NEAL AND MASSY PRIZE**
  Awarded for the best Year III performance in Biology

- **THE SEETERRAM BOOK CENTRE PRIZE**
  Awarded for the best overall performance in Biology – Book Voucher Prize

**DEPARTMENT OF COMPUTING AND INFORMATION TECHNOLOGY**

- **THE IBM WORLD TRADE CORPORATION PRIZE**
  Awarded for the best Year I performance in Computer Science

- **MINDBASE CONSULTING LTD. PRIZE**
  Awarded for the best Year I performance in Information Technology

- **THE TUCKER ENERGY SERVICES HOLDINGS LTD. PRIZE**
  Awarded for the best Year II performance in Computer Science

- **THE RBC ROYAL BANK OF TRINIDAD & TOBAGO LTD. PRIZE**
  Awarded for the best Year II performance in Information Technology

- **THE FUJITSU TRANSACTION SOLUTION LIMITED PRIZE**
  Awarded for the best Year III performance in Computer Science

- **THE DIGI DATA SYSTEMS LTD. PRIZE**
  Awarded for the best Year III performance in Information Technology

- **ATLANTIC CO. OF TRINIDAD AND TOBAGO PRIZE**
  Awarded to the most outstanding graduate: B.Sc. General (Major in Computer Science)

- **DR MARGARET BERNARD MEDULLAN AWARD**
  Awarded to the graduate in Computer Science with the highest GPA
ENVIRONMENTAL & NATURAL RESOURCE MANAGEMENT
THE ASA WRIGHT NATURE CENTRE-JULIAN DUNCAN PRIZE
Awarded for the best Year I performance in Environmental & Natural Resource Management

THE ASA WRIGHT NATURE CENTRE - THOMAS CARR PRIZE
Awarded for the best Year II performance in Environmental & Natural Resource Management

THE ASA WRIGHT NATURE CENTRE – IAN LAMBIE PRIZE
Awarded for the best Year III performance in Environmental & Natural Resource Management

THE ENVIRONMENTAL MANAGEMENT AUTHORITY (EMA) PRIZE
Awarded for the Best Research Project

SPECIAL PRIZE:
THE JULIAN KENNY PRIZE IN NATURAL HISTORY
Awarded to the final year undergraduate student majoring in a Life Science discipline and displaying a strong interest in Natural History

DEPARTMENT OF MATHEMATICS & STATISTICS

THE POWERGEN PRIZE
Awarded for the best Year I performance in Mathematics

THE GUARDIAN LIFE OF TRINIDAD & TOBAGO PRIZE
Awarded for the best Year II performance in Mathematics

THE TATIL GROUP PRIZE
Awarded for the best Year III performance in Mathematics

THE WINSTON A. RICHARDS PRIZE IN STATISTICS
Awarded for the best Year II and Year III performance in Statistics

DEPARTMENT OF PHYSICS

THE RUSSELL BARROW MEMORIAL PRIZE IN ASTRONOMY
Awarded to the student showing the most initiative and effort in Astronomy outside the formal classroom

THE VICAR ENTERPRISES LIMITED PRIZE
Awarded for the best Year I performance in Physics

THE AZAD W. HARRIPAUL PRIZE
Awarded to the student with the highest marks in the level II of the programme for the course PHYS 2159

THE BERGER PAINTS TRINIDAD LTD. PRIZE
Awarded for the best Year II performance in Physics

THE DEVA SHARMA PRIZE
Awarded for the best performance by a female student graduating with a major in Physics

THE P.C.S. NITROGEN PRIZE
Awarded for the best Year II performance in Materials Science

THE ANTHONY CAMPBELL MEMORIAL AWARD
Awarded for the best performance in the Physics Major Research Project

THE TRINIDAD AGGREGATE PRODUCTS PRIZE
Awarded for the best performance in Ceramics Science

THE CARIRI PRIZE
Awarded for the best performance in Materials Science

THE BRUNO MITCHELL PRIZE
 Awarded for the best performance in Astrophysics Course

DIAGNOSTIC NUCLEAR MEDICINE LTD. PRIZE
Awarded to the most outstanding student in Advanced Medical Physics & Bioengineering (PHYS 2160)

**Please note:**

I. Preliminary Chemistry I (CHEM 0060) and II (CHEM 0061) are taught by The Open Campus. These courses are not counted towards a student’s credit requirements for the BSc degree. However they can be used as pre-requisites for other courses/programmes.

II. a. Basic Chemistry for Life Sciences (CHEM 1062) is offered for students who have little exposure to Chemistry and intend to pursue studies in Agriculture, Human Ecology or the Life Sciences.

b. CHEM 1062 cannot be done in conjunction with CHEM 1060 and/or CHEM 1061 or CHEM 1065, CHEM 1066, CHEM 1067 and CHEM 1068 or CHEM 0060 and CHEM 0061.

III. Students who have already passed Chemistry at CAPE (Units 1 and 2), GCE A-Level or Preliminary Chemistry (CHEM 0060 and CHEM 0061) or equivalent at UWI will be exempted from CHEM 1062 (Basic Chemistry for Life Sciences).
IV. For all Preliminary, Level I and Level II Chemistry courses (unless otherwise stated) practical work will be assessed throughout the semester and will contribute to the candidate’s final mark.

a. N.B. Students will be debarred from writing the final examination if they have not attended, completed and handed in lab reports for at least 75% of the laboratory experiments.

V. The courses CHEM 3560 (Environmental Chemistry) and CHEM 3569 (Industrial Chemistry) have restricted enrollment. Entry into these courses is highly competitive and selection will be based on students’ academic records. Students interested in pursuing these courses are required to complete an application form, available from the Chemistry General Office, the semester before the course is due to run.

VI. Students wishing to pursue the new Analytical Minor in 2013/14 will be required to complete an application form available from the Chemistry General Office.

INTRODUCTION OF THE NEW CHEMISTRY PROGRAMME – 2013/2014

In 2012/2013 the Department of Chemistry introduced a new Level I programme consisting of CHEM 1065, CHEM 1066, CHEM 1067 and CHEM 1068. This was the first phase of the introduction of the new Chemistry curriculum. Beginning September 2013, the Department will be introducing for the first time a BSc degree in Chemistry as well as the completely revised Major in Chemistry and Minors in Analytical Chemistry and Chemistry.

A. Students Entering Level II in 2013/2014

Students who have completed Level I can therefore proceed in Chemistry by choosing from the following programmes as appropriate.

(i) Major in Chemistry (revised)
(ii) Minor in Chemistry (revised)
(iii) Minor in Analytical Chemistry (revised)
(iv) BSc in Chemistry (new programme)

Major in Chemistry (New)
(From September 2013)
(30 Credits)

The new major will require the following courses amounting to 30 credits over Level II and Level III as follows. All the core courses and some of the electives are either new or have been substantially revised.

**The Minor in Analytical Chemistry (New)**

*(From September 2013)*

*(15 Credits)*

Students pursuing the Minor or Major or BSc in Chemistry can register for this Analytical Chemistry Minor and will complete 15 credits of courses as outlined below.

Students wishing to pursue the new Analytical Chemistry Minor in 2013/2014 will be required to complete an application form available from the Chemistry General Office.

**SEMESTER 2**

**These electives must be chosen from the following:**

CHEM 3560, CHEM 3561, CHEM 3562, CHEM 3569, CHEM 3870, MATH 2190, AGBU 2003 and AGRI 3000.
BSc in Chemistry (New)
(New Programme from September 2013)
(93 Credits)

In addition to the Level I Chemistry courses (12 credits), students pursuing the BSc in Chemistry will require passes in CAPE Mathematics Units 1 and 2 or MATH 1115 and MATH 1125 or equivalent. However, students who have passed CAPE Mathematics Units 1 and 2 will then be required to pursue any other four (4) Level I Faculty courses (at least 3 credits each) in order to satisfy the minimum Level I requirements of 24 credits. Also note carefully, the students who need to read MATH 1115 and MATH 1125 (3 credits each) will be required to complete any other two (2) Level I Faculty credits (at least 3 credits each) in order to fulfil the minimum Level I requirements.

At Level II they will complete the courses required for a major in Chemistry and at Level III will pursue eighteen (18) credits of required advanced core courses in Chemistry and a further twelve credits of approved electives thus completing a total of sixty (60) credits of advanced courses. The full programme at the advanced level is outlined below.

# These may be chosen from courses within or outside the Department. For those courses outside the Faculty of Science and Technology, students must seek approval from the Head of Department.
B. Students Entering or Completing Level III in 2013/2014
For 2013/2014, the current Level III programme will remain intact and students who have completed the old Level II programme will continue to Level III and will be able to do all the core and elective courses according to their expectations and along with students who have not completed current required Level III courses will be able to complete the Chemistry Major or Minors and the Chemistry and Management Programme as advertised in the 2012/2013 FST booklet.

C. Students who have Not Completed the Old Level II
Students who are trailing one or two of the old level II courses will be advised as to the courses which would constitute the best option for proceeding to the Major or Minor in Chemistry for which they have registered. Students who have failed all the old Level II courses or still require more than three of these courses will be asked to continue in the new Chemistry Major or Minor programme. Please seek academic advising to ensure that you are proceeding correctly with your degree programme.

BSc Chemistry and Management

*(NEW – for students entering Level II in 2013/2014)*

*(PLEASE SEE APPENDIX 1 which outlines the specific prerequisites for the Management courses pursued by Chemistry and Management students.)*

The Department will be introducing a revised major in Chemistry in 2013/2014. Therefore, the students who will be entering Level II of the Chemistry and Management Programme in 2013/2014 will be required to pursue Chemistry courses amounting to 30 credits over Level II and Level III. All the core courses and some of the electives are either new or have been substantially revised.

DEPARTMENT OF COMPUTING AND INFORMATION TECHNOLOGY

For further Information please visit DCIT website: http://sta.uwi.edu/fst/dcit/

Please note:

i. Students majoring in Computer Science and those registered in the BSc Computer Science and Management, BSc Information Technology and BSc Computer Science (Special) must seek the approval of the Department to read Computing, Information Technology/Systems courses outside of the FST.

Course Equivalencies: There is substantial overlap in the courses listed hereunder. However, students pursuing Computer Science courses WOULD NOT BE GIVEN credits for the equivalent Information Technology courses and vice versa.

Transfer students who pursued the equivalent Computer Science course would be exempted WITHOUT credits from the relevant Information Technology course as listed hereunder.

### iii. INTERNSHIP PROGRAMME FOR UNDERGRADUATE STUDENTS IN COMPUTER SCIENCE/INFORMATION TECHNOLOGY

The Department offers an optional internship programme for second year students majoring in Computer Science or pursuing the BSc Computer Science and Management, BSc Information Technology and BSc Computer Science (Special) degrees. This programme will be helpful in:

- Providing practical training to the students during their degree programme;
- Providing experience in the working environment, and
- Preparing for future jobs.

### iv. TRANSFER OF COURSEWORK MARKS

The Department does NOT carry forward coursework marks for their courses (COMP or INFO).

### BSc Computer Science and Management
(99 CREDITS)

Please note:

1. Acceptance for the BSc Computer Science and Management does not guarantee acceptance for courses in the Faculty of Social Sciences other than those specified below.

2. Students are advised that, in choosing courses from the Faculty of Social Sciences, the regulations from that Faculty will apply. In particular, credit will not be given for two courses which the Faculty of Social Sciences designates as having substantial overlap. Eg. ECON 2001 and MGMT 2032.

3. Students pursuing the BSc Computer Science & Management (Special Option) must seek the approval of the Programme Coordinator/Head of Department to read courses outside FST in Computing, Information Technology and Information Systems.

## MAJORS & MINORS

The following programmes are offered by the Department of Life Sciences

### MAJORS

Biochemistry  
Biology

### MINORS

Biochemistry  
Biology

### SPECIAL OPTIONS

BSc in Environmental Science and Sustainable Technology

BSc Biology with Specializations in:
- Biotechnology  
- Ecology  
- Environmental Biology  
- Plant Biology  
- Zoology

Prior to 2011/12, students majoring in Biology and Biochemistry should credit BIOL 2361 (Biomolecules and Energy Metabolism) to the major in Biochemistry and BIOL 3061 (Molecular Biology) to the major in Biology. Such students should therefore choose an ADDITIONAL ELECTIVE from EACH major to replace BIOL 2361 or BIOL 3061

With effect from 2011/12, students majoring in Biology and Biochemistry should credit BIOL 3061 - Molecular Biology to the major in Biology. Such students should NOT read BIOL 2365 - Comparative Biochemistry, but should choose an elective from the given Biology electives to replace BIOL 2365. Students should also chose an elective from the given Biochemistry electives to replace BIOL 3061

Students wishing to read BIOL 2063 – Marine Ecology or BIOL2462 - Caribbean Island Ecology must have at least a grade B in BIOL1462

BIOL 1061 - Cell Biology and Genetics will not be credited with AGRI 1011 - Introduction to General Genetics and AGRI 1013 - Introduction to Biochemistry or BIOL 1362 – Biochemistry I or BIOL1364 - Genetics I  
BIOL 1261 - Diversity of Organisms will not be credited with AGRI 1012 - Microbiology or BIOL 1065 - Diversity of Plants and Animals;  
BIOL1362 - Biochemistry I will not be credited with AGRI 1013 - Introduction to Biochemistry;  
BIOL1364 - Introductory Genetics will not be credited with AGRI 1011 - Introduction to General Genetics;

Please consult department on courses expected to commence in 2014/2015.
BIOL 2263 - General Microbiology will not be credited with BIOL 2261 - Biology of Microorganisms
BIOL 3264 - Functional Design in Biology will not be credited with BIOL 2861 - Function Design in Animals.
BIOL 2365 - Comparative Biochemistry will not be credited with BIOL 2361 - Biomolecules and Energy Metabolism

Appendix 4 provides additional antirequisites.

NOTE: Students will be debarred from writing the final examination if they have not attended, completed and handed in laboratory reports for at least 75% of laboratory or field exercises.

## SPECIALISATIONS

Students reading for the BSc Degree in Biology are required to do two SPECIALISATIONS. Each specialisation comprises of 15 credits as listed below. Other students may choose individual courses as electives, however first preference will be given to persons reading the B.Sc. Degree in Biology.

Specialisations available in:
- SPECIALISATION - PLANT BIOLOGY
- SPECIALISATION - ZOOLOGY
- SPECIALISATION - ECOLOGY & ENVIRONMENTAL BIOLOGY
- SPECIALISATION - BIOTECHNOLOGY

Please note list of specialisation courses will be published in the syllabus for 2014/2015. Please consult the department for further information.

PLEASE NOTE LEVEL II AND LEVEL III COURSES WILL BE PUBLISHED IN THE SYLLABUS FOR 2014/2015.

During 2014/2015 a MAJOR IN ENVIRONMENTAL SCIENCE may also be introduced. Students who propose to do this major will require 2 courses from ESST 1000, ESST 1001, ESST 1002 (depending on the other major they are doing) and ESST 1005 and ESST 1006. They should also do another 12 LEVEL I credits from another major. Class size is limited and students doing the full B.Sc. Environmental Science and Sustainable Technology students have priority.
Major in Environmental & Natural Resource Management

This interdisciplinary programme is offered in conjunction with the Departments of Life Sciences, Chemistry, Food Production and Agricultural Economics & Extension. This major will be phased out from 2014/2015.

(i) See note below for students reading joint majors in Biology and Environmental and Natural Resource Management (ENRM).
(ii) Students doing the major in ENRM are not permitted to do the minor in Environmental Biology.

MINORS for students who started prior to 2012/13

NOTE: Research projects BIOL 3069 done under a relevant area, will be considered towards the following minors in that discipline. Please consult the Head of Department before registering for this course.

(i) Core courses must be credited towards the chosen major and cannot be credited towards the minor.

(ii) Students reading the major in Biology with the minor in Biochemistry should read BIOL 2361 and choose a Biology elective to replace BIOL 2365*

### DEPARTMENT OF MATHEMATICS & STATISTICS

**Please note:**

Students reading courses in Mathematics in the Faculty of Science and Technology are advised to consult with the Head, Department of Mathematics & Statistics, before registering for any course in the Faculty of Social Sciences that involves Mathematics or Statistics.

**COURSE LISTING**

List of courses offered in the Department of Mathematics & Statistics for the 2013/2014 academic year.

**KEY:**

## Students pursuing MATH 2140 or MATH 2150 will not be credited for MATH 2190.

**Taught by Open Campus; not counted towards a student’s credit requirements for the award of the BSc Degree.**

* Taught by Open Campus; not counted towards the credit requirements for the award of the BSc Degree.

2. Students repeating a course may carry over the practical coursework mark for a maximum of two (2) years. However the theory coursework must be repeated. Please consult with the Head of Department.

3. Laboratory courses (year long): Students are required to register for each year long laboratory course in Semester I of the Academic year. However, since these are year long courses credit will be assigned only in Semester II.

PLEASE NOTE LEVEL II AND LEVEL III COURSES WILL BE PUBLISHED IN THE SYLLABUS FOR 2014/2015
LANGUAGE COURSES

The Centre for Language Learning (CLL) offers courses in 10 foreign languages: Arabic, Chinese, French, German, Hindi, Italian, Japanese, Portuguese, Spanish and Yoruba.

Its aim is to empower students to use the target language in order to understand information, to express themselves orally and in writing, to communicate with native and non-native speakers of the language and engage with the culture of the language.

Students can register at the CLL and attend classes in any language, upon payment of a small registration fee. Students can also pursue credit courses in Chinese, French, Japanese and Spanish. Registration is online using BANNER. Students must complete a paper-based registration at the CLL before their online registration. The normal per credit fee applies.

COURSE
DESCRIPTIONS

ALPHABETICAL LISTING BY COURSE CODES

LEVEL: I
SEMESTERS: 1
COURSE CODE: ACCT 1002
COURSE TITLE: INTRODUCTION TO FINANCIAL ACCOUNTING
NUMBER OF CREDITS: 3
PREREQUISITES: NONE
DEPARTMENT RESPONSIBLE: MANAGEMENT STUDIES
COURSE DESCRIPTION: An introductory course designed for students of accounting and those in other areas of study. It aims at producing a practical and a theoretical understanding of the principles and concepts involved in the preparation of financial statements. Students are exposed to conceptual analytical approach with the aim of improving their critical thinking and communicative skills.
Assessment:
Coursework 25%
Final Examination 75%

LEVEL: I
SEMESTER: 2
COURSE CODE: AGBU 1002
COURSE TITLE: INTRODUCTION TO AGRO-ENVIRONMENTAL MANAGEMENT
NUMBER OF CREDITS: 4
PREREQUISITES: NONE
COURSE DESCRIPTION: The role and importance of the environment for social development and as a life support system. The nexus between agriculture and the environment. Agro-ecosystems structure and dynamics. Economics of environmental resources: market failure and environmental degradation, externalities and public goods; optimal resource use/extraction and approaches for management of renewable resources.
Concept of the watershed as a management unit: hydrology, soils, natural forest, biodiversity and land use. The impact of agricultural practices on the environment viewed from an ecosystem perspective: deforestation, soil erosion/degradation, flooding, irrigation, loss of biodiversity and climate change. Case studies of impacts related to various agricultural systems: crop and livestock, subsistence and plantation farming, hillside and erodable soils, pesticide and chemical application, irrigated agriculture.
Integration of the concepts and issues discussed in designing sustainable agro-environmental systems for the tropics; focus on small island states. Case studies.

COURSE TITLE: PRACTICAL SKILLS IN BIOCHEMISTRY II  
NUMBER OF CREDITS: 1.5  
PREREQUISITES: BIOL 1362, CHEM 1066 AND CHEM 1067  
COURSE DESCRIPTION: This course is composed primarily of laboratory exercises which assist students to understand concepts taught in the classroom as well as introduce techniques necessary to function efficiently in a biochemistry lab. As this course builds upon those techniques studied in Practical skills in Biochemistry I students must first have taken that course. Topics covered include are DNA and RNA isolation from animal tissues and a project where the students isolate and characterize invertase from yeast.

SEMESTER: 1
COURSE CODE: BIOL 1065
COURSE TITLE: DIVERSITY OF PLANTS AND ANIMALS
NUMBER OF CREDITS: 4
PREREQUISITES: PASSES IN 2 CAPE/GCE A-LEVEL SUBJECT OR EQUIVALENT
COURSE DESCRIPTION: An introduction to the diversity of plants and animals. The characteristics, range of structure, reproduction, life cycles and habits of selected plant and animal groups will be covered.
Assessment:
Coursework 40%
Final Examination 60%

LEVEL: I
SEMESTER: 1

COURSE TITLE: LIVING ORGANISMS I
NUMBER OF CREDITS: 3
PREREQUISITES: (CAPE BIOLOGY (UNITS I AND II) OR (BIOL 0061 & BIOL 0062) OR GCE A-LEVEL BIOLOGY
COURSE DESCRIPTION: An introduction to the major groups of prokaryotes, autotrophic protists and plants, their evolutionary associations, and adaptive radiation. Explores ideas about the origin of the prokaryotes and the evolution and diversity of photosynthetic organisms. It is a prerequisite for advanced biology courses in the Department of Life Sciences.
Assessment:

LEVEL: I
SEMESTER: 2
COURSE CODE: BIOL 1462
COURSE TITLE: GENERAL ECOLOGY AND BIOMETRY
NUMBER OF CREDITS: 6
PREREQUISITES: CAPE/GCE A-LEVEL PASS IN BIOLOGY OR ENVIRONMENTAL SCIENCE OR PASSES IN BIOL0061 & BIOL0062, OR BIOL 1065 OR EQUIVALENT.
COURSE DESCRIPTION: An introductory treatment of ecology and data analysis. Topics include population ecology, community ecology, ecosystem ecology, geographic ecology, descriptive statistics, inferential statistics, independence and probability, simple linear regression and correlation.
Assessment:
Coursework 40%
Final Examination 60%
LEVEL: II

PREREQUISITES: MATH 1115 or MATH 1125 or AGRI 1003 or Unit I or II CAPE Pure Mathematics or Unit I or II CAPE Applied Maths or Cambridge GCE A’level Mathematics or A/O’ Level Add Maths or equivalent and 9 Credits of Level 1 Life Sciences courses chosen from the following: BIOL 1262, BIOL 1263, BIOL 1364, BIOL 1362, BIOL1261 and BIOL1061.
COURSE DESCRIPTION: This course introduces statistical concepts and analytical methods that can be applied to data in the biological, life sciences and environmental sciences. It will teach the basic concepts of experimental design, quantitative analysis of data, and statistical inferences. This course emphasises applications and will help students to statistically evaluate data from biological experiments. Assessment is designed to make students work continuously with the course materials, exploring and critically analysing research and real world data. Assessment will be continuous through assigned problem sheets allowing continuous feedback and guidance on problem solving techniques.

COURSE TITLE: PRINCIPLES OF MOLECULAR BIOLOGY
NUMBER OF CREDITS: 3
PREREQUISITES: Either BIOL 1362 and BIOL 1364 or BIOL 1061
COURSE DESCRIPTION: This course provides an introduction to recombinant DNA technology, R-DNA cloning, and applications of R-DNA technology. It examines the importance of restriction endonucleases in gene cloning, methods of construction of vectors and their applications in developing gene libraries. The methods of screening and enrichment of libraries are also examined. The principles of the Polymerase Chain Reaction (PCR) and its applications including paternity testing and fingerprinting, are also discussed. The principles of sequencing and the expansion of next-generation sequencing techniques are examined. Approaches to locating genes, including map-based gene isolation, and methods of regulating gene expression, including RNAi, co-suppression, and over-expression are discussed using detailed examples. All techniques are further examined under general and holistic approaches to studying the genome, through forward and reverse genetics approaches, functional genomics, transcriptomics, proteomics and metabolomics. The theoretical principles discussed during the lectures are reinforced by practical exercises and assessment involving quizzes, lab reports and discussions.

PREREQUISITES: BIOL 1364 or BIOL 1061 and 6 credits from among the following courses: BIOL 1262, BIOL 1263, BIOL 1362 or BIOL 1261.
COURSE DESCRIPTION: The major topics of the course are cytogenetics (including epigenetics and developmental genetics), prokaryotic/ viral genetics, and molecular genetics (including genomics). Cytogenetics explores chromosomal macromutations (chromosomal deletions, duplications, inversions and translocations) and their associated cytogenetic effects on plants and animals. Epigenetics and developmental genetics is a new area of study that explains the environmental influence on chromatin dynamics, DNA methylation, development and ultimately on inheritance. An introductory treatment of developmental genetics is also given to understand master control genes (homeotic genes) that regulate a cascade of genes that control development. Prokaryotic/ viral genetics provides insights into prokaryotic/ viral reproduction, recombination; genetic complementation, mapping; and genetic regulation. Molecular genetics provides the fundamental basis for the understanding of Molecular Biology and as such deals with DNA replication, transcription, translation and controls. Genomics provides an insight into where genetics is evolving (including an introduction to applications).

COURSE DESCRIPTION: This course deals with how plants gather the resources they need to grow and survive. The first part provides the essential concepts of plant physiology with comprehensive coverage of water relations, mineral uptake, and photosynthesis. The second part explores how these resources are translated into plant growth and provides an introduction to how plants respond to environmental signals at the whole plant level. Each topic is covered by lectures and supported by online material and by recommended reading. The Practicals complement the lecture topics and provide an opportunity gain valuable practical skills in the life sciences.

COURSE DESCRIPTION: Physiology of Animals is the study of how animals' function. The course provides an introduction to molecular and cellular physiology and the principal physiological systems in animals, and how these systems function to maintain homeostasis in various environments. It covers fundamental concepts in osmoregulation and excretion, neurophysiology, muscle physiology, respiration, thermo-physiology, circulation and gas transport, endocrinology, and cardiovascular physiology. It also looks at some of the major stressors on physiological processes and how animals have been able to deal with them. Typical stressors that are covered include osmotic pressures, water limitation, hypoxia, altitude, depth, temperature extremes and exercise. While animal physiology examines systems and processes common to all animal species, this course will focus on vertebrates, with a special emphasis on mammalian systems.

COURSE DESCRIPTION: It is essential that biotechnology personnel, in any form of the use of the body, should be more than merely acquainted with the human body and the relationship of its parts to the total working of the healthy person. Scientific background will underscore student opportunities to think critically, from the perspective of the human organism functioning independently, the interface between the individual and his/her immediate environment, including interactive relationships with technology, and global environment. This course integrates several disciplines including the basic gross anatomy and histology of all the system, as well as physiology of the human body. Contemporaneous issues of homeostasis, ergonomics, adaptation and health will be discussed in the context of today’s emerging environmental and inter-organism impacts in the quality of life. This course comprises of: General Introduction of Gross anatomy, concepts and principles of cell biology; histology; the integumentary, skeletal, muscular, and nervous systems; special senses; and the endocrine system. This course will be assessed through in-course assignments, in-course laboratory exercises and a final examination.

COURSE DESCRIPTION: This is part I of two of core inorganic chemistry courses and gives an introduction to fundamental concepts in inorganic chemistry with a focus on descriptive inorganic chemistry and bonding theories both in inorganic molecules and in the solid state. The course is divided into topic themes and includes structure of solids, survey of properties of main group elements, aqueous and redox chemistry of ionic compounds, principles of group theory, descriptive transition metal chemistry the basis of which includes crystal field theory and extending into basic molecular magnetism and electronic spectroscopy. The topics are pursued with a common theme of chemical bonding and structure and the derived chemical properties of compounds of elements across the most of the periodic table. The assessment approach will be varied and continuous throughout the course and include online quizzes, in-course exams, tutorial worksheets and group research paper.

COURSE TITLE: ORGANIC CHEMISTRY I
NUMBER OF CREDITS: 3
PREREQUISITES: CHEM 1065, CHEM 1066, CHEM 1067 AND CHEM 1068 OR CHEM 1060
COURSE DESCRIPTION: This course will be the first of the two basic organic chemistry courses required for students who have completed the Introductory Chemistry programme and wish to pursue a major in chemistry. Students are introduced to the basic reactions, principles and tools which will enable them to devise reasonable schemes for the synthesis of given molecules, to determine the structures of these molecules and to explain the formation of the products obtained from reactions. This will be achieved through six lectures in Stereochemistry, six lectures in Spectroscopy and 12 lectures on Synthetic Design which will focus on applying knowledge of aromatic and carbanion chemistry and retrosynthetic analysis to the synthesis of given organic molecules. There will be twelve weekly tutorials during which assigned problems will be discussed. Students will be assigned to work in small groups on the problems and hand in their solutions before each tutorial.

COURSE DESCRIPTION: Introduction and fundamental theory of spectroscopic techniques important to chemists and how the techniques can be used to find out more about atoms and molecules. The course also includes reaction kinetics, particularly its application to real world chemistry problems. This is a core subject area in physical chemistry. The course covers important material that will be needed in subsequent courses in all disciplines of chemistry. The course is assessed by two in-course examinations, and tutorial activities, along with a final examination.

COURSE TITLE: INTRODUCTION TO ANALYTICAL CHEMISTRY
NUMBER OF CREDITS: 3
PREREQUISITES: CHEM 1065, CHEM 1066, CHEM 1067 and CHEM 1068 or CHEM 1060 AND CHEM 1061
COURSE DESCRIPTION: This course emphasizes classical methods in analytical chemistry. In the first of two units, students are introduced to the basic tools needed in all chemical analyses. The techniques of chemical measurements of mass and volume, for example, are studied, along with relevant units and interconversions. The errors associated with chemical analyses are discussed; students will be able to describe these errors, identify how they can occur in an analysis and suggest methods for minimizing or eliminating them. Simple statistical analysis is also considered in this unit. In the second unit, students are introduced to a survey of classical and modern analytical methods. This is followed by the principles of chemical equilibria, and how these apply to the important classical analytical chemistry methods of gravimetry and titration. The teaching/learning strategies in use in this course are based on the classroom lecture along with small group activities, supported by myeLearning components. The course is assessed by in-course examinations, tutorial activities and participation, along with a final examination.

SEMESTER: 2
COURSE CODE: CHEM 2471
COURSE TITLE: ANALYTICAL METHODS IN CHEMISTRY I
NUMBER OF CREDITS: 3
PREREQUISITES: CHEM 2470

COURSE DESCRIPTION: This is a compulsory course for students who wish to pursue the Minor in Analytical Chemistry, which continues the study of analytical chemistry concepts begun in CHEM 2470. More advanced concepts are presented, including further development of titrimetric techniques, focusing on complexometric titrations. The understanding and use of instrumental techniques begins in this course, with electrochemical methods, basic spectroscopy and separation techniques. The unit on electrochemical methods covers the chemical theory that is exploited in potentiometric and other analytical techniques as well as more applied issues to do with the appropriate use of these methods. The units on basic spectroscopy and separation techniques provide a general introduction to these advanced instrumental techniques. The teaching/learning strategies used in this course are based on the classroom lecture along with small group activities and participation; all of this supported by myeLearning components. The course is assessed by in-course examination, tutorial activities, poster preparation, a literature review and a final examination.

SEMESTER: 2
COURSE CODE: CHEM 2472
COURSE TITLE: ANALYTICAL CHEMISTRY LABORATORY
NUMBER OF CREDITS: 3
PREREQUISITES: CHEM 2470

COURSE DESCRIPTION: This is a compulsory course for students who wish to pursue the Minor in Analytical Chemistry, which provides a general survey of the most common laboratory activities required by the modern analytical chemist. These activities include planning and design, techniques for the acquisition, handling and processing of samples, analytical techniques, data analysis and quality control and quality assurance concepts. The course is organised as a semester-long "research project" with the students working on one site/problem over the whole semester using a range of analytical techniques. In the first year, the site/problem under investigation will be an environmental survey of a contaminated river. Each week a different set of relevant analytical techniques will be emphasised, while some critical areas will be repeated in a variety of labs for better understanding by students. For example, the use of replicates, simple statistical analysis and error evaluation will be conducted in every lab. Group learning is emphasised, as students will carry out all course activities in small groups. The course is assessed entirely by coursework, which consists of a variety of activities; including laboratory skill demonstrations, weekly lab reports, a final lab report and an oral presentation.

NUMBER OF CREDITS: 1.5
PREREQUISITES: CHEM 1065, CHEM1066, CHEM 1067 and CHEM 1068 or CHEM 1060 and CHEM 1061

COURSE DESCRIPTION: This is a compulsory course for all Level II students in the B.Sc. Chemistry and chemistry major and minor programmes. This course further develops and reinforces basic laboratory skills taught in CHEM 1065. The course also introduces students to new techniques and skills required by a chemist including one synthetic and advanced separation and purification techniques; chemical quantitation; reaction kinetics; spectroscopy and interpretation of spectral data; and basic analytical instrumentation: HPLC, GC, Flame Atomic Absorption, and UV-Visible Spectroscopy. The course is assessed on a continuous basis through lab quizzes, practical lab skill exercises, lab reports and oral examinations.

NUMBER OF CREDITS: 1.5
PREREQUISITES: CHEM 1065, CHEM 1066, CHEM 1067 and CHEM 1068 or CHEM 1060 and CHEM 1061
COURSE DESCRIPTION: This is a compulsory course for Level II students in the B.Sc. Chemistry and chemistry major and minor programmes. In this course students will carry out advanced laboratory techniques experiments in which the lab skills taught in CHEM 1065 and CHEM 2670 will be used together to perform more complex laboratory experiments covering reaction thermodynamics, multistep inorganic/organic reaction syntheses, spectroscopic identification of compounds, spectra interpretation, symmetry and stereochemistry of compounds. The course introduces students to basic spectroscopic instrumentation: mass spectrometry and IR, and 1H NMR spectroscopy as well as experimental design and planning. The course is expected to develop the chemical knowledge and analytical and problem solving skills of students to give them the confidence to work in a chemical environment, to communicate in writing the reasoning used in analyses and conclusions reached from analyses conducted, to evaluate critical information, to use technology to access information effectively and efficiently and to use it in an ethical and legal manner, to be independent thinkers, and to have an appreciation for chemical safety and the environment. The course is assessed on a continuous basis through lab quizzes, practical lab skill exercises, lab reports and oral examinations.

COURSE TITLE: INTRODUCTION TO RESEARCH IN CHEMISTRY LEARNING
NUMBER OF CREDITS: 3
PREREQUISITES: CHEM 1065, CHEM 1066, CHEM 1067 and CHEM 1068 or CHEM 1060 and CHEM 1061
COURSE DESCRIPTION: CHEM 2770 is one of an intended series of courses that a student with an interest in the field of Chemical Education will take. This course thus provides an introduction to a variety of research topics in Chemical Education Research (CER). The course begins with an investigation into what exactly is research in Chemistry Education followed by an exploration of the chemical education literature in the following areas: chemistry problem-solving and the development of misconceptions among chemistry learners; the application of learning theories to the practice of chemistry teaching and learning; the use of non-traditional assessment methods in measuring chemistry learning and the impact of CER on college-level chemistry teaching and learning. The topics were chosen as they represent examples of on-going areas of research in the developing field of CER. Learning in this course will be facilitated in large part through interactive weekly discussion forums based on thorough reading of the course materials by all class participants. Students will also experience small-group learning activities during the weekly tutorial sessions. The course will be assessed via a series of exercises that will be conducted during the course of the semester, namely, preparation/participation in weekly discussions, review of journal articles, exploratory essays and a research paper. There will be no final examination in this course.

SEMESTER: 1
COURSE CODE: CHEM 3870
COURSE TITLE: PRINCIPLES OF CHEMICAL BIOLOGY
NUMBER OF CREDITS: 3
PREREQUISITES: CHEM 2260 OR CHEM 2270
COURSE DESCRIPTION: This chemistry elective provides knowledge of the three major classes of bioactive molecules (Carbohydrates, Proteins and Nucleic Acids). Quite distinct from simply examining the chemical reactions of the three molecular classes, this course focuses on their structures, functioning in signalling and recognition pathways, and their role in diseases and the aging process. For each biomolecule, its use and potential in the design of new drug therapies is addressed. The section on free radicals acts as a tie-in for the three biomolecules, in terms of relating the onset and prognosis of all diseases to a free radical origin. The two laboratory-based demonstration exercises (Carbohydrates and Nucleic Acids) will allow students to appreciate the dynamic 3-D nature of these molecules and the implications of their structure, conformation and configuration on their chemical and biological properties.

COURSE CODE: ECON 1001
COURSE TITLE: INTRODUCTION TO ECONOMICS I
NUMBER OF CREDITS: 3
PREREQUISITES: NONE
DEPARTMENT RESPONSIBLE: ECONOMICS
COURSE DESCRIPTION: This course provides students to the history of economic thought highlighting some of the key economic issues, which have preoccupied the discipline from its origins. The course also provides an introduction to the basic principles of micro-economic analysis together with the main perspectives on the functioning of the macro-economy. The micro-economic analysis is illustrated by reference to a key export sector in the Caribbean (e.g. oil or bananas). The implications of trends in the latter for the Balance of Payments and macro economy conclude this first semester course.

COURSE DESCRIPTION: This course introduces the biological principles underlying the study of environmental science, and provides an introduction to the diversity of microbes, plants and animals. It also examines the importance and diversity of the biological component of the environment. It will also cover basic principles of biochemistry and genetics, and is a necessary foundation course for several Level II-III courses in the Environmental Sciences programme. Delivery of course materials would involve a combination of lectures, practicals, tutorials, and web based materials. COURSE DESCRIPTION: Introduction to Environmental Chemistry offers an introduction to the field of environmental chemistry. It is designed to provide fundamental understanding in the underlying concepts of Chemistry along with the more specific areas relevant to environmental concepts. Students will be introduced to the fundamentals of general, physical and organic chemistry within the context of their application to environmental issues. To achieve this, qualitative and quantitative aspects of environmental processes will be studied. Specific topics include processes in the atmosphere, natural waters, and soils, along with the transport and fate of chemicals in the environment. Wherever possible, examples involving local/regional issues and current events will be used to illustrate the concepts in the course. The delivery of course materials would involve a combination of lectures, practicals, tutorials, and web based materials. PREREQUISITE(S): 2 CAPE Science subjects (Units I &II) or ‘A’ Level equivalent, with an average Grade of III or B. Must have passes in Biology, Chemistry, Mathematics and Physics at CSEC level OR An approved Associate Degree with a minimum GPA of 2.5

COURSE DESCRIPTION: The ability to communicate information and ideas to others is fundamental to every branch of science. Communications skills are reported by employers to be the qualities they most desire in potential job applicants. Scientists are often required to report their findings to a range of audiences using various delivery methods. Unfortunately, communication skills do not come naturally, nor can they be learned by simply reading about the subject. They require development, with the opportunity for practice and feedback, before students can feel truly comfortable expressing themselves orally and in writing, in logical, clear and concise terms. The aim of this course is to provide students entering the Environmental Science and Sustainable technology with instruction on developing effective scientific communication skills relevant to areas of research and employment. Some of the main skills would include reporting writing, literature reviews, oral presentation and team-work. The course content would be delivered in 5 modules using a combination of lectures, practicals, tutorials, and web based materials. Assessments are designed to encourage students to work continuously with the course materials.

Assessments are designed to encourage students to work continuously with the course materials.</td>
<td>COURSE DESCRIPTION: This course gives an overview of human-environment interactions exploring causes, effects and solutions of human impacts using a broad temporal and spatial perspective. We consider the evolutionary and historical changes in human-environment interactions and the main drivers of change: population growth, technological and lifestyle changes. Regional variation in these drivers along with issues of economy, urbanisation and inequality will also be considered. The bulk of the course illustrates the complex and dynamic ecological interactions between humans and specific resources and components of the environment necessary for human wellbeing namely ecosystems and biodiversity, food, freshwater, clean air, materials and energy. The consequences of these interactions such as resource depletion, environmental degradation and global climate change will be highlighted. Future scenarios and management solutions will be explored. The delivery of course materials would involve a combination of lectures, practicals, tutorials, and web based materials. FACULTY RESPONSIBLE: FACULTY OF HUMANITIES & EDUCATION
COURSE DESCRIPTION: (NOT for Humanities students)
Objectives:
1. To develop an awareness of the main process of cultural development in Caribbean societies, highlighting the factors, the problematic and the creative output that have fed the emergence of Caribbean identities.
2. To develop a perception of the Caribbean as wider than island nations or linguistic blocs.
3. To stimulate students’ interest in, and commitment to Caribbean civilisation and to further their self-definition.
Modules:
1. Origins
   I Caribbean space / physical environment / Amerindian peoples and Cultures: their legacy.
   II European conquest, settlement and demographic changes.
2. Fighting for Freedom
   I Slavery, marronage and rebellion.
   II New in/out- migration, indenture, and their consequences: 19th and 20th centuries.
3. Quest for Identity
   I Race and nationalism.
   II Independence, dependence and regionalism.
   III Creolisation and ethnic identity.
4. Ideas, Ideologies and Theologies
   I Education/religion in the Caribbean.

COURSE DESCRIPTION: This course is delivered through the medium of print. The print package comprises a student manual, a study guide and a reader. In addition to the print material there are teleconferencing and/or tutorials. The course introduces students to some of the major institutions in Caribbean society. It exposes the student to both the historical and contemporary aspects of Caribbean society, including Caribbean legal, political and economic systems. In addition, Caribbean culture and Caribbean social problems are discussed. Assessment is based solely on a final examination at the end of the semester. It consists of twelve (12) essay-type questions, of which students are required to write on three (3). All questions carry equal marks. The examination is divided into four (4) sections corresponding to the four (4) subject areas in the course. Students are not allowed to do more than one question in any one section.

PREREQUISITES: INFO 1400 AND INFO 1405 OR INFO 1506  
COURSE DESCRIPTION: The course covers the design, implementation and management of Database Systems. Emphasis is placed on database design of real world business applications using Entity-Relationship modeling. SQL programming is covered in detail. Query Optimization concepts are introduced in the context of database performance tuning. Data Management concepts such as Transaction Management, Concurrency Control, Recovery, and Security are discussed. Several current database environments and applications including Distributed Databases and Web-enabled Databases are discussed.

COURSE TITLE: SOFTWARE ENGINEERING
NUMBER OF CREDITS: 4
PREREQUISITES: INFO 2400 AND INFO 2420
COURSE DESCRIPTION: This course introduces students to the fundamental concepts and techniques of software engineering. It examines various approaches for developing a software product, from the initial request for development right down to the delivery of the final product to the customer. All of these approaches involve steps such as determining the user requirements, structuring these requirements in the form of a requirements specification document, and designing, coding and testing the software. These aspects of software engineering form the major component of the course. Since project management skills are crucial for the successful development of a software product, the course also covers project management techniques as they pertain to software engineering. This includes the topics of project scheduling, software estimation, and risk management.

COURSE TITLE: USER INTERFACE DESIGN AND DEVELOPMENT
NUMBER OF CREDITS: 4
PREREQUISITES: INFO 2400
COURSE DESCRIPTION: Human-computer Interaction is an interdisciplinary field that integrates theories and methodologies from Computer Science, cognitive psychology, design, and many other areas. The course is intended to introduce the student to the basic concepts of Human-computer Interaction. It will cover the basic theory and methods that exist in the field. The course will unfold by examining design and evaluation. Case studies are used throughout the readings to exemplify the methods presented and to lend a context to the issues discussed. The students will gain principles and skills for designing and evaluating interactive systems.

Among the topics studied are the design and evaluation of effective user interaction designs, including principles and guidelines for designing interactive systems. Additionally, much emphasis is given to the development process for user interaction designs as an integral, but different, part of interactive software development. User interaction development activities include requirements and task analysis, usability specifications, design, prototyping, and evaluation. It is a goal of this course to help students realize that user interface development is an ongoing process throughout the full product life cycle, and developing the human-computer interface is not something to be done at the last minute, when the “rest of the system” is finished. During the course the students will be involved with a real problem solving/software development project. Students will be required to gather functional requirements, identify the problem, form a solution and present this solution.

PREREQUISITES: INFO 2415
COURSE DESCRIPTION: This course introduces students to the subject of geographic information systems. Students are introduced to the characteristics of geographical data including coordinate systems and projections. Spatial data models are presented with a view of laying the foundation to understanding the usefulness of Geographic Information Systems (GIS) in organizations that use geographic data. Database structure and design are delivered in the context of managing spatial records and analysis techniques for interrogating such data are discussed. GIS is also presented as a tool used to effect business process re-engineering; the type of Information System enhancement which can significantly alter the productivity of business positively.

COURSE TITLE: ACTUARIAL PROJECT  
NUMBER OF CREDITS: 4  
PREREQUISITE: MATH2210, MATH2220 AND MATH3310  
COURSE DESCRIPTION: This course requires the student to develop an actuarial solution to a problem define of an appropriate scope. The project may be application oriented where the student builds a business solution similar to what is required to solve actuarial problems. The project should require the student to draw on the skills developed across several Actuarial Science courses.

LEVEL: III
SEMESTER: 2
COURSE CODE: MKTG 3007
COURSE TITLE: MARKETING PLANNING
NUMBER OF CREDITS: 3
PREREQUISITES: MGMT 2012 AND MGMT 2023
COURSE DESCRIPTION: This intention is to equip students with the tools necessary for effective marketing planning in the public and private sectors. Analytical methods and data sources necessary in defining competition, analysing an industry and customers, and forecasting market potential is covered in depth. Students are expected to develop an actual marketing plan as a coursework project.

COURSE TITLE: PRODUCTION AND OPERATIONS
NUMBER OF CREDITS: 3
PREREQUISITES: MGMT 2012
COURSE DESCRIPTION: This course is intended to present students with an up-to-date view of primary activities of the production/operations functions in organisations. The production/operations function is an area of management that has a profound effect on efficiency, productivity and the quality of our daily lives. Focusing on Caribbean economies, the course will examine the resources that are required in the production of goods and services and illustrate the method of their acquisition utilisation, and upkeep. The topics to be covered will be shown to apply not only to the manufacturing sector but to the service sectors as well such as banks, hospitals, etc.

COURSE CODE: PHYS 3151
COURSE TITLE: QUANTUM MECHANICS
NO. OF CREDITS: 3
PREREQUISITES: PHYS 2150
COURSE DESCRIPTION:
- The origins of quantum physics: Review of Blackbody radiation, the Photoelectric effect and the Compton Effect. Wave properties of material particles and electron diffraction. The Bohr atom.
- One-dimensional problems: The free particle. Solutions to the Schrödinger equation for the infinite potential well. Stationary states of the infinite well. The potential barrier and quantum tunnelling. The harmonic oscillator. Applications.
- Three-dimensional problems: Wave functions of the infinite cubical well. Degeneracy of the energy levels. Wave functions of the hydrogen atom and degeneracy of the spectrum.

LEVEL: III
SEMESTER: 1 & 2
COURSE CODE: PHYS 3153
COURSE TITLE: PHYSICS MAJOR RESEARCH PROJECT
NO. OF CREDITS: 3
PREREQUISITES: AVAILABLE ONLY TO PHYSICS MAJORS
COURSE DESCRIPTION: Students will be required to complete a 12 weeks research project for completion of their Major in Physics. Projects will be offered in the various disciplines of Physics and each Project will be assigned a Project Supervisor. Projects may involve pure research study toward a fundamental aspect of Physics or address more applied issues. It may involve field or laboratory based work or may be a desk study involving data analysis or interrogation of legal documents. The project should, however, give the student a chance to further develop skills from the toolbox and a more detailed understanding of some component of the course. This course is offered in both Semester I & II
Assessment:
Oral 20%
Report 80%
1. Only students who need not more than 30 credits to graduate will be assigned a project.
2. This course will run in both semesters 1 and 2.

LEVEL: III
SEMESTER: 1
COURSE CODE: PHYS 3156
COURSE TITLE: PRINCIPLES OF PHYSICAL OCEANOGRAPHY AND GEOHYDROLOGY
NO. OF CREDITS: 3
PREREQUISITES: PHYS 1110 and PHYS 1111 or any nine credits from PHYS 1211, PHYS 1212, PHYS 1213, PHYS 1214, PHYS 1215 and PHYS 1216

COURSE TITLE: EARTH SCIENCE
NO. OF CREDITS: 3
PREREQUISITES: PHYS 1110 and PHYS 1111 or any nine credits from PHYS 1211, PHYS 1212, PHYS 1213, PHYS 1214, PHYS 1215 and PHYS 1216
COURSE DESCRIPTION: Earth processes and Caribbean Stratigraphy: Properties of minerals and crystals; composition, occurrence, distribution, classification and field recognition of igneous, sedimentary and metamorphic rocks; tectonic and structural features of the earth; volcanic activity; formation of soils and sediments; stratigraphy and geologic time; plate tectonics. The Caribbean environment in relation to: man, water supply, soils, petroleum, engineering geology and minerals. Introduction to Earth Materials: the origin, occurrence, world distribution and development of major earth resources- metalliferous and non-metal ores, petroleum, coal building materials, chemical raw materials, biomass resources. Earth seismology: the nature of earthquakes; the propagation and detection of seismic wave; geographical distribution of earthquakes; surface effects of earthquakes, earthquake history of the Caribbean.

COURSE TITLE: ANALOG ELECTRONICS II
NO. OF CREDITS: 3
PREREQUISITES: PHYS 2282 or PHYS 2163
COURSE DESCRIPTION: The course is updated regularly. Any amendments will be given to students at the start of the course.
- Circuit Theory: voltage and current sources, dc/ac analysis applying Kirchoff’s voltage law, Kirchoff’s current law, Ohm’s law, Thevenin theorem, Norton theorem, superposition theorem, branch current and mesh current analysis.
- Semiconductors: conductors, insulators, semiconductors. Intrinsic, extrinsic, energy band diagrams
- Semiconductor diodes: Theory, biasing, I/V characteristic and approximations, characteristic equation, resistance, load line analysis, applications.
- Bipolar Junction Transistor: Theory, biasing, I/V input and output characteristics, amplifier configurations, bias circuits, load lines, dc and ac analysis, Hybrid equivalent model, small signal analysis, Frequency response, applications.
- Power amplifiers: Theory and examples of various classes of amplifiers such as A, B, AB, C, D, applications.
- Feedback amplifiers: Positive and negative feedback. General single-loop feedback amplifier and theory. Advantages and disadvantages of negative feedback, feedback amplifier types, applications.
- Power supplies: transformers, rectifiers, filters, regulators, configurations.

COURSE DESCRIPTION:  
Introduction to cell biology and DNA: this part of the course addresses cell structure, division and functioning, DNA as the main target for radiation, genetics, functioning of cell and damages caused by different types of radiation.  
Radiation damage and DNA repair. Cell death and mutation. Organ, tissue and organism effects of irradiation: This part of course addresses cell survival after irradiation and different biological and chemical mechanisms affecting the survival as well as DNA damage and repair. Tissue, organs and organism, effects of irradiation. Here the key knowledge of radiation effects is learned.  
Modern methods of radiotherapy: This part of course addresses the main principles, modern methods of radiotherapy and combined therapies as well as tumor biology and responses of tumor and of normal tissues to radiation.  
Radiation Carcinogenesis: This part of course addresses the development of cancer after radiation: type of malignancy, dosage, time responses and concepts of for risk estimations.  
Radiation protection and legislation: This part of course addresses radiation accidents, radioecology, risk estimation and current legislation in radiation (International and Local). What we have learned after certain accidents and how to avoid high radiation doses or to minimize the consequences of irradiation.

COURSE DESCRIPTION: Students in this course have some basic knowledge of Spanish. This course will build on the skills learnt in SPAN 1101/1A Spanish and aims to continue to promote communicative and intercultural competence. The focus will be on the development of the four skills: speaking, listening, reading and writing. The course meets for four hours per week for 13 weeks. In addition, class contact time should be supplemented by one hour of independent study for each contact hour.

APPENDIX 3 – UNIVERSITY REGULATIONS ON PLAGIARISM

Application of these Regulations
1 These Regulations apply to the presentation of work by a student for evaluation, whether or not for credit, but do not apply to invigilated written examinations.

Definition of plagiarism
2 In these Regulations, “plagiarism” means the unacknowledged and unjustified use of the words, ideas or creations of another, including unjustified unacknowledged quotation and unjustified unattributed borrowing;

“Level 1 plagiarism” means plagiarism which does not meet the definition of Level 2 plagiarism;

“Level 2 plagiarism” means plagiarism undertaken with the intention of passing off as original work by the plagiariser work done by another person or persons.

3 What may otherwise meet the definition of plagiarism may be justified for the purposes of Regulation 2 where the particular unacknowledged use of the words, ideas and creations of another is by the standards of the relevant academic discipline a function of part or all of the object of the work for evaluation whether or not for credit, for example:
   a. The unacknowledged use is required for conformity with presentation standards;
   b. The task set or undertaken is one of translation of the work of another into a different language or format;
   c. The task set or undertaken requires producing a result by teamwork for joint credit regardless of the level of individual contribution;
   d. The task set or undertaken requires extensive adaptation of models within a time period of such brevity as to exclude extensive attribution;
   e. The task set or undertaken requires the use of an artificial language, such as is the case with computer programming, where the use of unoriginal verbal formulae is essential.

4 It is not a justification under Regulations 2 and 3 for the unacknowledged use of the words, ideas and creations of another that the user enjoys the right of use of those words, ideas and creations as a matter of intellectual property.

Other definitions
5 In these Regulations, “Chairman” means the Chairman of the relevant Campus Committee on Examinations; “Examination Regulations” means the Examination and other forms of Assessment Regulations for First Degrees Associate Degrees Diplomas and Certificates of the University; “set of facts” means a fact or combination of facts.

Evidence of plagiarism
6 In order to constitute evidence of plagiarism under these Regulations, there shall be identified as a minimum the passage or passages in the student’s work which are considered to have been plagiarised and the passage or passages from which the passages in the student’s work are considered to have been taken.

Student Statement on Plagiarism
7 When a student submits for examination work under Regulation 1, the student shall sign a statement, in such form as the Campus Registrar may prescribe, that as far as possible the work submitted is free of plagiarism including unattributed quotation or paraphrase of the work of another except where justified under Regulation 3.

8 Quotation or paraphrase is attributed for the purpose of Regulation 7 if the writer has indicated using conventions appropriate to the discipline that the work is not the writer’s own.

9 The University is not prohibited from proceeding with a charge of plagiarism where there is no statement as prescribed under Regulation 7.

Electronic vetting for plagiarism
10 The results of any electronic vetting although capable, where the requirements of Regulation 7 are satisfied, of constituting evidence under these Regulations, are not thereby conclusive of any question as to whether or not plagiarism exists.

Level 1 plagiarism
11 In work submitted for examination where the Examiner is satisfied that Level 1 plagiarism has been committed, he/she shall penalise the student by reducing the mark which would have otherwise been awarded taking into account any relevant Faculty regulations.
Level 2 plagiarism

12 Where an examiner has evidence of Level 2 plagiarism in the material being examined, that examiner shall report it to the Head of Department or the Dean and may at any time provide the Registrar with a copy of that report. In cases where the examiner and the Dean are one and the same, the report shall be referred to the Head of the Department and also to the Campus Registrar.

13 Where any other person who in the course of duty sees material being examined which he or she believes is evidence of Level 2 plagiarism that other person may report it to the Head of Department or the Dean and may at any time report it to the Campus Registrar who shall take such action as may be appropriate.

14 Where a Dean or Head of Department receives a report either under Regulation 12 or 13, the Dean or Head of Department, as the case may be, shall

a. where in concurrence with the report’s identification of evidence of Level 2 plagiarism, report the matter to the Campus Registrar; or

b. where not concurring in the identification of evidence of plagiarism, reply to the examiner declining to proceed further on the report; or

c. where concluding that there is evidence of Level 1 plagiarism, reply to the examiner indicating that conclusion and the Examiner shall proceed as under Regulation 11.

15 Where a report is made to the Campus Registrar under Regulation 14a or 16, the Campus Registrar shall lay a charge and refer the matter to the Campus Committee on Examinations.

16 Where the Campus Registrar receives a report alleging Level 2 plagiarism from the Examiner or any other person except the Dean or Head of Department, the Campus Registrar shall refer the matter to a senior academic to determine whether there is sufficient evidence to ground a charge of plagiarism and where such evidence is found, the Campus Registrar shall proceed as under Regulation 15.

17 Where the matter has been referred to the Campus Committee on Examinations pursuant to Regulation 15, the proceedings under these Regulations prevail, over any other disciplinary proceedings within the University initiated against the student based on the same facts and, without prejudice to Regulation 21, any other such disciplinary proceedings shall be stayed, subject to being reopened.

18 If the Campus Committee on Examinations is satisfied, after holding a hearing, that the student has committed Level 2 plagiarism, it shall in making a determination on the severity of the penalty take into consideration:

a. the circumstances of the particular case;

b. the seniority of the student; and

c. whether this is the first or a repeated incidence of Level 2 plagiarism.

19 Where the Campus Committee is of the view that the appropriate penalty for an offence of Level 2 plagiarism is for the student to be:

(i) awarded a fail mark;

(ii) excluded from some or all further examinations of the University for such period as it may determine;

(iii) be dismissed from the University, it shall make such recommendation to the Academic Board.

Clearance on a charge of Level 2 plagiarism

20 A determination of the Campus Committee on Examinations that Level 2 plagiarism has not been found will be reported to the Campus Registrar who shall refer it to the Examiner and notify the student. Where the Committee has not identified Level 2 but has identified Level 1, it shall be reported to the Campus Registrar who shall refer it to the examiner.

Level 2 plagiarism: Appeal to the Senate

21 A student may appeal to the Senate from any decision against him or her on a charge of plagiarism made by Academic Board.

Delegation by Dean or Head of Department

22 The Dean or Head of Department, as the case may be, may generally or in a particular instance delegate that officer’s functions under these Regulations.

Conflict of interest disqualification

23 Any person who has at any time been an examiner of work or been involved in procedures for laying charges in relation to which an issue of plagiarism is being considered under these Regulations shall withdraw from performing any functions under these Regulations other than those of supervisor and examiner.

This declaration is being made in accordance with the University Regulations on Plagiarism (First Degrees, Diplomas and Certificates) and must be attached to all work, submitted by a student to be assessed in partial or complete fulfilment of the course requirement(s), other than work submitted in an invigilated examination.

STATEMENT

1. I have read the Plagiarism Regulations as set out in the Faculty or Open Campus Student Handbook and on University websites related to the submission of coursework for assessment.

2. I declare that I understand that plagiarism is a serious academic offence for which the University may impose severe penalties.

3. I declare that the submitted work indicated above is my own work, except where duly acknowledged and referenced and does not contain any plagiarized material.

4. I also declare that this work has not been previously submitted for credit either in its entirety or in part within the UWI or elsewhere. Where work was previously submitted, permission has been granted by my Supervisor/Lecturer/Instructor as reflected by the attached Accountability Statement.

5. I understand that I may be required to submit the work in electronic form and accept that the University may subject the work to a computer-based similarity detention service.
